**The Book of Old Silver:  
English, American,  
Foreign** UJ Press

A model for cultural  
activism and pedagogy  
through art and  
community engagement  
*A Scientific Bibliography  
of the Drakensberg, Maloti  
and Adjacent Lowlands*  
Springer Nature

3264, the mathematical  
solution to a question  
concerning geometric  
figures.

**ICoSHIP 2023** CRC Press  
In Search of Lost Futures  
asks how imaginations  
might be activated  
through practices of  
autoethnography,  
multimodality, and deep  
interdisciplinarity—each  
of which has the power to  
break down  
methodological silos,  
cultivate novel research

sensibilities, and inspire  
researchers to question  
what is known about  
ethnographic process,  
representation, reflexivity,  
audience, and  
intervention within and  
beyond the academy. By  
blurring the boundaries  
between the past,  
present, and future;  
between absence and  
presence; between the  
possible and the  
impossible; and between  
fantasy and reality, In

Search of Lost Futures pushes the boundaries of ethnographic engagement. It reveals how researchers on the cutting edge of the discipline are studying absence and grief and employing street performance, museum exhibit, anticipation, or simulated reality to research and intervene in the possible, the impossible, and the uncertain.

Lifestyle Medicine, Third Edition African Books Collective

This volume provides

state-of-the-art information on soil-water interactions in wastewater systems, characterization of wastewater, modes of treatment, safety of wastewater use, water conservation technologies involved in recycling of sewage in fish culture, biogeochemical cycling bacteria and nutrient dynamics, ecosystem resilient driven wastewater reclamation, bioremediation, aquaponics, ecological integrity, culture practices of fish farming, microbial food web phenomena, fish

diseases, environmental economics of wastewater, environmental risk assessment, environmental law and regulations. Given its breadth of coverage, the book will be useful to researchers, teachers, students, administrators, planners, farmers and entrepreneurs interested in the profitable use of wastewater in the wastes-into-wealth framework of for the benefit of humanity, and in achieving the targets for sanitation and safe wastewater reuse by

2030, specified in the United Nations' Sustainable Development Goals. Concerns are growing about the quality and quantity of fresh water, as severe crises are expected in the near future. Climate change has further worsened the strain on inland water resources, with its major impacts on ecosystems and human life. It is most urgent to protect and conserve inland water resources to maintain vital ecosystem functions. Despite the immense nutrient potentials of

wastewater in terms of phosphorus, nitrogen and potassium and increasingly high rates of urbanization-based wastewater generation, wastewater has traditionally been overlooked as a resource. This produces a threefold loss - environmental degradation, monetary losses from fertilizers, and water. As a result, municipal wastewater offers a win-win strategy for water conservation and environmental protection, while also turning waste into wealth

in the form of fish biomass and allied cash crops. Wastewater-fed aquaculture refers to a unique, integrated biosystem in which the wastes generated by the first system are used by the next subsystem. In wastewater-fed aquaculture biosystems, the organic wastes are recycled into fish biomass mediated through a complex microbial/autotrophic/heterotrophic food web mechanism.

**How to Survive Family Holidays** Newmarket

Press

This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon

became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons

they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

**The Oldest Music Room in Europe** Wydawnictwo Temida 2

This book offers a nuanced understanding of how two different theories of leadership can be applied to achieve better results within schools. These leadership theories – Instructional Leadership and Leadership for Learning – have assisted our recent understanding of school leadership. This book interrogates the theories themselves as well as their impact on education systems around the world. It also looks at

how they can be practically applied to educate school leaders within their schools and beyond, building partnerships with families, schools and other community agencies serving students. In doing so, the book considers the possibility that these theories are not opposed, but two sides of the same coin. Both are underpinned by the question ‘how do we provide the best educational experience for students?’. The answer to this question will

determine the way leaders go about the task of leading schools. This important book will be of interest and value to students and scholars of educational leadership, as well as educational leaders themselves.

**Management of Cardiac Arrhythmias**

University of Michigan Press

This book aims to examine multiple literary texts and works by applying various cultural and literary theories & criticism. The application of these theories helps in

deciphering novel meanings and understanding of the textual elements. The book encompasses texts and articles from the literary canon as well as contemporary literature from around the world which offer a broader perspective on the interaction between various socio-cultural elements that shape literary works. It aims to understand the formation of new meanings and paradigms that emerge out these literary analyses and reviews. This book is

a great resource for all the students, academicians and critics who are looking for recent perspectives on different literary texts and works. *De Sphaera of Johannes de Sacrobosco in the Early Modern Period* Springer Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene studies the interplay of environmental perception and the way societies throughout history have imagined the future state of “nature” and the environments in which coming generations

would live. What sorts of knowledge were and are involved in outlining future environments? What kinds of texts and narrative strategies were and are developed and modified over time? How did and do scenarios and narratives of the past shape (hi)stories of the future? This book answers these questions from a diachronic as well as a cross-cultural perspective. By looking at a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and

allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives, the contributors illustrate the multifaceted character of environmental anticipation across the ages.

This work is an exploration of online learning in an

undergraduate English language and academic literacy classroom at a university in South Africa, and theorises the need for technology in developing countries as a means of social inclusion.

