Handbook of Research on Strategic Performance Management and Measurement Using Data Envelopment Analysis
Routledge

BPP Learning Media provides the widest range of study materials of any CIMA publisher. Our comprehensive printed materials highlight the areas to focus on for your exams, and our e-Learning products complement the syllabus to improve your understanding.

Understanding the Humanitarian World
Taylor & Francis

Given the decline in oil prices from mid-2014 on, the government's drive to diversify the economy away from its traditional reliance on hydrocarbons in line with its Emerging Gabon Strategic Plan has taken on greater importance. Drawing on its sizeable timber and mineral reserves, Gabon aims to develop new industries and boost domestic value added with the ultimate goal of achieving emerging market status by 2025. In the meantime, however, weaker oil prices will

likely cause complications for the next two to three years, as the authorities grapple with lower budgets and greater debt challenges.

Russia's Foreign Policy
Routledge

These volumes offer a one-stop resource for researching the lives, customs, and cultures of Africa's nations and peoples. Unparalleled in its coverage of contemporary customs in all of Africa, this multivolume set is perfect for both high school and public library shelves. The three-volume encyclopedia will provide readers with an overview of contemporary customs and life in North Africa and sub-Saharan Africa through discussions of key concepts and topics that touch everyday life among the nations' peoples. While this encyclopedia places emphasis on the customs and cultural practices of each state, history, politics, and economics are also addressed. Because entries average 14,000 to 15,000 words each, contributors are able to expound more extensively on each country than in similar encyclopedic works with shorter entries. As a result, readers will gain a

more complete understanding of what life is like in Africa's 54 nations and territories, and will be better able to draw cross-cultural comparisons based on their reading.

Danger, Development and Legitimacy in East Asian Maritime Politics BPP Learning Media

The Democratic Republic of Congo has the natural resources the world needs - it is crucial to satisfying our craving for the latest high-tech gadgets; the Inga Dam could light up all of Africa; while Congo's farmers could feed a billion people. These realities are redefining the country's strategic contribution to a globalized world. A resource paradise for some, the DRC is an environmental nightmare for others. Congo's Environmental Paradox analyses the new dynamics in the country's forest, mineral, land, water and oil sectors, revealing the interactions between these sectors. Connecting the dots, it shows how we need to fundamentally rethink power, politics and resource management in Congo today.

Global Forum on Transparency and Exchange of Information

for Tax Purposes Peer Reviews: Gabon 2016 Phase 2: Implementation of the Standard in Practice
 OECD Publishing
 Engineers seek solutions to problems, and the economic viability of each potential solution is normally considered along with the technical merits. This is typically true for the petroleum sector, which includes the global processes of exploration, production, refining, and transportation. Decisions on an investment in any oil or gas field development are made on the basis of its value, which is judged by a combination of a number of economic indicators. *Economic Analysis of Oil and Gas Engineering Operations* focuses on economic treatment of petroleum engineering operations and serves as a helpful resource for making practical and profitable decisions in oil and gas field development. Reflects major changes over the past decade or so in the oil and gas industry Provides thorough coverage of the use of economic analysis techniques in decision-making in petroleum-related projects Features real-world cases and applications of economic

analysis of various engineering problems encountered in petroleum operations Includes principles applicable to other engineering disciplines This work will be of value to practicing engineers and industry professionals, managers, and executives working in the petroleum industry who have the responsibility of planning and decision-making, as well as advanced students in petroleum and chemical engineering studying engineering economics, petroleum economics and policy, project evaluation, and plant design. *The Carriage Journal Do Sustainability Investing for a Lifetime* is designed to make saving and investing understandable to the investor. Wharton Professor Richard C. Marston, 2014 recipient of the Investment Management Consultants Association's prestigious Matthew R. McArthur Award, guides an investor through the main investment decisions throughout a lifetime. *Investing for a Lifetime* shows: how younger investors can set savings goals how both younger and older investors can choose investment

