Nova Novinka
"Like cures like" is a

natural principle first
expounded by
Hippocrates, the ancient
founder of medicine.
Centuries later, inspired
by that idea, German
physician Samuel
Hahnemann found that
some of the very
substances that cause
illness could also be used
as cures--a discovery that
led to the holistic healing
system known as

homeopathy. And the procedures he developed keep growing in popularity. Those who want to understand and apply homeopathy now have a comprehensive and authoritative reference that recounts its history, explains its enlightened principles, and--best of all--includes a full A-to-Z encyclopedia of remedies. So it's simple to find safe, dependable treatments for colds, digestive ailments, skin irritation, sensory and nervous complaints, and many other diseases and

conditions.

Biodiversity and Sustainable Development MIT Press

A practice-oriented introduction to phytotherapy. Methodically classified by organic systems and fields of application, it offers a quick insight into dosage, form of application and effects of the most important herbal remedies. Only those herbal remedies that are of pharmacological and clinical efficiency have been considered. The authors are highly

experienced in the field of postgraduate medical education and, with this work, present an indispensable reference book for the medical practice.

Rasayana Marabout
This work provides a view of the 1000-year-old tradition of the Fulani people of West Africa, offering an insight into their cosmology and their material and spiritual values. This edition includes an interview with the author, explanatory notes, and critical and biographical essays.

L'Abeille de France et l'apiculteur Balogh Scientific Books
4e de couv.: People's Plants is a scientific review of all of the most important useful plants of southern Africa. It remains the first and only fully illustrated ethnobotanical reference source for southern Africa. In this expanded and updated second edition, traditional and contemporary uses of more than 700 plants are described and illustrated in 20 chapters, each dealing with a specific category of plant use. This

fascinating book is a must for anyone interested in useful plants, new crop plants, medicinal plants, new product development, ecotourism, rural development, traditional crafts, African culture, ethnobotany and botany in general--

Point de repère Waveland Press

Before the Vichy regime, there was ostensibly only one France and one form of colonialism for French West Africa (FWA). World War II and the division of France into two

ideological camps, each asking for legitimacy from the colonized, opened for Africans numerous unprecedented options. French Colonialism Unmasked analyzes three dramatic years in the history of FWA, from 1940 to 1943, in which the Vichy regime tried to impose the ideology of the National Revolution in the region. Ruth Ginio shows how this was a watershed period in the history of the region by providing an in-depth examination of the Vichy colonial visions and

practices in fwa. She describes the intriguing encounters between the colonial regime and African society along with the responses of different sectors in the African population to the Vichy policy. Although French Colonialism Unmasked focuses on one region within the French Empire, it has relevance to French colonial history in general by providing one of the missing pieces in research on Vichy colonialism. Ruth Ginio is a research fellow at the Harry S. Truman Research Institute for the

Advancement of Peace in the Hebrew University of Jerusalem. She is the author of articles in International Journal of African Historical Studies, Revue d'histoire moderne et contemporaine, Cahiers d'etudes africaines, and several other journals. Maldoror (Les Chants de Maldoror) Aegitas This edition, containing an extensive introduction, notes, the French original, and a new translation of Césaire's poetry--the complex and challenging later works as well as the famous Notebook--will

remain the definitive Césaire in English. Tales of Amadou Koumba Editions Quae Cet ouvrage - résolument interdisciplinaire - veut attirer l'attention sur les produits céréaliers autres que les grands classiques (pain, pâtes alimentaires, bières), décrits depuis longtemps. Il apporte de multiples informations sur leur identification précise et sur les séquences techniques liées à leur élaboration. Il retrace aussi leur histoire et les resitue dans des pratiques sociales, liées au

quotidien ou à l'exceptionnel (fêtes, cycles calendaires, usages religieux). Avoine, blé, orge, maïs, millet et panis, sorgho, riz sont au menu, ainsi que plusieurs non-céréales à usage semblable, comme la quinoa, le sarrasin, l'amarante ou... le manioc. Et dans une grande diversité d'aires culturelles : le Maghreb, l'Afrique subsaharienne, le Proche-Orient, l'Inde et les régions himalayennes, sans oublier l'Europe. Autant d'éléments originaux qui constituent

un apport majeur à l'histoire de l'alimentation, depuis les témoignages de la préhistoire jusqu'aux procédés industriels actuels.

