ALEXANDER HUDSON

Evidence-Based Practice in Nursing & Healthcare Springer Nature

How can we use psychology and the behavioural sciences to aid law enforcement to better identify violent extremists? What can we learn from past attacks to ensure that our society is more prepared? How can societies deal with tension after these attacks? Violent extremists are evolving, constantly honing their strategies to out-manuever the 'good guys'. Faced with the quandary, challenges, and responsibilities of ensuring the safety of the society, practitioners and policymakers have to take decisive steps to respond and mitigate the impact of an attack. However, the daunting task of countering violent extremism is still plagued by the lack of basic understanding of the phenomenon. This book, *Learning from Violent Extremist Attacks: Behavioural Sciences Insights for Practitioners and Policymakers*, attempts to fill a gap in the extant literature by offering a behavioural sciences approach to integrate our understanding of the threat of violent extremism, with knowledge drawn from diverse fields, such as psychology, sociology, history, political science, technology, and communications to identify the lessons learned and provide scientifically defensible interventions and approaches for both the practitioners and policymakers.

Handbook of Astrobiology Harper Collins

Old-growth forests represent a lofty ideal as much as an ecosystem—an icon of unspoiled nature, ecological stability, and pristine habitat. These

iconic notions have actively altered the way society relates to old-growth forests, catalyzing major changes in policy and management. But how appropriate are those changes and how well do they really serve in reaching conservation goals? *Old Growth in a New World* untangles the complexities of the old growth concept and the parallel complexity of old-growth policy and management. It brings together more than two dozen contributors—ecologists, economists, sociologists, managers, historians, silviculturists, environmentalists, timber producers, and philosophers—to offer a broad suite of perspectives on changes that have occurred in the valuing and management of old-growth forests in the Pacific Northwest over the past thirty years. The book • introduces the issues and history of old-growth values and conservation in the Pacific Northwest; • explores old growth through the ideas of leading ecologists and social scientists; • addresses the implications for the future management of old-growth forests and considers how evolving science and social knowledge might be used to increase conservation effectiveness. By confronting the complexity of the old-growth concept and associated policy and management challenges, *Old Growth in a New World* encourages productive discussion on the future of old growth in the Pacific Northwest and offers options for more effective approaches to conserving forest biodiversity.

Public Will, Activism and Climate Change Kirkdale Press

Change the Way You Think about Leadership At the age of thirty-three, Dr. Albert Mohler became the youngest president in the 164-year history of Southern Baptist Theological Seminary. He was the driving force behind the school's transformation into a thriving institution with an international reputation characterized by a passionate conviction for truth. In the process he became one of the most important and prominent Christian voices in contemporary culture. What will it take to transform your leadership? Effective leaders need more than administrative skills and vision. They need to

be able to change the hearts and minds of those they lead. Leadership like this requires passionate beliefs that can stand up to pressure from without and within. In this updated edition Dr. Mohler has added a new introduction and conclusion based on an additional 10 years of leadership. He has also completely rewritten the chapter "The Digital Leader." The Conviction to Lead will crystallize your convictions while revolutionizing your thinking, your decision-making, your communication, and ultimately, those you lead. "Dr. Al Mohler has written a book that shakes us up and challenges our thinking. The Conviction to Lead is poised to become one of the all-time classic works on Christian leadership."--JIM DALY, President - Focus on the Family "Having rarely thought about leadership, I was hooked from the first chapter--to my complete surprise. This is a powerful book and gracefully written."--FRED BARNES, Executive Editor--The Weekly Standard

Two bestselling authors first met in a televised Caltech debate on "the future of God," one an articulate advocate for spirituality, the other a prominent physicist. This remarkable book is the product of that serendipitous encounter and the contentious—but respectful—clash of worldviews that grew along with their friendship. In *War of the Worldviews* these two great thinkers battle over the cosmos, evolution and life, the human brain, and God, probing the fundamental questions that define the human experience. How did the universe emerge? What is the nature of time? What is life? Did Darwin go wrong? What makes us human? What is the connection between mind and brain? Is God an illusion? This extraordinary book will fascinate millions of readers of science and spirituality alike, as well as anyone who has ever asked themselves, What does it mean that I am alive? *Paths to a Green World The Political Economy of the Global Environment* HarperCollins

Our Worldviews fully supports the new Grade 8 Social Studies program in Alberta. Using this resource allows teachers to confidently address 100% of the curriculum outcomes. To ensure Our Worldviews meets the needs of teachers and students in Alberta's classrooms, it has been extensively field tested - in over 50 classrooms across the province. With an accessible reading level and a variety of superb quality visuals, your students will enjoy using Our Worldviews. Key Features: Provides support for differentiated instruction, assessment, and literacy

Our Worldviews Academic Foundation

This volume brings together 19 original chapters, plus four substantive introductions, which collectively provide a unique examination of the issues of science, technology, and art in international relations. The overarching theme of the book links global politics with human interventions in the world: We cannot disconnect how humans act on the world through science, technology, and artistic endeavors from the engagements and practices that together constitute IR. There is science, technology, and even artistry in the conduct of war—and in the conduct of peace as well. Scholars and students of international relations are beginning to explore these connections, and the authors of the chapters in this volume from around the world are at the forefront.

