Some 70,000 hazardous materials are in various workplaces across the country...regulated by the OSHA Hazard Communication Standard not only for chemical manufacturers and distributors, but soon, for all other U.S. manufacturers—and many others as well. This guide provides a step-by-step understanding of the standard. With this book you should be able to plan, organize and operate your company's Hazard Communication Program...to protect your employees (and your company) as required by OSHA. This handbook is especially intended for use by industrial hygienists, safety directors, safety engineers, occupational health departments, managers, environmental

engineers, legal staff, and consultants. Hazard Communication and OSHA Requirements explains carefully in non-legalistic terms just what will be required, and when. But even more important, it explains in detail, with examples where appropriate.

This book evolved from the course developed at the U.S. Department of Labor's National Mine, Health, and Safety Academy to develop the legislation that eventually became 29 CFR 1910.120. Fundamentals of

Hazardous Materials Incidents offers the reader a basic understanding of the principles involved in toxicology, federal regulations, respiratory protection, personal protective equipment, radiation, environmental considerations, industrial hygiene sampling, site safety, and chemically resistant suits. Thousands of people have been trained using this manual, now revised and available for the first time in hardcover format. The book is essential for identifying potential problems at hazardous waste sites, covers diverse topics throughout the area of hazardous materials response, and is ideal for training courses to meet 29 CFR 1910.120 requirements. Understanding the natural process of how adults learn is critical to delivering training that's

interesting, relevant - and most important - gets tangible results. In *Turning Training Into Learning*, the authors share their original, time-tested method for how to help trainees internalize a skill so that it sticks. In detail, Sheila Furjanic and Laurie Trotman show you how to take the traditional training cycle (assess, design, delivery, evaluate) and align it with their step-by-step system, which they call "Learn." This revolutionary approach examines the adult mind, and shows you how it deals with new information and skills - how it perceives, evaluates, tests, and finally accepts what it has learned. And, *Turning Training Into Learning* is far more than just an explanation of a training theory. It's packed full of practical advice, guidelines, models, checklists, forms, templates, and other tools.

An updated edition of the bestselling classic Donald Kirkpatrick is a true legend in the training field: he is a past president of ASTD, a member of Training magazine's "HRD Hall of Fame," and the recipient of the 2003 "Lifetime Achievement Award in Workplace Learning and Performance" from ASTD. In 1959 Donald Kirkpatrick

developed a four-level model for evaluating training programs. Since then, the "Kirkpatrick Model" has become the most widely used approach to training evaluation in the corporate, government, and academic worlds. Evaluating Training Programs provided the first comprehensive guide to Kirkpatrick's Four Level Model, along with detailed case studies of how the model is being used successfully in a wide range of programs and institutions. This new edition includes revisions and updates of the existing material plus new case studies that show the four-level model in action. Going beyond just using simple reaction questionnaires to rate training programs, Kirkpatrick's model focuses on four areas for a more comprehensive approach to evaluation: Evaluating Reaction, Evaluating Learning, Evaluating Behavior, and Evaluating Results. Evaluating Training Programs is a how-to book, designed for practitioners in the training field who plan, implement, and evaluate training programs. The author supplements principles and guidelines with

numerous sample survey forms for each step of the process. For those who have planned and conducted many programs, as well as those who are new to the training and development field, this book is a handy reference guide that provides a practical and proven model for increasing training effectiveness through evaluation. In the third edition of this classic bestseller, Kirkpatrick offers new forms and procedures for evaluating at all levels and several additional chapters about using balanced scorecards and "Managing Change Effectively." He also includes twelve new case studies from organizations that have been evaluated using one or more of the four levels--Caterpillar, Defense Acquisition University, Microsoft, IBM, Toyota, Nextel, The Regence Group, Denison University, and Pollack Learning Alliance.
