English Textbook (Year 3)

John Wiley & Sons

Teaching English to the World: History,

Curriculum, and Practice

is a unique collection of English language teaching

(ELT) histories, curricula,

and personal narratives

from non-native speaker

(NNS) English teachers

around the world. No

other book brings such a

range of international ELT

professionals together to

describe and narrate what

they know best. The book includes chapters from Brazil, China, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Lebanon, Poland, Saudi Arabia, Singapore, Sri Lanka, and Turkey. All chapters follow a consistent pattern, describing first the history of English language teaching in a particular country, then the current ELT curriculum, followed by the biography or the autobiography of an English teacher of that country. This consistency in the structuring of

chapters will enable readers to assimilate the information easily while also comparing and contrasting the context of ELT in each country. The chapter authors--all born in or residents of the countries they represent and speakers of the local language or languages as well as English--provide insider perspectives on the challenges faced by local English language teachers. There is clear evidence that the majority of English teachers worldwide are nonnative speakers (NNS), and there

is no doubt that many among them have been taught by indigenous teachers who themselves are nonnative speakers. This book brings the professional knowledge and experience of these teachers and the countries they represent to a mainstream Western audience including faculty, professionals, and graduate students in the field of ESL; to the international TESOL community; and to ELT teachers around the world.

A set of Scholastic National Curriculum Tests for Year 5 is also available, designed to check children's progress through the Key Stage 2 English curriculum. *National Curriculum Maths Practice Book for Year 1* 100 Practice Activities English and Its Teachers offers a historical

overview of the development of secondary English teaching in schools over the past 50 years. Initially charting the rise of a new progressive approach in the 1960s, the book then considers the implications for the subject and its teachers of three decades of central policy intervention. Throughout, document and interview data are combined to construct a narrative that details the fascinating and, at times, turbulent history. The book is divided into two main

parts – ‘The age of invention’ and ‘The age of intervention’. The first of these sections details how innovative English teachers and academics helped to develop a new model. The second section explores how successive governments have sought to shape English through policy. A final part draws comparisons with the teaching of the subject in other major English-speaking nations and considers what the future might hold. English and Its Teachers is a valuable

resource for those interested in the teaching of English in secondary schools, from new entrants to the profession, to experienced teachers and academics working in the sector.