portfolios to achieve these goals how investors can sustain spending once reaching retirement. Younger and older investors alike should understand savings goals that will provide enough income to sustain spending in retirement. They should devise rates of saving that allow them to reach their goals by the time of retirement. Though retirement is often the main goal of investing, it's not the only one. Marston discusses how funding a child's education or saving for a down payment for a home affects overall saving. Sensible investing is also necessary for savings goals to be realized. Investing need not be complicated, but Marston explains that a diversified portfolio should include a mix of different types of U.S. stocks, foreign stocks, real estate as well as bonds. He describes each of these asset classes and shows how they fit in an investor's portfolio. He shows how investors can monitor the performance of their portfolios by establishing benchmarks for each asset class to judge how well their investments are doing. He focuses particular attention on those investors nearing

retirement. In today's low interest rate environment, he discusses whether it is possible to fund retirement from interest and dividends alone. He shows how savings combined with Social Security can fund retirement spending. And he asks how the "New Normal" of lower returns might force investors to save more than in past decades, and to spend less in retirement than in the past. Investing for a Lifetime is for investors who want to understand more about the savings and investment process, particularly those who worry about whether their retirement savings will last a lifetime.

ACRL's Choice Outstanding Academic Title of 2021 Peru is classified as one of the deadliest countries in the world for environmental defenders, where activists face many forms of

violence. Through an ethnographic and systematic comparison of four gold-mining conflicts in Peru, *Resisting Extractivism* presents a vivid account of subtle and routine forms of violence, analyzing how meaning-making practices render certain types of damage and suffering noticeable while occluding others. The book thus builds a theory of violence from the ground up—how it is framed, how it impacts people's lived experiences, and how it can be confronted. By excavating how the everyday interactions that underlie conflicts are discursively concealed and highlighted, this study assists in the prevention and transformation of violence over resource extraction in Latin America. The book draws on a controlled, qualitative comparison of four case studies, extensive ethnographic research conducted over fourteen months of fieldwork, analysis of over nine hundred archives and documents, and unprecedented access to more than 250 semi-structured interviews with key actors across industry, the state, civil society, and the media.

Michael Wilson Becerril identifies, traces, and compares these dynamics to explain how similar cases can lead to contrasting outcomes—insights that may be usefully applied in other contexts to save lives and build better futures.

Increasing Professionalism in Public Finance

Management Routledge
The theory of knowledge, or epistemology, is often regarded as a dry topic that bears little relation to actual knowledge practices. *Knowledge: The Philosophical Quest in History* addresses this perception by showing the roots, developments and prospects of modern epistemology from its beginnings in the nineteenth century to the present day. Beginning with an introduction to the central questions and problems in theory of knowledge, Steve Fuller goes on to demonstrate that contemporary epistemology is enriched by its interdisciplinarity, analysing key areas including: Epistemology as Cognitive Economics Epistemology as Divine Psychology Epistemology as Philosophy of Science Epistemology as Sociology of Science Epistemology and Postmodernism. A

wide-ranging and historically-informed assessment of the ways in which man has - and continues to - pursue, question, contest, expand and shape knowledge, this book is essential reading anyone in the Humanities and Social Sciences interested in the history and practical application of epistemology.

CIMA P1 Management

Accounting AuthorHouse
This book highlights the first comparative long-term analysis of the negative impacts of large dams on riverine communities and on free-flowing rivers in Africa, the Middle East and Asia. Following the Foreword by Professor Asit K. Biswas, the first section covers the 1956–1973 period, when the author believed that large dams provided an exceptional opportunity for integrated river basin development. In turn, the second section (1976–1997) reflects the author’s increasing concerns about the magnitude of the socio-economic and environmental costs of large dams, while the third (1998–2018) discusses why large dams are in fact not cost-effective in the long term.
Designing Service

