The volume LNAI 12872 constitutes the proceedings of the International Joint Conference on Rough Sets, IJCRS 2021, Bratislava, Slovak Republic, in September 2021. The conference was held as a hybrid event due to the COVID-19 pandemic. The 13 full paper and 7 short papers presented were carefully reviewed and selected from 26 submissions, along with 5 invited papers. The papers are grouped in the following topical sections: core rough set models and methods, related methods and hybridization, and areas of applications.

Soil Moisture Measurement with the Neutron Method Springer

This book covers all aspects of the specialized field of gerontorheumatology, providing a complete overview of rheumatic and musculoskeletal diseases and related conditions in the elderly. The emphasis is particularly on pathogenesis, diagnosis, prevention, and treatment, including the latest advances in biological and pharmacological therapy and potential treatment side effects. The book will provide the reader with a keen awareness of the characteristic features, distinctive etiologies, and different courses of the various disorders of the musculoskeletal system in the geriatric population. Diagnostic and treatment considerations of special relevance in daily practice are highlighted, and the importance of comorbidities and their rheumatic consequences is also emphasized. The book will be of value for gerontologists, rheumatologists, internists, and rehabilitation

physicians and will offer excellent guidance for general practitioners, who are typically the first to deal with disorders of the musculoskeletal system in elderly patients.

Identifying contaminants and their properties, including receptor sensitivity, the book describes the toxicology of environmental pollutants, particularly pesticides. Covering pollution of fresh waterways, estuarine bodies, and finished and potable waters, it shows you the sources of these various forms of pollution, along with possible effects and solutions.

This book is intended to present the state of the art in research on machine learning and big data analytics. The accepted chapters covered many themes including artificial intelligence and data mining applications, machine learning and applications, deep learning technology for big data analytics, and modeling, simulation, and security with big data. It is a valuable resource for researchers in the area of big data analytics and its applications.

The LNCS journal Transactions on Large-scale Data and Knowledge-centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing (e.g. computing resources, services, metadata, data sources)

across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability. This, the 53rd issue of Transactions on Large-scale Data and Knowledge-centered Systems, contains six fully revised selected regular papers. Topics covered include time series management from edge to cloud, segmentation for time series representation, similarity research, semantic similarity in a taxonomy, linked data semantic distance, linguistics-informed natural language processing, graph neural network, protected features, imbalanced data, causal consistency in distributed databases, actor model, and elastic horizontal scalability.

Colloquial Breton: The Complete Course for Beginners has been carefully developed by an experienced teacher to provide a step-by-step course to Breton as it is written and spoken today. Combining a clear, practical and accessible style with a methodical and thorough treatment of the language, it equips learners with the essential skills needed to communicate confidently and effectively in Breton in a broad range of situations. No prior knowledge of the language is required. Colloquial Breton is exceptional; each unit presents a wealth of grammatical points that are reinforced with a wide range of exercises for regular practice. A full answer key, a grammar summary, bilingual glossaries and English translations of dialogues can be found at the back as well as useful vocabulary lists throughout. Key features include: A clear, user-friendly format designed to help learners progressively build up their speaking, listening, reading and writing skills Jargon-free, succinct and clearly structured explanations of grammar An extensive range of focused and dynamic supportive exercises Realistic and entertaining dialogues covering a broad variety of narrative situations Helpful cultural points An overview of the sounds of Breton Balanced, comprehensive and rewarding, Colloquial Breton is an indispensable resource both for independent learners and students taking courses in Breton. Audio material to accompany the course is available to download free in MP3 format from www.routledge.com/cw/colloquials. Recorded by native speakers, the audio material features the dialogues and texts from the book and will help develop your listening and pronunciation skills.

The concept of 'Ruakh Ra'ah' (Evil Spirit), is extremely rare in the Tanach, but is found much more frequently in post-Biblical rabbinic literature and even more in publications by rabbis of the last two centuries. This study focuses on the quite neglected period of responsa literature after the Second World War until the present. This literature consist fo answers given to questions about religious rules. The notion of the 'evil spirit' is strongly connected to the ritual of washing hands in the morning, but also before a meal, in connection with sexual relations and with visiting a graveyard. The washing of hands is supposed to be necessary to ward off bad influences. This ritual can be understood in between mysticism, gender studies, magic and embodied religion. This book analyses the meaning and role of the 'Ruakh Ra'ah' in a corpus of almost 200 rabbinic orthodox response from 1945-2000. What happens to the term Ruakh Ra'ah in these modern responsa? Does the ritual persist without being associated with the Ruakh Ra'ah, or does the term continue to be linked to the ritual, but reinterpreted in cause of the possible tension between the traditional rabbinic paradigm and the modern scientific knowledge paradigm. The connection between this ritual and the stratification of the (ultra) orthodox society and cosmological representations offers a clue to the rationale of this practice. Questions of identity, gender and community boundaries that divide insiders from outsiders (Jewish and non-Jewish) seem to be related to the discourse in the corpus on this ritual. As the Ruakh Ra'ah stands at the intersection between magical perceptions, religion (ritual), and premodern science (medicine) it is suitable as a possible test case for the way in which modern rabbinic responsa deal with other archaic terms and concepts that are related or comparable to the Ruakh Raah. This book is relevant to the debate on the relation of religion to the modern world as it provides insights into the ways contemporary believers deal with the modern world, and the various mechanisms to deal with potential discrepancies.

