 Written especially for computer scientists, all necessary biology is explained. Presents new techniques on gene expression data mining, gene mapping for disease detection, and phylogenetic knowledge discovery.

Semiconducting Silicides BoD - Books on Demand

They may shave their heads, don simple robes, and renounce materialism and worldly desires. But the women seeking enlightenment in a Buddhist nunnery high in the folds of Himalayan Kashmir invariably find themselves subject to the tyrannies of subsistence, subordination, and sexuality. Ultimately, Buddhist monasticism reflects the very world it is supposed to renounce. Butter and barley prove to be as critical to monastic life as merit and meditation. Kim Gutschow lived for more than three years among these women, collecting their stories, observing their ways, studying their lives. Her book offers the first ethnography of Tibetan Buddhist society from the perspective of

its nuns. Gutschow depicts a gender hierarchy where nuns serve and monks direct, where monks bless the fields and kitchens while nuns toil in them. Monasteries may retain historical endowments and significant political and social power, yet global flows of capitalism, tourism, and feminism have begun to erode the balance of power between monks and nuns. Despite the obstacles of being considered impure and inferior, nuns engage in everyday forms of resistance to pursue their ascetic and personal goals. A richly textured picture of the little known culture of a Buddhist nunnery, the book offers moving narratives of nuns struggling with the Buddhist discipline of detachment. Its analysis of the way in which gender and sexuality construct ritual and social power provides valuable insight into the relationship between women and religion in South Asia today.

Berlin im Jahr 2033. Die Journalistin Mara Erhardt hat herausgefunden, dass ein koreanischer Biologe jahrelang illegal Menschen geklont hat. Eine Spur führt nach Berlin, zu zwei Studenten. Doch als sie die jungen Männer ausfindig macht, überstürzen sich die Ereignisse. Denn es gibt noch eine Spur nach Deutschland – zu einem Klon des größten Verbrechers der Geschichte: Adolf Hitler. Und die Auftraggeber wollen nicht, dass dessen Identität zu früh enttarnt wird. Für Mara beginnt ein tödlicher Wettlauf gegen die Zeit – und gegen eine verhängnisvolle Wiederholung der deutschen Vergangenheit ... Welches Schicksal lauert in deinen Genen? – Der neue packende Science-Thriller von Jens Lubbadeh Hitler ist in einem illegalen Genlabor heimlich geklont worden. Doch nicht einmal der Klon selbst weiß, wer er wirklich ist Für alle Leserinnen und Leser von Andreas Eschbach, Robert Harris und Marc Elsberg Thailand Unter Der Haut Now Publishers Inc

-Softcover reprint of a successful hardcover reference (370 copies sold) -Price to be accessible to the rapidly increasing population of students and investigators in the field of tissue engineering - Chapters written by well-known researchers discuss issues in functional tissue engineering as well as provide guidelines and a summary of the current state of technology

Bienen-Zeitung für die Schweiz brand eins Medien

Dieses Studienbuch diskutiert zentrale Fragen der gegenwärtigen medizinethischen Debatte. Die Reihenfolge der Kapitel richtet sich nach dem Ablauf des menschlichen Lebens. So wird das Spektrum von Fragen zur Erzeugung, zum Beginn des Lebensrechtsschutzes und der Behandlung Neugeborener, dann Erwachsener abgedeckt - bis hin zu Aspekten im Zusammenhang mit dem Ende des menschlichen Lebens wie beispielsweise dem Hirntod und der Sterbehilfe. Dabei versucht Joerden, den notwendigen Schutz der Freiheitsrechte des Einzelnen mit dem gesellschaftlich Wünschbaren in Einklang zu bringen. Jan C. Joerden ist Professor fuer Strafrecht und Rechtsphilosophie und Leiter des Interdisziplinären Zentrums fuer Ethik an der Europa-Universität Viadrina in Frankfurt/Oder. Er ist Mitglied der Akademie fuer Ethik in der Medizin in Göttingen und im Beirat des Interdisziplinären Zentrums Medizin-Ethik-Recht der Martin-Luther-Universität Halle-Wittenberg. Aus dem Inhalt Reproduktives Klonen - Personbegriff und Lebensrechtsschutz - Abtreibung - Stammzellenforschung - Diskriminierungsgefahren der Genforschung - Keimbahnintervention - Aktive Tötung schwerstgeschädigter Neugeborener - Trennung siamesischer Zwillinge - Experimente an Menschen - Verschreibung von Drogen - Gruppenrechte in der Medizinethik - Organtransplantation - Sterbehilfe - Hirntodkonzept.

