Chicago Paul Theobald
"There is no one quite

like Barbara Kingsolver
in contemporary
literature," raves the
Washington Post Book
World, and it is right.
She has been
nominated three times
for the ABBY award,
and her critically
acclaimed writings
consistently enjoy
spectacular
commercial success as

they entertain and touch her legions of loyal fans. In *High Tide* in Tucson, she returns to her familiar themes of family, community, the common good and the natural world. The title essay considers Buster, a hermit crab that accidentally stows away on Kingsolver's return trip from the Bahamas to her desert home, and turns out to have manic-depressive tendencies. Buster is running around for all he's worth -- one can only presume it's high tide in Tucson. Kingsolver brings a moral vision and refreshing sense of humor to subjects ranging from modern motherhood to the history of private property to the suspended citizenship of human beings in the

Animal Kingdom. Beautifully packaged, with original illustrations by well-known illustrator Paul Mirocha, these wise lessons on the urgent business of being alive make it a perfect gift for Kingsolver's many fans.

The Vertigo Years

Chihuly Workshop
Genette uses Proust's *Remembrance of Things Past* as a work to identify and name the basic constituents and techniques of narrative. Genette illustrates the examples by referring to other literary works. His systemic theory of narrative deals with the structure of fiction, including fictional devices that go unnoticed and whose implications fulfill the Western narrative tradition.

LIVRES DU MOIS JUIL-AOUT 1999 7-8 FeniXX
 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an

unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a

path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Bibliographie nationale française BoD - Books on Demand
South Korea in the 1950s was home to a burgeoning film culture, one of the many “Golden Age cinemas” that flourished in Asia during the postwar years. Cold War

Cosmopolitanism offers a transnational cultural history of South Korean film style in this period, focusing on the works of Han Hyung-mo, director of the era’s most glamorous and popular women’s pictures, including the blockbuster *Madame Freedom* (1956).

Christina Klein provides a unique approach to the study of film style, illuminating how Han’s films took shape within a “free world” network of aesthetic and material ties created by the legacies of Japanese colonialism, the construction of US military bases, the waging of the cultural Cold War by the CIA, the forging of regional political alliances, and the import of popular cultures from around the world. Klein combines nuanced

readings of Han's sophisticated style with careful attention to key issues of modernity—such as feminism, cosmopolitanism, and consumerism—in the first monograph devoted to this major Korean director. A free open access ebook is available upon publication. Learn more at www.lumino.org. Echanges Routledge C'est l'histoire d'India, une petite fille comme les autres qui aime courir et grimper aux arbres. Puis, un jour, elle se met à tomber, de plus en plus souvent... Et tout bascule. C'est l'histoire d'India, une adolescente pas comme les autres. Elle est devenue si faible qu'elle ne peut plus s'habiller seule. Les

traitements et les effets secondaires s'enchaînent. Après des années d'errance, le diagnostic tombe comme un couperet : SMA-PME, une maladie neurodégénérative rarissime et incurable. Parce qu'aucun traitement n'existe alors, India décède à l'âge de 16 ans, en 2013. Comment survivre à l'inimaginable ? Au fil des pages, Lesley Buxton partage l'histoire d'une mère qui, un jour après l'autre, affronte l'inconcevable ; l'histoire de six années de lutte, entre joie, espoir et douleur. En 2019, en France, la SMA-PME est diagnostiquée chez une autre jeune fille. Refusant la fatalité, ses parents créent Asap for Children pour

regrouper les familles concernées et mobiliser la recherche médicale. Malgré les grandes avancées scientifiques, elle décède au printemps 2023, alors qu'un traitement innovant est à portée de main. Malheureusement, son coût de production très élevé entrave l'espoir de guérison des enfants touchés par la SMA-PME. Rendez-vous sur : www.asapforchildren.org À PROPOS DE L'AUTRICE Lesley Buxton a étudié l'art dramatique à la Mountview Theatre School de Londres, en Angleterre, et est titulaire d'une maîtrise en non-fiction créative de l'Université du King's College à Halifax, en Nouvelle-Écosse. Elle a travaillé comme dramaturge,

auteure de courtes fictions, chroniqueuse de journal et critique de théâtre. Son livre "One Strong Girl" a remporté le premier prix Pottersfield pour la non-fiction créative, en 2018.

