Witnesses to History Nelson Thornes
 Did the Thatcher years and their aftermath constitute a revolution or a restoration in education. Do they represent a departure from, or a reinforcement of tradition?
Contemporary Debates in Education is a thought-provoking volume which reviews the reforms of the eighties and early nineties, then follow this with an examination of the long-standing issues in education over the last century in order to relate current reforms and changes to their broader historical background, so that those with a general or professional interest in education can better understand the process in which they are involved.
[Indigenous Knowledges in Global Contexts](#)

Heinemann
 This well-established series, the most popular in Nigeria, has been fully revised to reflect recent developments in mathematics education at junior secondary level and the views of the many users of the books. It has especially been revised to fully cover the requirements of the new NERDC Universal Basic Education Curriculum.
[Issues in Geography Teaching](#) The Rosen Publishing Group, Inc
 From putative 'success stories' such as Ghana and Rwanda to failed efforts in Zimbabwe and other countries, this volume brings together seven incisive case studies from diverse contexts including post-war Sierra Leone, Uganda, and the new nation of South Sudan to distil insights into the troubled progress of reform across the African continent.
A History of Zimbabwe Hodder Murray

This study sheds light on the current state of history education in Africa and reflects on its potential to prepare this continent's learners for the challenges of "learning to live together". Drawing on an examination of school curricula and the experiences of educational stakeholders, it identifies trends in the processes and outcomes of recent curricular revisions, and discerns key challenges relating to the teaching and learning of history across Africa. It scrutinises the place afforded to history within African education systems, and surveys related contents and pedagogies. While it identifies African history as a fundamental yet sensitive and controversial subject, it also illustrates examples of present-day curricular strategies to integrating a concern for promoting a "culture of peace".
Contemporary Debates in Education
 UNESCO

This book examines the history of southern Africa, including an overview of each of the countries that comprise that area of the continent.

IGCSE Geography African Minds

This Compendium gives an outline of the historical, philosophical and ethical aspects of the return of cultural objects (e.g. cultural objects displaced during war or in colonial contexts), cites past and present cases (Maya Temple Facade, Nigerian Bronzes, United States of America v. Schultz, Parthenon Marbles and many more) and analyses legal issues (bona fide, relevant UNESCO and UNIDROIT Conventions, Supreme Court Decisions, procedure for requests etc.). It is a landmark publication that bears testament to the ways in which peoples have lost their entire cultural heritage and analyses the issue of its return and restitution by providing a wide range of perspectives on this subject. Essential reading for students, specialists, scholars and decision-makers as well as those interested in these topics.

Climate Change in Zimbabwe Springer Science & Business Media

On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report *The State of the World's Children* to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.

Indigenous knowledges are the commonsense ideas and cultural knowledges of local peoples concerning the everyday realities of living. This collection of essays discusses indigenous knowledges and their implication for academic decolonization.

Ventures Routledge

There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities

of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

National Democratic Reforms in Africa UNESCO Publishing

The first single-volume history of Zimbabwe with detailed coverage from pre-colonial times to the present, this book examines Zimbabwe's pre-colonial, colonial and postcolonial social, economic and political history and relates historical factors and trends to recent developments in the country. Zimbabwe is a country with a rich history, dating from the early San hunter-gatherer societies. The arrival of British imperial rule in 1890 impacted the country tremendously, as the European rulers exploited Zimbabwe's resources, giving rise to a movement of African nationalism and demands for independence. This culminated in the armed conflict of the 1960s and 1970s and independence in 1980. The 1990s were marked by economic decline and the rise of opposition politics. In 1999, Mugabe embarked on a violent land reform program that plunged the nation's economy into a downward spiral, with political violence and human rights violations making Zimbabwe an international pariah state. This book will be useful to those studying Zimbabwean history and those unfamiliar with the country's past.

The Poverty of Nations University of Toronto Press

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative

education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe

Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education-how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

Harare North Springer

This student-friendly introduction to the field focuses on understanding social and practical problems and developing intervention strategies to address them. Offering a balance of theory, research, and application, the updated Third Edition includes the latest research, as well as new, detailed examples of qualitative research throughout.

Obi Okenkwo, a Nigerian country boy, is determined to make it in the city.

Best Sellers - Books :

Educated in England, he has new, refined tastes which eventually conflict with his good resolutions and lead to his downfall.

Random House

A key resource for the IGCSE Geography specification, written by leading and experienced Geography teachers and authors. This book has been carefully prepared to cover the full curriculum for the University of Cambridge International Examinations IGCSE course in Geography. It is accompanied by a CD-ROM offering invaluable study and revision support.

[The Global Coal Market](#) Longman

When he lands in Harare North, our unnamed protagonist carries nothing but a cardboard suitcase full of memories and a longing to be reunited with his childhood friend, Shingi. He ends up in Shingi's Brixton squat where the inhabitants function at various levels of desperation. Shingi struggles to find meaningful work and to meet the demands of his family back home; Tsitsi makes a living renting her baby out to women defrauding the Social Services. As our narrator struggles to make his way in 'Harare North', negotiating life outside the legal economy and battling with the weight of what he has left behind in strife-torn Zimbabwe, every expectation and preconception is turned on its head. This is the story of a stranger in a strange land - one of the thousands of illegal immigrants seeking a better life in England - with a past he is determined to hide.

Cambridge International A and AS Level Geography UNICEF

Coal has been the world's fastest-growing energy source in absolute terms for over a decade. Coal also emits more CO₂ than any other fossil fuel and contributes to serious air pollution problems in many regions of the world. If we hope to satisfy the demand for affordable energy in emerging economies while protecting the environment we need to develop a keen understanding of the market that supplies coal. This book offers an in-depth analysis of the key producers and consumers that will most influence coal production, transport, and use in the future. By exploring how countries such as China, India, Indonesia, Australia, and South Africa have developed their respective coal industries - and how these industries link together through the international coal trade - experts shed light on how the global coal market may evolve, and the economic and environmental implications. This book is the most comprehensive treatment of these topics to date and will appeal to a wide readership, including scholars and practitioners working on energy economics and policy.

[Implementing Deeper Learning and 21st Century Education Reforms](#) Philip Allan

Issues in Geography Teaching examines a wide range of issues which are of interest to those teaching geography from the early years through to higher education, including: the role of research and the use of ICT in teacher training; the significance of developing critical thinking skills; broader educational issues such as citizenship and development; the importance of environmental education; the position and role of assessment; the present state and status of geographical education and issues that are likely to be of concern in the future. Issues in Geography Teaching details the contexts, presents the facts and raises thought-provoking questions which should stimulate further interest and discussion.
