The Conservative was a journal edited and self-published sporadically by H. P. Lovecraft between 1915 and 1923. Some of its pieces were written by Lovecraft himself, but many of them were written by others, and included not just political and social commentary on the issues of the day, but also poetry, short stories and literary criticism. In spite of its name, Lovecraft's style of conservatism bore little resemblance to what goes by that name in America today, and instead was first and foremost a call for a cultural revival - an appeal to a return to the deepest wellsprings that had inspired Western culture from its origins. The period covered by The Conservative coincided with some of the most tumultuous events of the twentieth century, including the First World War and the Russian Revolution. For Lovecraft and his fellow authors, however, the answer to navigating the chaos of their time was not crude nationalism or socioeconomic policies, but could only be understood in terms of race, culture and a strong sense of morality. An opponent of both democracy and liberalism, Lovecraft desired a return to the aristocratic values of earlier ages. Whether one reads these texts as a record of Lovecraft's own worldview, or as a window into the times in which they were written, The Conservative remains a fascinating document. This edition includes a special introduction placing it within the context of Lovecraft's life and career by Alex Kurtagic. H. P. Lovecraft (1890-1937) is widely considered to have been the greatest writer of horror fiction of the twentieth century. Best-know for the stories that comprised

his "Cthulhu Mythos," Lovecraft depicted a dark world dominated by unseen and malevolent forces, which mirrored his own hostility to everything associated with the modern world, which he saw as being in a continual state of decline and decay. He continues to be extremely influential upon writers, filmmakers and artists to this day.

Cassandra Khaw returns with *A Song for Quiet*, a new standalone *Persons Non Grata* novella from the world of *Hammers on Bone*, finalist for the British Fantasy Award and the Locus Award, and which Kameron Hurley called "a long leap into the gory, the weird, and the fantastic." Deacon James is a rambling bluesman straight from Georgia, a black man with troubles that he can't escape, and music that won't let him go. On a train to Arkham, he meets trouble — visions of nightmares, gaping mouths and grasping tendrils, and a madman who calls himself John Persons. According to the stranger, Deacon is carrying a seed in his head, a thing that will destroy the world if he lets it hatch. The mad ravings chase Deacon to his next gig. His saxophone doesn't call up his audience from their seats, it calls up monstrosities from across dimensions. As Deacon flees, chased by horrors and cultists, he stumbles upon a runaway girl, who is trying to escape the destiny awaiting her. Like Deacon, she carries something deep inside her, something twisted and dangerous. Together, they seek to leave Arkham, only to find the Thousand Young lurking in the woods. The song in Deacon's head is growing stronger, and soon he won't be able to ignore it any more. Set This House in Order MIRA

A mind-bending novel in which an alternate history of 9/11 and its aftermath uncovers startling truths about America and the Middle East 11/9/2001: Christian fundamentalists hijack four jetliners. They fly two into the Tigris & Euphrates World Trade Towers in Baghdad, and a third into the Arab Defense Ministry in Riyadh. The fourth plane, believed to be bound for Mecca, is brought down by its passengers. The United Arab States declares a War on Terror. Arabian and Persian troops invade the Eastern Seaboard and establish a Green Zone in Washington, D.C. . . . Summer, 2009: Arab Homeland Security agent Mustafa al Baghdadi interrogates a captured suicide bomber. The prisoner claims that the world they are living in is a mirage—in the real world, America is a superpower, and the Arab states are just a collection of "backward third-world countries." A search of the bomber's apartment turns up a copy of *The New York Times*, dated September 12, 2001, that appears to support his claim. Other captured terrorists have been telling the same story. The president wants answers, but Mustafa soon discovers he's not the only interested party. The gangster Saddam Hussein is conducting his own investigation. And the head of the Senate Intelligence Committee—a war hero named Osama bin Laden—will stop at nothing to hide the truth. As Mustafa and his colleagues venture deeper into the unsettling world of terrorism, politics, and espionage, they are confronted with questions without any rational answers, and the terrifying possibility that their world is not what it seems. Acclaimed novelist Matt Ruff has created a shadow world that is eerily recognizable but, at the same time, almost unimaginable. Gripping, subversive, and unexpectedly moving, *The Mirage* probes our deepest convictions and most arresting fears.

"We're doomed." So begins the work of the philosopher whose unabashed and aphoristic indictments of the human condition have been cropping up recently in popular culture. Today we find ourselves in an increasingly inhospitable world that is, at the same time, starkly indifferent to our species-specific hopes, desires, and disappointments. In the Anthropocene, pessimism is felt everywhere but rarely given its proper place. Though pessimism may be, as Eugene Thacker says, the lowest form of philosophy, it may also contain an enigma central to understanding the horizon of the human. Written in a series of fragments, aphorisms, and prose poems, Thacker's *Cosmic Pessimism* explores the varieties of pessimism and its often-conflicted relation to philosophy. "Crying, laughing, sleeping—what other responses are adequate to a life that is so indifferent?"

A landmark history of the antisemitic blood libel myth—how it took root in Europe, spread with the invention of the printing press, and persists today. Accusations that Jews ritually killed Christian children emerged in the mid-twelfth century, following the death of twelve-year-old William of Norwich, England, in 1144. Later, continental Europeans added a destructive twist: Jews murdered Christian children to use their blood. While charges that Jews poisoned wells and desecrated the communion host waned over the years, the blood libel survived. Initially blood libel stories were confined to monastic chronicles and local lore. But the development of the printing press in the mid-fifteenth century expanded the audience and crystallized the vocabulary, images, and "facts" of the blood libel, providing a lasting template for hate. Tales of Jews killing Christians—notably Simon of Trent, a toddler whose body was found under a Jewish house in 1475—were widely disseminated using the new technology. Following the paper trail across Europe, from England to Italy to Poland, Magda Teter shows how the blood libel was internalized and how Jews and Christians dealt with the repercussions. The pattern established in early modern Europe still plays out today. In 2014 the Anti-Defamation League appealed to Facebook to take down a page titled "Jewish Ritual Murder." The following year white supremacists gathered in England to honor Little Hugh of Lincoln as a sacrificial victim of the Jews. Based on sources in eight countries and ten languages, *Blood Libel* captures the long shadow of a pernicious myth.