Processes to Unlock Value, Third Edition BPP Learning Media
How to Prevent the Spread of EBOLA: Effective Strategies to Reduce Facility Acquired Infections and Reduce Super Bugs Outbreak. This book is divided into ten different sections targeting critical issues of concern about Ebola and the processes of preventing Ebola spread as a nosocomial infection. It starts with allaying people’s fear and discussing facts about the clinical aspects of Ebola virus infection. It discusses different types of Ebola viruses and their pathogenesis; routes of infection; clinical manifestations and progression of the disease; immunopathology and cellular toxicity; progressive tissue damage and multi-organ failures; effective management of the disease; and the discussion of some case studies. This Ebola monograph also discusses some of the lingering questions raised by the public about Ebola and addresses these controversial issues with facts. Some of the questions discussed include, What are the

indicators for the survivability of the Ebola virus once a patient is infected? Can Ebola virus be aerosolized? What are the differences between the acute phase of the illness and the subclinical, asymptomatic, or nonclinical Ebola virus infections? Where was the first Ebola infection, in West Africa or in Europe? Can the Ebola virus infection be caught through kissing an infected person? When a blood test is negative for Ebola virus, is a patient free of Ebola virus? Can Ebola virus be transmitted through breast milk, semen or vaginal fluids? Was the virulent Ebola virus able to enter the human population by an accidental release due to a lab accident? Can the outbreak of Reston Ebola virus infections in the Philippines among nonhuman primates be dangerous to human population with the evidence of abortive infection in some farm workers? What is the nature of the current virus epidemic in U.S. farms, killing millions of piglets? Is this epidemic swine virus similar to Ebola and how dangerous is it to the human population? What are the lessons learned from the clinical

management of Ebola patients that can be applied to the treatment of other viral infections like the Bourbon virus newly discovered in Kansas? What is the chronicity of Ebola infection and the long term effects, after clinical cure? For answers to these questions and more, read the book, *How to Prevent the Spread of Ebola Virus Infection*. Many healthcare institutions including hospitals, clinics, physician's offices, dentist's offices will find this book very useful to help prevent the rise of facility-acquired infections. Over 600 pages of leading medical journal articles are reviewed in this book giving scientific explanations for the questions raised by Ebola virus infection. In reviewing these research reports, it is evident, that we have effective treatment for Ebola virus infection as a multi-pronged approach in the process of effective clinical management of the disease. *Knowledge Zed Books Ltd.* There is considerable national variation in the professionalization and status of the management accountant. Although

researchers from different countries have contributed to our knowledge about tasks and roles, we have limited insights into the development, education, and socio-cultural influences in different countries and surprisingly little is known about the local and national contexts in which these roles are learned and performed. This book bridges this research gap using two complementary perspectives. The first part explores management accountants in a range of different national contexts, providing information about country-specific historical developments and educational standards as well as specific roles and tasks. The second part focusses on important global developments that will increasingly impact management accountants in the future, such as sustainability, the financial crisis, technology and changing roles. By combining local context with a global overview, this insightful volume provides an agenda for future research which will be of great interest to scholars and advanced students in management accounting throughout

the world.

Mary of Mercy in Medieval and Renaissance Italian Art Emerald Group Publishing

This book explains the consequences of global policy initiatives against money laundering, terrorist financing, and tax evasion on financial centres located in offshore jurisdictions in the Caribbean region. Adding to the existing literature by detailing international policy initiatives against money laundering and tax evasion from the early 1920s to date, this book examines the factors that have contributed to their gradual development over time, their role in contributing to money laundering, terrorist financing, and tax evasion, the international policy initiatives that came about to address these financial crimes, as well as the consequences of these policy initiatives on the legislative systems, institutions, offshore business sectors, and economies of these financial centres.

Go Beyond Vanderbilt University Press
Motor dysfunction and cognitive impairment are major symptoms in both Huntington's Disease (HD) and Parkinson's Disease

(PD). A breakthrough in HD research was the identification of the gene that causes this devastating monogenetic illness. Similarly, several genes were found to cause familial forms of PD. With their identification, a plethora of genetic animal models has been generated and has revolutionized the understanding of the pathobiology and pathophysiology of these disorders. The models allow us to study the earliest manifestations of the diseases behaviorally and neuropathologically and help us understand how they progress over time. Additionally, neurotoxic animal models are still of high interest to the PD field, as they are being used to study e.g. mitochondrial dysfunction in PD. This book focuses on animal models of both diseases and how they have helped and will continue to help understand the behavioral neurobiology in these disorders.