Textilforum MIT Press
As nations race to hone contact-tracing efforts, the world's experts consider strategies for maximum transparency and

impact. As public health professionals around the world work tirelessly to respond to the COVID-19 pandemic, it is clear that traditional methods of contact tracing need to be augmented in order to help address a public health crisis of unprecedented scope. Innovators worldwide are racing to develop and implement novel public-facing technology solutions, including digital contact tracing technology. These technological products may aid public health surveillance and containment strategies for this pandemic and become part of the larger toolbox for future infectious outbreak prevention and control. As technology evolves in

an effort to meet our current moment, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies—a rapid research and expert consensus group effort led by Dr. Jeffrey P. Kahn of the Johns Hopkins Berman Institute of Bioethics in collaboration with the university's Center for Health Security—carried out an in-depth analysis of the technology and the issues it raises. Drawing on this analysis, they produced a report that includes detailed recommendations for technology companies, policymakers, institutions, employers, and the public. The project brings together perspectives from bioethics, health

security, public health, technology development, engineering, public policy, and law to wrestle with the complex interactions of the many facets of the technology and its applications. This team of experts from Johns Hopkins University and other world-renowned institutions has crafted clear and detailed guidelines to help manage the creation, implementation, and application of digital contact tracing. Digital Contact Tracing for Pandemic Response is the essential resource for this fast-moving crisis. Contributors: Joseph Ali, JD; Anne Barnhill, PhD; Anita Cicero, JD; Katelyn Esmonde, PhD; Amelia Hood, MA; Brian Hutler, PhD, JD; Jeffrey P. Kahn, PhD, MPH; Alan

Regenberg, MBE; Crystal Watson, DrPH, MPH; Matthew Watson; Robert Califf, MD, MACC; Ruth Faden, PhD, MPH; Divya Hosangadi, MSPH; Nancy Kass, ScD; Alain Labrique, PhD, MHS, MS; Deven McGraw, JD, MPH, LL.M.; Michelle Mello, JD, PhD; Michael Parker, BEd (Hons), MA, PhD; Stephen Ruckman, JD, MSc, MAR; Lainie Rutkow, JD, MPH, PhD; Josh Sharfstein, MD; Jeremy Sugarman, MD, MPH, MA; Eric Toner, MD; Mar Trotochaud, MSPH; Effy Vayena, PhD; Tal Zarsky, JSD, LL.M., LL.B. *The Structuring of Organizations* ABRAMS Examines how changes from the Industrial Revolution prior to World War I brought about radical transformation in society, changes in

education, and massive migration in population that led to one of the bloodiest events in history.

One for the Road JHU Press

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the

immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on

Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities.

Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

Patchworks sans couture sur carton-mousse Fondation Ipsen BookLab
Architecture and the arts have long been on the forefront of socio-spatial struggles, in which equality, access, representation and expression are at stake

in our cities, communities and everyday lives. Feminist spatial practices contribute substantially to new forms of activism, expanding dialogues, engaging materialisms, transforming pedagogies, and projecting alternatives. 'Feminist Futures of Spatial Practice' traces practical tools and theoretical dimensions, as well as temporalities, emergence, histories, events, durations ? and futures ? of feminist practices. 0Authors include international practitioners, researchers, and educators, from architecture, the arts, art history, curating, cultural heritage studies, environmental sciences, futures studies, film, visual

communication, design and design theory, queer, intersectional and gender studies, political sciences, sociology, and urban planning. Established as well as emerging voices write critically from within their institutions, professions, and their activist, political and personal practices. French books in print, anglais Rowman & Littlefield Building on experience from 60 countries worth of independent travel, the author takes you on three journeys to places you may never have considered visiting, although you probably should and you definitely could. Learn about a low-budget cruise to Antarctica, understand what the Trans-Siberian Railway really

is like, enjoy the natural wonders of Southern Africa. The book is a fun read, but you will also learn about far-away destinations and about how to travel independently anywhere. It's not a travel guide or a travel journal, it's both! Feminist Futures of Spatial Practice Basic Books (AZ)

Japan's impact on the modern world has been enormous. It occupies just one 300th of the planet's land area, yet came to wield one sixth of the world's economic power. Just 150 years ago it was an obscure land of paddy fields and feudal despots. Within 50 years it became a major imperial power - it's so-called 'First Miracle'. After defeat in the Second World War, when Japan came close to annihilation, within

25 years it recovered remarkably to become the world's third biggest economy – it's 'Second Miracle'. It is now not only an economic superpower, but also a technological and cultural superpower. True miracles have no explanation: Japan's 'miracles' do. The nation's success lies in deeply ingrained historical values, such as a pragmatic determination to succeed. The world can

learn much from Japan, and its story is told in these pages. Covering the full sweep of Japanese history, from ancient to contemporary, this book explores Japan's enormous impact on the modern world, and how vital it is to examine the past and culture of the country in order to fully understand its achievements and responses. Now in its third edition, this book is usefully updated and revised.