Being a Buddhist Nun Delphi Classics

A comprehensive presentation and analysis of properties and methods of formation of semiconducting silicides. Fundamental electronic, optical and transport properties of the silicides collected from recent publications will help readers choose their application in new generations of solid-state devices. A comprehensive presentation of thermodynamic and kinetic data is given in combination with their technical application, as is information on corresponding thin-film or bulk crystal formation techniques.

Mission to Tibet recounts the fascinating eighteenth-century journey of the Jesuit priest ippolito Desideri (1684 - 1733) to the Tibetan plateau. The Italian missionary was most notably the first European to learn about Buddhism directly with Tibetan scholars and monks - and from a profound study of its primary texts. While there, Desideri was an eyewitness to some of the most tumultuous events in Tibet's history, of which he left us a vivid and dramatic account. Desideri explores key Buddhist concepts including emptiness and rebirth, together with their philosophical and ethical implications, with startling detail and sophistication. This book also includes an introduction situating the work in the context of Desideri's life and the intellectual and religious milieu of eighteenth-century Catholicism.

Hollow City CRC Press

This book gathers research contributions on recent advances in intelligent and distributed computing. A major focus is placed on new techniques and applications for several highly demanded research directions: Internet of Things, Cloud Computing and Big Data, Data Mining and Machine Learning, Multi-agent and Service-Based Distributed Systems, Distributed Algorithms and Optimization, Modeling Operational Processes, Social Network Analysis and Inappropriate Content Counteraction, Cyber-Physical Security and Safety, Intelligent Distributed Decision Support Systems, Intelligent Human-Machine Interfaces, Visual Analytics and others. The book represents the peer-reviewed proceedings of the 13th International Symposium on Intelligent Distributed Computing (IDC 2019), which was held in St. Petersburg, Russia, from October 7 to 9, 2019.

Functional Tissue Engineering Springer Science & Business Media

Immer nur lächeln, immer vergnügt. Sabai sabai, alles bestens! Heitere Menschen, angenehme Temperaturen. Traumstrände, Tempel, Streetfood, Party, Nachtleben. All das gehört zum Mythos Thailand, all das gibt es auch im wahren Leben. Millionen Touristen schätzen das Königreich als Urlaubsparadies. Der Wai, ein Gruß wie ein Gebet, berührt das Herz. Ein Thai Smile überbrückt kulturelle Gräben mühelos. Willkommen im Land des Lächelns, willkommen auch im Treibsand der Klischees. Silvester 2007: Mit dem Blick auf Bangkoks Skyline fasst der Journalist Bernd Linnhoff spontan den Entschluss, in Thailand zu leben. Neun Monate später landet er auf Bangkoks Flughafen Suvarnabhumi und fragt sich: Was wird bleiben vom Urlaubsparadies? Was von der Warmherzigkeit der Menschen? Im

besten Fall erhofft er Intensität, eine zusätzliche Dimension Leben. Die bekommt er auch, wenngleich anders als erwartet. Denn in Thailand ist nichts, wie es scheint. In 31 Nahaufnahmen schildert der Autor seine schönsten, wichtigsten und amüsantesten Erlebnisse aus 14 Jahren Leben im Königreich. Es geht um Thailands Ess-Klasse, die Fußball-Community der German All Stars, die Männer in Bangkoks Nächten, die Frauen auch, Weihnachten in der Stadt der Engel, eine Schlankheitskur auf dem Motorrad und das Abenteuer Auswandern. Es geht um Geister, den Zusammenprall zweier Kulturen in seiner Ehe, um thailändische Spitznamen ("Gestatten, mein Name ist Frankfurt") und das Verhalten der Einheimischen im Straßenverkehr, das nur mit dem Glauben an Wiedergeburt zu erklären ist. Linnhoff verschweigt nicht einmal, dass er in seiner neuen Heimat lung genannt wird, alter Onkel.