Springer Nature
Grounded in extensive empirical research, *Danger, Development and Legitimacy in East Asian Maritime Politics* addresses the major issues of geopolitics in the region that have been and

will continue to shape the international politics of the Asia-Pacific for years to come. Covering the nation-states of China, Japan and South Korea, it includes an examination of the key island disputes, as well as analysis of the North Korea–South Korea clashes in the Yellow Sea, controversies in Japan’s relations with both Koreas and the so-called ‘history disputes’, including recognition of World War II atrocities across the region. In doing so, this book explores a range of themes from the ecological environment to the globalized nature of shipping and therein links the East Asian maritime sphere directly to the dynamics and developments in the domestic politics of each country. Thus, it serves to demonstrate how several controversial debates in the international politics of the Asia-Pacific are ultimately and inextricably intertwined. A timely contribution that furthers our understanding of contemporary politics of the Asia-Pacific, this book will be of great interest to students and scholars of Asian politics, international relations and the Asia-Pacific region in general.

The Man from Lebrija (the story of harness maker Francisco Caro Dorantes} by Ken WHEELING
Governance and Regulations Rowman & Littlefield
Conflict and disaster have been part of human history for as long as it has been recorded. Over time, more mechanisms for responding to crises have developed and become more systematized. Today a large and complex ‘global humanitarian response system’ made up of a multitude of local, national and international actors carries out a wide variety of responses. Understanding this intricate system, and the forces that shape it, are the core focus of this book. Daniel G Maxwell and Kirsten Gelsdorf highlight the origins, growth, and specific challenges to, humanitarian action and examine why the

contemporary system functions as it does. They outline the main actors, explore how they are organised and look at the ways they plan and carry out their operations. Interrogating major contemporary debates and controversies in the humanitarian system, and the reasons why actions undertaken in its name remain the subject of so much controversy, they provide an important overview of the contemporary humanitarian system and the ways it may develop in the future. This book offers a nuanced understanding of the way humanitarian action operates in the 21st century. It will be essential reading for anyone with an interest in international human rights law, disaster management and international relations.

Valuing Natural Capital

Carriage Assoc. of America

Designing Service Processes to Unlock Value explores how service

processes can be designed to leverage the expanding range of opportunities for service providers and customers to co-create value. The service process design landscape is changing, with many of the previous limitations disappearing on how and by whom services are delivered. Opportunities for new service design configurations are being supported, to a large extent, by technology-enabled innovations; many tasks previously performed by the service provider may now be performed by either the customer or the service provider. As a result, customers are playing a more active role in the service process, not only through self-service but also by providing information to the service provider to create a more personalized service experience. Designing Service Processes to Unlock Value explores how service processes can be designed to leverage the expanding range of opportunities for service providers and customers to co-create value. Readers will learn about frameworks for value co-creation and models for designing all types of service

processes, as well as the unique challenges of designing knowledge-intensive services. And with the growing number of alternatives for designing service processes and determining who performs the various service tasks, service performance outcomes are increasingly dependent on the knowledge, skills, and abilities—that is, capabilities—of both service providers and customers. Thus, the book concludes with approaches to unlock these capabilities—and further boost value co-creation.

Conventional Versus Non-conventional Political Participation in Turkey
Routledge

This book analyzes the constraints on press freedom and the ways in which independent reporting and reporters are at risk in contemporary Asia to provide a barometer of democratic development in the region. Based on in-depth country case studies written by academics and journalists, and some who straddle both professions, from across the region, this book explores the roles of mainstream and online media, and how they are

subject to abuse by the state and vested interests. Specific country chapters provide up-to-date information on Bangladesh, Kashmir, Malaysia, Myanmar, Nepal, Pakistan, Sri Lanka, Taiwan, Thailand and Vietnam, as well as on growing populist and nationalist challenges to media freedom in the Philippines, India, Indonesia and Japan. The book includes a theoretical chapter pulling

together trends and common constraints facing newsrooms across Asia and a regional overview on the impact of social media. Three chapters on China provide insights into the country's tightening information environment under President Xi Jinping. Moreover, the legal environment of the media, political and external pressures, economic considerations,

audience support and journalists' standards and ethics are explored. As an international and interdisciplinary study, this book will appeal to undergraduates, graduates and scholars engaged in human rights, media studies, democratization, authoritarianism and Asian Studies, as well as Asia specialists, journalists, legal scholars, historians and political scientists.
