A masterful combination of traditional inspiration with contemporary elegance. The sensibility of interior design firm Nickey Kehoe ranges from minimal to maximal, quiet to baroque, but always seeks to express the ephemeral feeling of a space. Designers Todd Nickey and Amy Kehoe are fascinated by how a room can come together to express its own persona, as though the design "just happened." Describing themselves as object-obsessed observers, Nickey and Kehoe pay keen attention to their clients' passions, preferences, and beloved pieces, juxtaposing elements and styles in deceptively simple ways. The result is interior design that appears as if it were a personal collection randomly put together, when in fact it is the product of their very mindful curating. Nickey Kehoe's studied but unfussy design is elegant but never staid, proud but humble, full of detail but resplendent with negative space. And then they add a bit of the unexpected--a combination of layered patterns and palettes, different time periods, humorous gestures, clever lighting--any element that keeps their impeccable sense of balance from becoming predictable or formulaic. This collection of residential interiors is for the curious, for lovers of studied but unfussy design, and for those who appreciate being surrounded by

beautiful things with a story to tell.

How should we treat non-human animals? In this immensely powerful and influential book (now with a new introduction by Sapiens author Yuval Noah Harari), the renowned moral philosopher Peter Singer addresses this simple question with trenchant, dispassionate reasoning. Accompanied by the disturbing evidence of factory farms and laboratories, his answers triggered the birth of the animal rights movement. 'An extraordinary book which has had extraordinary effects... Widely known as the bible of the animal liberation movement' Independent on Sunday In the decades since this landmark classic first appeared, some public attitudes to animals may have changed but our continued abuse of animals in factory farms and as tools for research shows that the underlying ideas Singer exposes as ethically indefensible are still dominating the way we treat animals. As Yuval Harari's brilliantly argued introduction makes clear, this book is as relevant now as the day it was written.

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world.

Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.
