Subterranean  
Press  
In The FRESH  
Classroom:  
Why Culturally  
Relevant  
Education  
Can't Wait!,

Dr. Stephanie  
Boyce shares  
personal  
stories to help  
educators  
unpack  
opportunities  
for applying  
culturally  
relevant  
education in  
their  
classrooms.  
She offers  
field-proven  
practical  
strategies and  
evidence-  
based theories  
that empower  
educators to  
more  
authentically  
engage and  
become

inclusive of ALL students in their classrooms. Dr. Boyce's FRESH approach represents a solution to an urgent call for innovation by instructional leaders seeking ways to meet the needs of an ever-diversifying student population. This book is a must-have for all educators looking to connect content with students' interests effectively in deep and meaningful ways.

Company  
Lakeland, the  
historical  
African  
American  
community of  
College Park,  
was formed  
around 1890  
on the  
doorstep of  
the Maryland  
Agricultural  
College, now  
the University  
of Maryland,  
in northern  
Prince  
George's  
County.  
Located less  
than 10 miles  
from

Washington, D.C., the community began when the area was largely rural and overwhelmingly populated by European Americans. Lakeland is one of several small, African American communities along the U.S. Route 1 corridor between Washington, D.C., and Laurel, Maryland. With Lakeland's central geographic location and easy access to train and trolley

transportation , it became a natural gathering place for African American social and recreational activities, and it thrived until its self-contained uniqueness was undermined by the federal government's urban renewal program and by societal change. The story of Lakeland is the tale of a community that was established and flourished in a segregated society and

developed its own institutions and traditions, including the area's only high school for African Americans, built in 1928. **Calendar for FY ...** Oxford University Press  
An epic, full-color visual journey through all scales of the universe In *The Zoomable Universe*, the award-winning astrobiologist Caleb Scharf and the acclaimed artist Ron Miller take us on an epic tour through all known

scales of reality, from the largest possible magnitude to the smallest. Drawing on cutting-edge science, they begin at the limits of the observable universe, a scale spanning  $10^{27}$  meters—about 93 billion light-years. And they end in the subatomic realm, at  $10^{-35}$  meters, where the fabric of space-time itself confounds all known rules of physics. In between are

galaxies, stars and planets, oceans and continents, plants and animals, microorganisms, atoms, and much, much more. Stops along the way—all enlivened by Scharf’s sparkling prose and his original insights into the nature of our universe—include the brilliant core of the Milky Way, the surface of a rogue planet, the back of an elephant, and a sea of jostling quarks. The

Zoomable Universe is packed with more than 100 original illustrations and infographics that will captivate readers of every age. It is a whimsical celebration of discovery, a testament to our astounding ability to see beyond our own vantage point and chart a course from the farthest reaches of the cosmos to its subatomic depths—in short, a must-have for the shelves of all

explorers. **Rocks** Arcadia Publishing Summarizes what science has learned about the universe as of the end of the twentieth century, and offers predictions about what may emerge in the near future. *Lakeland:* Simon and Schuster STAAR Connection Diagnostic Series Gr 7 Reading V2 Student EditionThe Zoomable UniverseMacmillan + ORM The Whole Shebang

STAAR  
 Connection  
 Diagnostic  
 Series Gr 7  
 Reading V2  
 Student  
 EditionThe  
 Zoomable  
 Universe  
 We think we  
 understand  
 the laws of  
 physics. We  
 think reality is  
 an immutable  
 monolith,  
 consistent  
 from one end  
 of the  
 universe to  
 the next. We  
 think the  
 square/cube  
 law has actual  
 relevance. We  
 think a lot of  
 things. It was  
 perhaps  
 inevitable that  
 some of them  
 would turn out  
 to be wrong.

When the  
 great  
 incursion  
 occurred, no  
 one was  
 prepared. How  
 could they  
 have been? Of  
 all the things  
 physicists had  
 predicted,  
 "the fabric of  
 reality might  
 rip open and  
 giant  
 monsters  
 could come  
 pouring  
 through" had  
 not made the  
 list. But  
 somehow, on  
 a fine morning  
 in May, that  
 was precisely  
 what  
 happened. For  
 sisters Susan  
 and Katharine  
 Black, the day  
 of the  
 incursion was

the day they  
 lost  
 everything.  
 Their home,  
 their parents,  
 their sense of  
 normalcy...an  
 d each other,  
 because when  
 the rift  
 opened, Susan  
 was on one  
 side and  
 Katharine was  
 on the other,  
 and each  
 sister was  
 stranded in a  
 separate form  
 of reality. For  
 Susan, it was  
 science and  
 study and the  
 struggle to  
 solve the  
 mystery of the  
 altered  
 physics inside  
 the zones  
 transformed  
 by the  
 incursion. For

Katharine, it was monsters and mayhem and the fight to stay alive in a world unlike the world of her birth. The world has changed. The laws of physics have changed. The girls have changed. And the one universal truth of all states of changed matter is that nothing can be completely restored to what it was originally, no matter how much you might wish it could be. Nothing goes back.
