THE RETURN OF

SORAHB? Legend has it that when Farsala most needs a warrior to lead it, Sorahb will be restored by the god Azura. That time has come. After a devastating loss to the army of the Hrum, Farsala has all but fallen. Only the walled city of Mazad and a few of the more uninhabitable regions remain free of Hrum rule, and they seem destined to fall as well. Farsala needs a champion now. Three young people are waging battle as best they can. Soraya, Jiaan, and Kavi, their lives decimated by the

Hrum, are each in a personal fight against their common enemy. Apart, their chances are slim, as none of them is Sorahb reborn. United, perhaps they can succeed. But only Time's Wheel can bring them together—if it turns the right way. If it doesn't, Farsala is surely doomed. In the sequel to the critically acclaimed *Fall of a Kingdom* (formerly titled *Flame*), the first book of the Farsala Trilogy, Hilari Bell draws readers deeper into the mythical land of Farsala and weaves an epic tale of destiny and danger.

## Leadership

An entertaining investigation into the biology and psychology of why we sacrifice for other people

Researchers are now applying the lens of science to study heroism for the first time. How do biology, upbringing, and outside influences intersect to produce altruistic and heroic behavior? And how can we encourage this behavior in corporations, classrooms, and individuals? Using dozens of fascinating real-life examples, Elizabeth Svoboda explains how our genes compel us to do good for others, how going through suffering is linked to altruism, and how acting heroic can greatly improve your mental health. She also

reveals the concrete things we can do to encourage our most heroic selves to step forward. It's a common misconception that heroes are heroic just because they're innately predisposed to be that way. Svoboda shows why it's not simply a matter of biological hardwiring and how anyone can be a hero if they're committed to developing their heroic potential.

[How to Use the Gopro  
Hero 4 Silver](#)

HarperCollins  
This remarkable and  
monumental book at  
last provides a

comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to

E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

Even the most unique and interesting characters will not engage readers if their journey—the plot—fails. In this book, bestselling author William Bernhardt reveals the secrets

that will keep readers riveted to the page. He explains the importance of matching character to plot and the key distinction between surprise and coincidence. Bernhardt discusses how to enrich your story by layering three levels of conflict and, in the final chapter, analyzes the primary plot structures that have delighted readers since the first story was told. The book also includes exercises designed to help writers apply these ideas to their own writing.
