Mapping the Airways  
Rowman & Littlefield  
An exploration of the  
cutting-edge  
technology that will

enable us to confront  
the realities of climate  
change. For decades  
scientists and  
environmentalists have  
sounded the alarm  
about the effects of  
global warming. We  
are now past the  
tipping point. As floods,  
storms, and extreme

temperatures become our daily reality, "Reduce, Reuse, Recycle" efforts aren't enough anymore. In *Hacking Planet Earth*, New York Times bestselling author Thomas Kostigen takes readers to the frontlines of geoengineering projects that scientists, entrepreneurs, engineers, and other visionaries around the world are developing to solve the problems associated with climate change. From giant parasols hovering above the Earth to shield us from an unforgiving sun, to lasers shooting up into clouds to coax out much-needed water, Kostigen introduces readers to this inspiring work and the people who are spearheading it. These

futurist, far-thinking, world-changing ideas will save us, and *Hacking Planet Earth* offers readers their new vision for the future.

 Brepols Publishers  
 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk

management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

National Geographic Books

An overview of the best Mediterranean sights to help you plan your visit, whether

you're traveling by cruise ship, car, or train.

### National Geographic Books

The National Geographic Traveler guidebooks are in tune with the growing trend toward experiential travel. Each book provides inspiring photography, insider tips, and expert advice for a more authentic, enriching experience of the destination. These books serve a readership of active, discerning travelers, and supply information, historical context, and cultural interpretation not available on the Internet. Italy offers a perfect combination of art, culture, monuments, food, fashion, shopping and fun. The natural landscapes are unique

in their variety and completely harmonized with human activity.

This book takes its readers on a journey through the peninsula, in the company of one of the best-known Italian tourist guides. There are practical tips on organizing a tour, descriptions of the history and the culture of Italy, its art and artisan movements, and of course, the cuisine. The chapters of the guide will provide the traveler with a well-structured, untrammelled guide to the beauties of Italy, starting with the legendary capital Rome, and followed by the regional attractions. Come with us as we visit Lombardy and its lakes, view the splendors of Venice, and travel from Emilia

Romagna to the "regions of the monasteries" in the Apennines and on to the gems of southern Italy--the islands of Sicily and Sardinia. Every aspect of Italian life is dealt with in the numerous information boxes that describe a wide range of activities for tourists seeking unforgettable experiences. Follow in the steps of the Grand Tour; take part in the Palio di Siena, explore the trulli in Puglia; walk through medieval Rome; enjoy a truffle tasting; explore the Chianti vineyards by car...
