Carve out family time for this clever and humorous picture book about a skeleton who is falling to pieces that needs help pulling himself together. Bonaparte is having a tough time. It's hard for this young skeleton to just hang loose when he can't keep hold of himself. When he plays catch, his throwing arm literally takes a flyer. Eating lunch can be a real jaw-dropping occasion. How can he start school when he has so many screws loose? Luckily, Bonaparte hit the bone-anza when it came to his friends. Franky Stein, Blacky Widow, and Mummicula all have some bonehead ideas to help pull him together. But will it be enough to boost his confidence and get him ready for the first day of school?

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed

plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