Learning From Violent Extremist Attacks: Behavioural Sciences Insights For Practitioners And Policymakers Baker Books

The global debate over who should take action to address climate change is extremely precarious, as diametrically opposed perceptions of climate justice threaten the prospects for any long-term agreement. Poor nations fear limits on their efforts to grow economically and meet the needs of their own people, while powerful industrial nations, including the United States, refuse to curtail their own excesses unless developing countries make similar sacrifices. Meanwhile, although industrialized countries are responsible for 60 percent of the greenhouse gas emissions that contribute to climate change, developing countries suffer the "worst and first" effects of climate-related disasters, including droughts, floods, and storms, because of their geographical locations. In *A Climate of Injustice*, J. Timmons Roberts and Bradley Parks analyze the role that inequality between rich and poor nations plays in the negotiation of global climate agreements. Roberts and Parks argue that global inequality dampens cooperative efforts by reinforcing the "structuralist" worldviews and causal beliefs of many poor nations, eroding conditions of generalized trust, and promoting particularistic notions of "fair" solutions. They develop new measures of climate-related inequality, analyzing fatality and homelessness rates from hydrometeorological disasters, patterns of "emissions inequality," and participation in international environmental regimes. Until we recognize that reaching a North-South global climate pact requires addressing larger issues of inequality and striking a global bargain on environment and development, Roberts and Parks argue, the current policy gridlock will remain unresolved.

Choice Recommended Title, August 2019 Read an exclusive interview with Professor Vera Kolb [here](#). Astrobiology is the study of the origin, evolution, distribution, and future of life on Earth. This exciting and significant field of research also investigates the potential existence and search for extra-terrestrial life in the Solar System and beyond. This is the first handbook in this burgeoning and interdisciplinary field. Edited by Vera Kolb, a highly respected astrobiologist, this comprehensive resource captures the history and current state of the field. Rich in information and easy to use, it assumes basic knowledge and provides answers to questions from practitioners and specialists in the field, as well as providing key references for further study. Features: Fills an important gap in the market, providing a comprehensive overview of the field Edited by an authority in the subject, with chapters written by experts in the many diverse areas that comprise astrobiology Contains in-depth and broad coverage of an exciting field that will only grow in importance in the decades ahead

Joyful Resilience as Educational Practice Harmony

This new resource from Oxford University Press introduces students to the development of Canada through the varied and rich perspectives of the

Aboriginal, British, Francophone, and other groups. It also introduces students, in language they will understand, to active and responsible citizenship at the local, provincial, national and global levels. Components include Student Text, CD-ROM, Teacher's Resource, and Website.

Islam and Sustainable Development Routledge

WINNER OF THE 2022 ECPA CHRISTIAN BOOK AWARD FOR NEW AUTHOR Healthy relationships across cultures are possible. Dr. Michelle Reyes takes a close look at the concept of cultural accommodation found in Scripture—and especially in the letter of 1 Corinthians—to redefine how Christians interact with cultural narratives that are different from their own. Christians—whose standard of living is oneness in Christ, whose gospel is radically nonexclusive—should be at the frontlines of justice and of cross-cultural unity. But many of us struggle to reach outside of our own cultural bubbles and form real relationships that move beyond stereotypes and lead to understanding, healing, and solidarity across cultural lines. Why is that? Why is it so difficult to reconcile our call to be united in Christ with a celebration of different cultural expressions? What are the reasons for cultural differences and how do they so often lead to stereotyping, appropriation, gentrification, racism, and other forms of injustice? What does the Bible say about human beings as cultural image bearers? How do we reevaluate our awareness of culture identity in a healthy and constructive way? These are just some of the questions that Dr. Reyes explores as she faces the challenges surrounding cross-cultural relationships in America today and her thoughts on the way forward. Spoiler Alert! The way forward does require willingness to change. It requires embracing cultural discomfort. But by engaging with this book, you will be empowered to learn how to become all things to all people—that is: how to reflect Jesus' love in a multicultural, multiracial body of Christ and to share that love with a hurting world.

[Transforming Psychological Worldviews to Confront Climate Change](#) Createspace Independent Publishing Platform

Explains why the environmental crisis should lead to an abandonment of "free market" ideologies and current political systems, arguing that a massive reduction of greenhouse emissions may offer a best chance for correcting problems.