This atlas is the first reference covering exclusively all aspects of sciatic pain. It is designed to serve as a brief and easy-to-comprehend review of the knowledge of spinal sciatica, with emphasis on classification, epidemiology, clinical presentations, neuroimaging, and treatment options. Sections on extraspinal sciatica and differential diagnosis of this multifaceted topic are also included. This atlas delivers more information in less space than traditional texts, allowing for a quick review of the essential facts of this clinical entity through plentiful images and tables. Pertinent imaging is combined with intraoperative photographs and hand-drawn illustrations to help readers visualize variable presentations and enhance their management. The comprehensive content of this richly-illustrated book covers different etiologies of sciatic pain seen in spinal, neurosurgical, neurologic, rheumatologic and emergency practices, divided into five thematic sections. After general considerations about sciatica and their differential diagnosis, the second section focuses on lumbosacral discogenic sciatica. The third section includes spinal non-discogenic sciatica. The fourth section focuses on extraspinal intrapelvic sciatica, and the fifth provides a description of the most important etiologies of extraspinal extrapelvic sciatica. Comprehensive and unique, Atlas of Sciatica is an excellent pictorial resource for neurosurgeons, spinal surgeons, neurologists, rheumatologists, and many other clinicians worldwide. It is a "one of a kind" book that stands head and shoulders above any other book on this subject (from the foreword of Professor Edward C. Benzel, MD, Founder of the World Spinal Column Society).

Psoriatic arthritis, or PsA, is now acknowledged the second most prevalent and important inflammatory arthropathy worldwide. The addition of this new textbook on PsA is a fitting and important inclusion to the Oxford Textbooks in Rheumatology series, written to reflect the significant advances in the field in recent years. With the recent advances in the understanding of pathogenesis, and the development of novel therapies, the Oxford Textbook of Psoriatic Arthritis provides a comprehensive overview of the disease. Each chapter is written by leading clinicians and scientists in the field of psoriatic arthritis, to provide a contemporary view of PsA, and a look into the future directions of research. Covering everything from epidemiology and diagnosis to genetics and pathology, detailed sections on treatment and outcomes provide an invaluable resource for the clinician.

The book is also highly illustrated with both clinical images such as x-rays and histological photographs to aid clinical knowledge, and diagrams of the immunology and genetics that underlie the disease. Practical and all-inclusive, with summary boxes to distil the most important information, the Oxford Textbook of Psoriatic Arthritis will prove an invaluable resource for rheumatologists, dermatologists, trainees, and all members of the multidisciplinary team who are interested in recent advances in PsA.

This unique book provides a multidisciplinary review of current, climate-change research projects at universities around the globe, offering perspectives from all of the natural and social sciences. Numerous universities worldwide pursue state-of-the-art research on climate change, focussing on mitigation of its effects as well as human adaptation to it. However, the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC) (COP 21)" demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision-making on climate change. To date, few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaption studies. As a result the published literature has also lacked a broad perspective. This book fills that gap and is of interest to all researchers and policy-makers concerned with global climate change regardless of their area of expertise.

The Life-Course of Serious and Violent Youth Grown Up addresses significant gaps in the literature on youth involved in chronic, serious, and violent offending. Through longitudinal research and a long follow-up into adulthood, it challenges common perceptions about offending outcomes. Using theoretically grounded, methodologically sophisticated and empirically driven research, this book culminates 20 years of data emerging from the Incarcerated Serious and Violent Young Offender Study (ISVYOS). Initiated in 1998 to understand the origins of serious and violent youth offending, it follows 1,719 formerly incarcerated youth through adulthood and offers a contemporary perspective to questions about chronic offending in adolescence and social and offending outcomes in adulthood. The authors provide a theoretically framed examination of new findings from the ISVYOS regarding participants' justice system involvement, from onset to persistence to desistance. Most participants experienced continued involvement in the justice system in adulthood. However, contrary to past literature, ISVYOS findings challenge static descriptions of chronic offending and notions of the youth "super predator". ISVYOS findings also challenge assertions that experiences and risk factors in childhood and adolescence are not informative of adult justice system involvement. Together, the findings call for a more humanistic approach that recognizes that the complex lives of individuals formerly incarcerated in adolescence implies that desistance does not happen by default. This book will be of great interest to scholars, researchers, and students of forensic psychology, developmental and life course criminology, youth justice, and violent crime.

In this book, well-known scientists discuss modern aspects of generalized continua, in order to better understand modern materials and advanced structures. They possess complicated internal structure, and it requires the development of new approaches to model such structures and new effects caused by it. This book combines fundamental contributions in honor of Victor Eremeyev and his 60th birthday.

The most-trusted resource for physiatry knowledge and techniques, Braddom's Physical Medicine and Rehabilitation remains an essential guide for the entire rehabilitation team. With proven science and comprehensive guidance, this medical reference book addresses a range of topics to offer every patient maximum pain relief and optimal return to function. In-depth coverage of the indications for and limitations of axial and peripheral joints through therapies enables mastery of these techniques. Optimize the use of ultrasound in diagnosis and treatment. A chapter covering PM&R in the international community serves to broaden your perspective in the field. Detailed illustrations allow you to gain a clear visual understanding of important concepts. New lead editor - Dr. David Cifu - was selected by Dr. Randall Braddom to retain a consistent and readable format. Additional new authors and editors provide a fresh perspective to this edition. Features comprehensive coverage of the treatment of concussions and military amputees. Includes brand-new information on rehabilitating wounded military personnel, the latest injection techniques, speech/swallowing disorders, head injury rehabilitation, and the rehabilitation of chronic diseases. New chapters on pelvic floor disorders and sensory impairments keep you at the forefront of the field. Reader-friendly design features an updated table of contents and improved chapter approach for an enhanced user experience. Expert Consult eBook version included with purchase. This enhanced eBook experience gives access to the text, figures, over 2,500 references, 51 videos, and 750 self-assessment questions on a variety of devices.
