The state of contemporary music is dizzyingly diverse in terms of style, media, traditions, and techniques. How have trends in music developed over the past decades? Music Composition in the 21st Century is a guide for composers and students that helps them navigate the often daunting complexity and abundance of resources and influences that confront them as they work to achieve a personal expression. From pop to classical, the book speaks to the creative ways that new composers mix and synthesize music, creating a music that exists along a more continuous spectrum rather than in a series of siloed practices. It pays special attention to a series of critical issues that have surfaced in recent years, including harmony, the influence of minimalism, the impact of technology, strategies of "openness," sound art, collaboration, and improvisation. Robert Carl identifies an emerging common practice that allows creators to make more informed aesthetic and technical decisions and also fosters an inherently positive approach to new methods.

"Composing with constraints proposes an innovative approach to the instruction of the craft of music composition based on tailored exercises to help students develop their creativity. The fundamental premise of Composing with constraints is based on my previous book on algorithmic composition, which—in a few words—states that all compositional approaches are algorithmic and can be reduced to a formal process that involves a series of logical steps. When composition gets condensed to a series of logical steps, it can then be taught and learned more efficiently. With this approach in mind, Composing with constraints proposes a variety of exercises in the form of algorithms to help the student composer and the instructor create tangible work plans,

with high expectations and successful outcomes. The book is structured around the parameters of melody, rhythm, harmony, texture and pre-compositional approaches. All chapters start with a brief note on terminology and general recommendations for the instructor. The first five chapters offer a variety of exercises that range from analysis and style imitation, to the use of probabilities. The chapter about pre-compositional approaches offers original techniques that a student composer can implement in order to start a new work. Based on lateral thinking, this last section of the book fosters creative connections with other disciplines such as math, visual arts, and architectural acoustics. Each of the 100 exercises contained in the book proposes a unique set of guidelines and constraints intended to place the student in a specific compositional framework. Through those compositional boundaries the student is encouraged to produce creative work within a given structure. Using the methodologies in this book, students will be able to create their own outlines for their compositions, making intelligent and educated compositional choices that balance reasoning with intuition. Depending on the class in which it is adopted, Composing with constraints can be a priceless aid for the instructor. When used to complement a music theory class, the exercises can be used as compositional projects, to provide creative frameworks to the theoretical concepts studied in class and even to trigger group discussions. In a class on analysis, the book can be an invaluable tool for stylistic understanding, appropriation and imitation. Finally, when used in individual and group composition lessons, the book can provide an enormous palette of concrete assignments that the instructor can use to guide the students' compositional development and practice. The grading rubric provided in the book is an invaluable tool for both the instructor and the student. Divided in four categories (i.e. followed guidelines, orchestration, idiomatic use of the instruments and "open spaces"), the grading rules clarify in detail the grade awarded to the student, showing the aspects of the work that can be improved. Through the quantization of "open spaces", the rubric also helps the instructor ponder the students' creative use of the aspects of the exercises not constrained or left "free" in the guidelines. In sum, Composing with constraints is an excellent tool for the instruction of music composition offering

clear organization, a helpful grading rubric, and a versatility that makes it applicable for a myriad of courses and levels"--

Music is for everyone — no prior experience required! Make Music! invites kids and families to celebrate the joy of sound with a variety of inventive activities, including playing dandelion trumpets, conducting percussion conversations, and composing their own pieces. Musician and educator Norma Jean Haynes brings the pioneering work of Ann Sayre Wiseman and John Langstaff to a new generation of kids aged 5 and up, focusing on the playfulness, spontaneity, and creativity of music. Kids explore rhythm with clapping, body drumming, and intonations. They learn to create found sound with kitchen pots and pans, the Sunday paper, or even the Velcro on their sneakers. And step-by-step instructions show how to make 35 different instruments, from chimes and bucket drums to a comb kazoo and a milk carton guitar.

An effective new songwriting vocabulary supported by ASCAP, BMI, and SESAC. The Elements Of Song Craft does for songwriters what William Strunk Jr. and E.B. White's The Elements Of Style did for English language students and writers alike; gives an all-in-one definitive manifesto for contemporary songwriters in every genre to organize, understand, and practice the rules, principles, definitions, forms, and song craft needed to create good songs, songs of undeniable creative power and beauty, songs that last. The Elements of Song Craft beelines directly to the most important aspect of writing good songs—identifying the key emotion living at the heart of the song—then offers a step-by-step process to harnessing that singular emotional power. Additionally, a dozen other strategies, formulas, perspectives, and exercises are offered in the book. The Elements of Song Craft introduces, for the first time to a general songwriting audience, an effective new songwriting vocabulary utilized by songwriters taught in the SONG ARTS ACADEMY method and supported by ASCAP, BMI, and SESAC, the world's leading Performance Rights Organizations at the heart of the songwriting business, as well as at NYU Steinhardt's and The New School's songwriting programs, for over sixteen years. Thousands of song arts participants, including hit

songwriters and The Voice and American Idol contestants, have been trained in this method.