What's Your Worldview? MIT Press

In *Islam and Sustainable Development*, Odeh Al-Jayyousi addresses the social, human and economic dimensions of sustainability from an Islamic perspective. Islam is sometimes viewed as a challenge, threat and risk to the West, but here we are reminded that the celebration of cultural diversity is a key component in Islamic values. Promoting common understanding between East and West, this American-educated, Middle Eastern-based author offers something broader and deeper than conventional Western ways of thinking about sustainability and presents new insights inspired by Islamic worldviews. Drawing on his roles as both academic researcher and senior development practitioner, Professor Al-Jayyousi applies his deep understanding of Islamic values to contemporary environmental, financial and social conflicts and crises and defines a framework for sustainability embracing local, regional and global perspectives. He also addresses how education might produce innovation, knowledge creation and development to support a new paradigm for sustainability that re-defines what constitutes good life, beyond consumerism and the production of waste. This book will interest policy makers, development and donor communities, funding agencies and banks in the Islamic World and beyond, as well as those with a professional interest in planning and in environmental and conservation issues. Scholars of Islamic and Middle Eastern studies and more broadly, those with an academic interest in cultural and religious studies, will find that this book in Gower's Transformation and Innovation Series is perhaps the most substantial work yet on sustainable development from an Islamic perspective.

The Universe Next Door (Large Print 16pt) Zondervan

Why do we buy what we buy, vote the way we vote, eat what we eat and say what we say? Why do we have the friends we have, and work and play as we do? It's our choice? Yes, but there are forces, often unseen, that shape every decision we make and every action we take. These hidden, life-shaping values and ideas are not promoted through organized religions or rival philosophies but fostered by cultural habits, lifestyles and the institutional structures of society. Steve Wilkens and Mark Sanford shine a spotlight on the profound challenges to Christianity and faithful Christian living that come from worldviews that comprise the cultural soup we swim in. The authors show how to detect the individualism, consumerism, nationalism, moral relativism, scientific naturalism, New Age thinking, postmodern tribalism and salvation as therapy that fly under our radar. Building on the work of worldview thinkers like James Sire, this book helps those committed to the gospel story recognize those rival cultural stories that compete for our hearts and minds.

[Worldviews](#) Baker Academic

"A must-read for every concerned American—and especially for every Christian who weeps at the graveside of his culture." --R.C. Sproul A cataclysmic change has occurred as our culture has shifted toward belief in "Oneism." Every religion and philosophy fits into one of two basic worldviews: "Oneism" asserts that everything is essentially one, while "Twoism" affirms an irreducible distinction between creation and Creator. The Other Worldview exposes the pagan roots of Oneism, traces its spread throughout Western culture, and demonstrates its inability to save. "For bodily holiness and transformed thinking . . . we depend entirely on one amazing thing: the incredibly powerful message of the Gospel to a sinful world, which is the ultimate expression and goal of Twoism. The only hope is in Christ alone."

[Five Worldviews](#) ReadHowYouWant.com

For more than thirty years, *The Universe Next Door* has set the standard for a clear, readable introduction to worldviews. In this new fifth edition James Sire offers additional student-friendly features to his concise, easily understood introductions to theism, deism, naturalism, Marxism, nihilism, existentialism, Eastern monism, New Age philosophy and postmodernism. Included in this expanded format are a new chapter on Islam and informative sidebars throughout. The book continues to build on Sire's refined definition of worldviews from the fourth edition and includes other updates as well, keeping this standard text fresh and useful. In a world of ever-increasing diversity, *The Universe Next Door* offers a unique resource for understanding the variety of worldviews that compete with Christianity for the allegiance of minds and hearts. *The Universe Next Door* has been translated into over a dozen languages and has been used as a text at over one hundred colleges and universities in courses ranging from apologetics and world religions to history and English literature. Sire's *Naming the Elephant: Worldview as a Concept* provides a useful companion volume for those desiring a more in-depth discussion of the nature of a worldview.

Becoming All Things World Scientific

Teaching is hard work. Teaching is rewarding work. An abundance of research on teachers' mental health, teacher burnout, and attrition in the profession has proven the truth of the first claim. And, without reading a word of academic research, teachers know the truth of the second: there are numerous challenges and complexities involved in this noble profession. Teachers also know the truth of our second claim—that teaching is immensely rewarding work. The editors and authors of *Joyful Resilience as Educational Practice: Transforming Teaching Challenges into Opportunities* argue that the reciprocities of teaching keep them and countless other teachers in the profession. While teaching is one of the most demanding professions on earth, it is also one of the most rewarding professions. Editors Michelle C. Hughes and Ken Badley hope readers and teaching colleagues alike will be reminded of the rewards and the unexpected paybacks found in teaching. *Joyful Resilience as Educational Practice* is offered as a love letter, a "hang-in-there, you've got this" message to teacher colleagues everywhere. May readers be reminded that teaching is a calling. The editors invite readers to wrestle with, take courage, and find joyful resilience in the professional challenges named in this book.
