How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have

propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

The past contemporary poet gives an account in 88 poems in letter form of his romance and the life spent with Sylvia Plath.

*Collected Poems for Children* Simon and Schuster

From the author of *The Many Worlds of Albie Bright* comes another cutting-edge cosmic space adventure for anyone who's ever looked up at the stars and wondered about the universe. How amazing would it be to have a dad who's an astronaut? To see him go on rocket launches, live in zero gravity, and fly through space like a superhero? Jamie Drake knows. His dad is orbiting Earth in the International Space Station. Jamie thinks it's cool, and he's proud of his dad, but he also really misses him. Hanging out at the local observatory one day, Jamie is surprised when he picks up a strange signal on his phone. Could it be aliens? Are they closer to our planet than anyone realizes? With his dad in space, Jamie feels he has no choice but to investigate on his own. But when something goes wrong with his dad's mission, Jamie is reminded that space is a dangerous

place. He decides it's time to prove that he's a hero too. The Jamie Drake Equation is about the wonders of space, the courage of astronauts, and the lengths to which we will go to protect the ones we love. "Thrilling, smart and surprisingly poignant . . . will leave young readers with a hunger to know more about the universe and our planet's place in it. --BookPage

FAO provides countries with technical support to conduct nutrition assessments, in particular to build the evidence base required for countries to achieve commitments made at the Second International Conference on Nutrition (ICN2) and under the 2016-2025 UN Decade of Action on Nutrition. Such concrete evidence can only derive from precise and valid measures of what people eat and drink. There is a wide range of dietary assessment methods available to measure food and nutrient intakes (expressed as energy insufficiency, diet quality and food patterns etc.) in diet and nutrition surveys, in impact surveys, and in monitoring and evaluation. Different indicators can be selected according to a study's objectives, sample population, costs and required precision. In low capacity settings, a number of other issues should be considered (e.g. availability of food composition tables, cultural and community specific issues, such as intra-household distribution of foods and eating from shared plates, etc.). This manual aims to signpost for the users the best way to measure food and nutrient intakes and to enhance their understanding of the key features, strengths and limitations of various methods. It also highlights a number of common methodological considerations involved in the selection process. Target audience comprises of individuals (policy-makers, programme managers, educators, health professionals including dietitians and nutritionists, field workers and researchers) involved in national surveys, programme planning and monitoring and evaluation in low capacity settings, as well as those in charge of knowledge brokering for policy-making.

The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.

Routledge

The SEND Code of Practice (2015) reinforced the requirement that all teachers must meet the needs of all learners. This topical book provides practical, tried and tested strategies and resources that will support teachers in making art lessons accessible and interesting for all pupils, including those with special needs. The authors draw on a wealth of experience to share their understanding of special educational needs and disabilities and show how the art teacher can reduce or remove any barriers to learning. Offering strategies that are specific to the context of art teaching, this book will enable teachers to: develop students' understanding, appreciation and enjoyment of art and design; advance students' sense of enquiry about visual and tactile experiences; help pupils to realise their creative intentions, through the development of technical competence and manipulative skills; provide opportunities for personal and imaginative enquiry; sample a variety of art and design projects to use in their own lessons; plan the classroom layout and display to enhance learning; successfully train, and fully use the support of, their teaching assistants. An invaluable tool for continuing professional development, this text will be essential for secondary art teachers (and their teaching assistants) seeking guidance specific to teaching art to all pupils, regardless of their individual needs. The book will also be of interest to secondary SENCOs, senior management teams and ITT providers. Full of practical ideas and inspiration, and supported by free online resources, this is an essential tool for art teachers and teaching assistants and will help to deliver successful, inclusive lessons for all pupils.

Scions have no limits Scions do not die And Scions do not disappear Sergeant Ted Regan has a problem. A son of one of the great corporate families, a Scion, has gone missing at the front. He should have been protected by his Ironclad – the lethal battle suits that make the Scions masters of war – but something has gone catastrophically wrong. Now Regan and his men, ill-equipped and demoralised, must go behind enemy lines, find the missing Scion, and uncover how his suit failed. Is there a new Ironcladkiller out there? And how are common soldiers lacking the protection afforded the rich supposed to survive the battlefield of tomorrow? A new standalone novella by the Arthur C Clarke Award-winning author of *Children of Time*.

*Vocabulary Ninja* Routledge

This is the story of a young Rwandan refugee now living in the UK. Christophe is having trouble getting used to his new school, new language and new life. Life has been very lonely for him. Most of all he misses his grandfather who they had to leave behind. His teacher persuades Christophe to share his story with his classmates - so he tells them of the terrifying day the soldiers came to his house and killed his baby brother. The spoken story fills the air and his classmates are spellbound. But when his teacher asks him to write it down and read it out in assembly, Christophe is horrified. You lose the fire from a story once you write it down! But with the help of his new friends, his family and the memory of his beloved grandfather, Christophe finds a way to break through the barriers - and share his story with everyone.

101 time-saving solutions that guarantee success on the job and in life. Here is today's executive: Like a sprinter poised at the beginning of the race, he or she sends an e-mail, takes a speaker-phone conference call, signs a contract to close a deal, practices the balance of office yoga, all the while nursing a morning latte gone cold. These simultaneous demands placed on the executive are an inevitable part of managerial life that lead to success. But how does the successful executive manage all of these demands when time is so fleeting and definite? Mitch Thrower first introduces us to this individual so caught up in the circus-act of management that he or she neglects to apply attention in the most effective manner, and then offers us THE A.D.D. WORKPLACE as the tool for reform. Organized by 101 lessons broken down into four components, this book is an easy how-to guide that guarantees practical and utilitarian advice proven by the author's own success. Thrower's candid voice makes this book an entertaining and enticing read that will certainly captivate the busy executive's attention. THE A.D.D. WORKPLACE is a necessary companion that should be in every executive's briefcase.