*Climate Change in Poland*  
John Wiley & Sons

This book is about the invisible or subtle nature of food and farming, and also about the nature of existence. Everything that we know (and do not know) about the physical world has a subtle counterpart which has been scarcely considered

in modernist farming practice and research. If you think this book isn't for you, if it appears more important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties, then think again. For it could be precisely this worldview – the one that prioritises the physical-material dimension of reality – that helped get us into this situation in the first place. Perhaps we need a different worldview to get us out? This book makes a

foundational contribution to the discipline of Subtle Agroecologies, a nexus of indigenous epistemologies, multidisciplinary advances in wave-based and ethereal studies, and the science of sustainable agriculture. Not a farming system in itself, Subtle Agroecologies superimposes a non-material dimension upon existing, materially-based agroecological farming systems. Bringing together 43 authors from 12 countries and five continents, from the

natural and social sciences as well as the arts and humanities, this multi-contributed book introduces the discipline, explaining its relevance and potential contribution to the field of Agroecology. Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture, and to do this through adapting and innovating with research methods, in particular with those of a more embodied nature,

with the overall purpose of bringing and maintaining balance and harmony. Such research is an open-minded inquiry, its grounding being the lived experiences of humans working on, and with, the land over several thousand years to the present. By reclaiming and reinterpreting the perennial relationship between humans and nature, the implications would revolutionise agriculture, heralding a new wave of more sustainable farming techniques, changing our

whole relationship with nature to one of real collaboration rather than control, and ultimately transforming ourselves. Artificial Intelligence Techniques for Satellite Image Analysis Peter Lang Sadly, the same cannot be said about scholarly publishing which to all intents and purposes continues to remain the flotsam and jetsam of the African publishing landscape. -- *Australian Big Cats* AFRICAN SUN MeDIA This edited book provides a comprehensive

overview of the past, present and future climate development in Poland. The book consists of three main parts. The first part presents the results of the study of climate change before instrumental measurements in Poland in the last millennium. The second part analyses the long-term changes and variability of 36 climate characteristics for 14 climate elements, indices, meteorological phenomena and weather types using data from 79 weather stations in the

base period 1951–2018 and for long series up to 239 years (1780–2018). The particular attention is paid to climate extremes. The third part of the book deals with projected changes in temperature, precipitation and thermal indices related to the agriculture and energy sectors. Two future time horizons are carried out: 1) near future: 2021–2050 and 2) far future: 2071–2100. The results for Poland are compared to those from Europe and other parts of the world. The book is addressed to

scientists (climatologists, geographers, etc.), academic teachers, students, journalists and all those interested in Poland and climate change in Poland.

### **Subtle Agroecologies**

Springer Nature  
This important book presents the latest research from around the globe on the developments in higher education in areas such as interteaching, the socio-economic demand for higher education, improving visual teaching materials, online learning,

anthropology of education, etc. The phenomenal expansion of higher education systems in the second half of the twentieth century has resulted in an interest in the factors influencing the decision of young people to pursue tertiary education. The demand for higher education is commonly considered to be subject to a great number of influences, the most important of which fall under the following categories of variables: social/familial, psychological/individual,

economic/occupational, and structural/institutional. **Literary Studies in English** Springer Nature "Exploring the achievements and challenges of those who seek to affirm African cultural values through film, the book also covers the African television industry and African-American cinema. It includes interviews with film-makers, stills from the films and, ultimately, a plea for seeing and respecting the otherness of the Other. The French

National Film Centre's best film book of 1997 and now available in four languages, this is a book which takes us into a process of learning how to look."--BOOK JACKET.

### **African Cinemas**

Routledge  
 The 24 chapters contained in this volume provide diverse but also congruent perspectives on future foci for research into postgraduate education and supervision in the knowledge society. The chapters move from deliberations on challenges for

postgraduate supervision at macro level (such as the pressure to increase postgraduate output and the implications of increasingly managerialist institutions) to meso level matters (the form and function of postgraduate education in specific countries) to the micro (rich case studies of individual institutions, programmes and supervisors).

Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene Springer Nature

The four 1998 Tony Awards given to the Roundabout Theatre's production of Cabaret add to the eight Tonys the musical won in 1966 and the eight Oscars the film version garnered in 1972. Surely one of the most acclaimed and beloved plays of all time, this modern classic is honored for the first time in a lavishly illustrated book. Here is the complete musical book by Joe Masteroff and all the words of the songs written by John Kander and Fred Ebb. It is illustrated with

more than 100 photographs and drawings (including 74 in full color) of the original cast of the Roundabout 's smash Broadway production by Joan Marcus, never-before-published backstage photographs by Rivka Katvan, and archival photos of past productions. The accompanying text explores the evolution of the play in all its incarnations, from the 1930 stories of Christopher Isherwood to two films and three stage

adaptations. Here are all the fantastic artists who have brought this play to life: Julie Harris (the original Sally Bowles), Joel Grey, Liza Minnelli, Natasha Richardson, Alan Cumming, Ron Rifkin, and directors Hal Prince, Bob Fosse, Sam Mendes, and Rob Marshall. Also featured are original drawings by costume designer William Ivey Long and set designer Robert Brill. For theatre lovers and film fans, for those who've seen the play and those who haven't, this book is an

exclusive insider's glimpse into a stage and film phenomenon, one of the most astonishing artistic achievements of our time.

*Intercultural Public Relations* UJ Press

This book continues the groundbreaking work begun in *Intercultural Public Relations: Theories for Managing Relationships and Conflicts with Strategic Publics* (Routledge, 2018), by applying the theoretical framework of intercultural public relations to actual

practice. Practical public relations contexts examined by the contributing chapter authors—both scholars and practitioners—include corporations, government, military, healthcare, education, and activism. The book covers real-world situations, including the training of practitioners to become more interculturally competent, identifying and understanding publics or stakeholders with different cultural backgrounds and identities, building and

maintaining relationships with these publics/stakeholders, and managing conflicts with them. Offering practical guidance while examining both best practices and difficult challenges, this book is useful for public relations researchers, practitioners, and students as they explore how intercultural public relations contributes to organizational effectiveness and social change.