Originally published in the 1940s, Paul Hindemith's remarkable textbooks are still the outstanding works of their kind. In contrast to many musical textbooks written by academic musicians, these were produced by a man who could play every instrument of the orchestra, could compose a satisfying piece for almost every kind of ensemble, and who was one of the most stimulating teachers of his day. It is therefore not surprising that nearly forty years later these books should remain essential reading for the student and the professional musician.

Music Theory and Composition: A Practical Approach presents a pragmatic, accessible approach to music theory through an emphasis on melody and counterpoint. This focus explains the

“why” of musical construction more clearly than the traditional approach of beginning with chords. By starting with a single melodic line and gradually adding voices in counterpoint, the book drills part-writing while simultaneously explaining functionality, first with scale degrees and then with harmony. The text has students learn musical techniques and progressively build on their functions and importance to create their own compositions. With short, digestible chapters, Music Theory and Composition clearly presents otherwise complicated ideas not as strict rules, but as artistic ideals, encouraging the interactive creation of new compositions as a tool for learning. The textbook is versatile and easily customizable, suiting Different skill levels with species counterpoint providing a framework for the beginner while providing an interesting challenge for more experienced students Different curricular schedules with complete exercises in two, three, and four voices, allowing for an optional skip from two voices to four Different pedagogical approaches with species exercises encouraging students to consider harmonic choices and figured bass ensuring functional progressions Instructor Resources: Instructor’s Manual: The Instructor’s Manual includes sample syllabi and student handouts Test Bank: The test bank includes sample tests and answer keys in MS Word format. Which do you write first, the music or the lyrics? How can you give a song a country sound? How can you make your lyrics "sing?" What is the simplest way to protect a copyright? Song Writing answers these and other questions on the art of musical composition. Musical examples throughout.

Song Writing Schott Music

"Music Composition 1" is the first book in a two book series by award-winning composer, Jonathan Peters, which explains how music is formed and how to compose your own music. Book 1 covers the study of rhythmic and melodic composition, while book 2 covers harmonic composition and compositional form. Each

lesson covers a particular concept (or related concepts). Concepts and compositional techniques are demonstrated throughout the course with real musical examples (pictures and on-line audio samples). Each lesson also contains memory questions, access to on-line quizzes, listening assignments, and transcription/composition assignments. Memory questions serve to summarize and reinforce key concepts learned, while the quizzes test the students' knowledge and understanding of the material from each lesson. Students who take this course will get practice transcribing music (hearing a rhythm or a melody and writing it down) and also learn how to use music notation software. In the composition assignments students will get real life practice using the information and techniques learned in each lesson to write their own rhythms and melodies.

WHAT ARE THE REQUIREMENTS FOR THIS COURSE? To receive free life-time access to the on-line audio samples and quizzes you must have a computer with internet connection, screen, and speakers. A basic knowledge of music theory: students who take this course should be able to read notes in treble and bass clef, understand note durations, meter, key, scales, flats, sharps, intervals (major, minor and perfect), chords (major and minor), chord inversions, tempo, dynamics, and articulations. If you do not already have a rudimentary understanding of music theory, it is recommended that you take a music theory course before this course. Some type

of music notation software. The notation software demonstrated in this course is the Finale NotePad software. NotePad is a very basic music notation program and has all the necessary functions for a beginning composition student. An important part of music composition is getting your music to paper, and so this course will also develop the students' ability to properly notate their music. This software not only prints professional looking sheet music, it also allows the student to hear their compositions as they are writing them. You can read more about NotePad and download it for FREE at: www.finalemusic.com/NotePad Although not a necessity, it is very beneficial that the student have some ability to play the piano (or other instrument).

WHAT AM I GOING TO GET OUT OF THIS COURSE? Includes free life-time access to on-line audio samples and quizzes for each lesson. By the end of the course you will be able to compose your own rhythms and melodies. You will also learn how to develop your rhythmic and melodic material through a wide variety of compositional techniques. You will get practice transcribing music (hearing rhythms and melodies and then writing them down in notation form). You will get practice notating music using basic music notation software.

WHO SHOULD TAKE THIS COURSE? Anyone who has always wanted to learn how to write music! Every student of music!

Beginning Composers/Songwriters

with previous knowledge or experience who want to brush up and hone their skills (and maybe learn some new techniques!) Although this course uses many examples from classical music, most of the information and compositional techniques learned in this course can be used by musicians of any genre (including rock, pop, and jazz). If you want to deepen your understanding of music, learn to write it!

Note: If at any point in this course you have music composition questions that you would like answered or if you would like to have each composition assignment reviewed and commented on, please contact the author at his web site <http://www.ComposerJonathanPeters.com> about receiving these services for a fee.

This book is intended to introduce concepts about music composition to band and orchestra students of all ages and engage them in actual creative composing projects. The National Core Arts Standards (2014) emphasize that students should be engaged in the "creative practices of imagination, investigation, construction, and reflection in multiple contexts." These lesson plans attempt to accomplish that challenge in the context of large group band and orchestra ensemble classes using composition activities and projects.