Trees and Shrubs of the Sahel John Wiley & Sons
 Sambo Diallo is unable to identify with the soulless material civilization he finds in France, where he is sent to learn the secrets of the white man's power.

Production and processing of moringa UNC Press Books

“A magnificent, epic look at the history of the

region. . . . A monumental contribution to the annals of Congo scholarship” (Christian Science Monitor). The International Bestseller
 From the beginnings of the slave trade through colonization, the struggle for independence, Mobutu's brutal three decades of rule, and the civil war that has raged from 1996 to the present day, *Congo: The Epic History of a People* traces the history of one of the most devastated nations in the world. Esteemed scholar David Van

Reybrouck balances hundreds of interviews with a diverse range of Congolese with meticulous historical research to construct a multidimensional portrait of a nation and its people. Epic in scope yet eminently readable, both penetrating and deeply moving, Congo—a finalist for the Cundill Prize—takes a deeply humane approach to political history, focusing squarely on the Congolese perspective, and returns a nation’s history to its people. “A compelling

mixture of literary and oral history that delivers an authentic story of how European colonialism, African resistance, and the endless exploitation of natural resources affected the lives of the Congolese.” —Booklist “A vivid panorama of one of the most tormented lands in the world.” —Washington Post
[Deliciously Ella](#) Springer
 The Little Prince and
 (French: and Le Petit Prince) is a novella and by French aristocrat, writer, and aviator and

Antoine de Saint-Exupéry. It was first published in English and French in the US by Reynal and Hitchcock and in April 1943, and posthumously in France following the liberation of France and as Saint-Exupéry's works had been banned by the Vichy Regime. The story follows a young prince who visits various planets in space, including Earth, and addresses themes of loneliness, friendship, love, and loss.

Despite its style as a children's book, and The Little Prince and makes observations about life, adults and human nature. The Little Prince and became Saint-Exupéry's most successful work, selling an estimated 140 million copies worldwide, which makes it one of the and best-selling and and most translated books and ever published. and It has been translated into 301 languages and dialects. and The Little Prince

and has been adapted to numerous art forms and media, including audio recordings, radio plays, live stage, film, television, ballet, and opera. Modernism and Style Springer Modernism is fundamentally determined by its relationship to its own notions of style: oscillating between the poles of 'pure' style and 'purely' style, this traces the stylistic self-conceptualization of modernism from Schopenhauer and

Flaubert in the 1850s, through Nietzsche and the symbolists in the 1880s, to the high modernists of the 1920s.

After Tibili, a young African boy, follows Crope the spider's suggestion as to how he can avoid starting school, he discovers he wants to go after all.

New Perspectives on Islam in Senegal Book Publishing Company

This book crystallizes and extends the important work Wiebe Bijker has done in the last decade to found a full-scale theory of sociotechnical change that describes where technologies come from and how societies deal

with them. Of Bicycles, Bakelites, and Bulbs integrates detailed case studies with theoretical generalizations and political analyses to offer a fully rounded treatment both of the relations between technology and society and of the issues involved in sociotechnical change. The stories of the the safety bicycle, the first truly synthetic plastic, and the fluorescent light bulb—each a fascinating case study in itself—reflect a cross section of time periods,

engineering and scientific disciplines, and economic, social, and political cultures. The bicycle story explores such issues as the role of changing gender relationships in shaping a technology; the Bakelite story examines the ways in which social factors intrude even in cases of seemingly pure chemistry and entrepreneurship; and the fluorescent bulb story offers insights into the ways in which political and economic relationships can affect the form of a technology.

Bijker's method is to use these case studies to suggest theoretical concepts that serve as building blocks in a more and more inclusive theory, which is then tested against further case studies. His main concern is to create a basis for science, technology, and social change that uncovers the social roots of technology, making it amenable to democratic politics.

Tibili, the Little Boy who Didn't Want to Go to School KARTHALA Editions

This scientific method of eating, developed by Ehret in 1922, presents a complete, workable program for cleansing, repairing, rebuilding, and maintaining a healthy body. This book lays out Professor Ehret's simple and logical plan in plain, understandable language so that anyone can apply the Ehret method.

The Ink of the Scholars UNESCO Regional Office Banda, the protagonist, sets off to sell the year's cocoa harvest to earn the bride-price for the woman he has chosen to wed. A

series of misfortunes causes Banda to lose both his crop and his bride-to-be. As he makes his way to the city, Banda is witness to a changing Africa.