Plastic Techniques in Neurosurgery Springer Nature

The #1 New York Times best-selling series. Bonus features: • Sneak preview of the third Peculiar Children novel • Exclusive Q&A with Ransom Riggs • Never-before-seen peculiar photography Like its predecessor, this second novel in the Peculiar Children series blends thrilling fantasy with vintage photography to create a one-of-a-kind reading experience. September 3, 1940. Ten peculiar children flee an army of deadly monsters. And only one person can help them—but she's trapped in the body of a bird. The extraordinary journey that began in Miss Peregrine's Home for Peculiar Children continues as Jacob Portman and his newfound friends journey to London, the peculiar capital of the world. There, they hope to find a cure for their beloved headmistress, Miss Peregrine. But in this war-torn city, hideous surprises lurk around every corner. And before Jacob can deliver the peculiar children to safety, he must make an important decision about his love for Emma Bloom.

Kikeriki Simon and Schuster

Step-by-step descriptions of surgical techniques This book highlights the successful collaboration of plastic surgeons, neurosurgeons, and, in some cases, ENT, maxillofacial, oral, and oculoplastic surgeons, in treating some of the most complex craniofacial, skull-based, intracranial, and spinal problems. Beginning with the basic principles of wound healing and flap rotation, you will find full discussions of craniofacial anomalies, skull base tumors, scalp closures, skull defects, management techniques for spinal dysraphism, and much more. Key features: Nearly 300 beautiful illustrations, most in full-color, effectively map out each procedure Updated with a thorough review of potential complications and how to avoid them Valuable procedural guidelines on the newest techniques for full calvarial and facial reconstructions, especially around the eyes, orbit, and midface region -Demonstrates MR and 3D imaging in surgical management of congenital malformations of the spine Discusses the role of ENT, maxillofacial, and oculoplastic procedures for optimal outcomes With a balanced combination of concepts followed by illustrated, step-by-step surgical techniques, here is the book that all neurosurgeons and plastic and reconstructive surgeons will use as both an everyday reference and a key addition to their surgical armamentariums. Residents preparing

for boards will also find its succinct, straightforward coverage ideal for reviewing fundamental principles and surgical applications.

Mission to Tibet Menschenleben

This book constitutes the thoroughly refereed post-proceedings of the 9th International Workshop on Persistent Object Systems, POS-9, held in Lillehammer, Norway, in September 2001. The 19 revised full papers presented together with seven session overviews and an epilogue were selected during two rounds of reviewing and revision for inclusion in the proceedings. Among the topics addressed are persistence-enabled optimization, Java applications, JVM, systems architecture, persistent GIS, data sharing middleware, polylingual persistence, transactions, distributed object systems, object stores, garbage collectors, WWW and persistence, persistent computation implementation, orthogonally persistent Java, and personal information devices.

A complete dictionary english-german-french Heyne Verlag

Invented about 40 years ago and called ubiquitous less than 10 years later, B-tree indexes have been used in a wide variety of computing systems from handheld devices to mainframes and server farms. Over the years, many techniques have been added to the basic design in order to improve efficiency or to add functionality. Examples include separation of updates to structure or contents, utility operations such as non-logged yet transactional index creation, and robust query processing such as graceful degradation during index-to-index navigation. Modern B-Tree Techniques reviews the basics of B-trees and of B-tree indexes in databases, transactional techniques and query processing techniques related to B-trees, B-tree utilities essential for database operations, and many optimizations and improvements. It is intended both as a tutorial and as a reference, enabling researchers to compare index innovations with advanced B-tree techniques and enabling professionals to select features, functions, and tradeoffs most appropriate for their data management challenges.

Naturwissenschaftliche Rundschau Franz Steiner Verlag

Indexes the world's zoological and animal science literature, covering all research from biochemistry to veterinary medicine. The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other no-serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the "unofficial register" for taxonomy and systematics, but other topics in animal biology are also covered.

The Evangelical Herald

Since the end of the absolute monarchy in Siam in 1932, the country has seemed to lurch from one military coup to another despite the democratic ideals proclaimed by the men who established the first constitutional government. Just how the military came to play such a dominant role in Thai politics is the main theme of this book. But it also looks at the nebulous period during World War II when Thailand fought a little-known war against the French in Indo-China and then aligned itself with Japan, declaring war on Britain and the United States.
