This survey provides a brief and selective overview of research in the philosophy of mathematics education. It asks what makes up the philosophy of mathematics education, what it means, what questions it asks and answers, and what is its overall importance and use? It provides overviews of critical mathematics education, and the most relevant modern movements in the philosophy of mathematics. A case study is provided of an emerging research tradition in one country. This is the Hermeneutic strand of research in the philosophy of mathematics education in Brazil. This illustrates one orientation towards research inquiry in the philosophy of mathematics education. It is part of a broader practice of

‘philosophical archaeology’: the uncovering of hidden assumptions and buried ideologies within the concepts and methods of research and practice in mathematics education. An extensive bibliography is also included.

Barnaby Lenon, a former schoolmaster and headmaster who is chair of the Independent Schools Council, takes an in-depth look at the elements that make

up a successful school. He examines leading and latest research on school leadership and management; looks at how teachers, pupils, parents and governors can achieve results; and puts the spotlight on subjects, exam systems and social mobility. For his research, he visited a number of schools that are achieving outstanding results: John Perryn Primary School, Acton; Tollgate Primary School, Newham; King Solomon Academy, Marylebone; Burlington Danes Academy, Hammersmith; West London Free School, Hammersmith; Michaela Community School, Wembley; St Mary Magdalene Academy, Islington; Dixons Kings Academy, Bradford; Tauheedul Boys' School, Blackburn; London Academy of Excellence, Newham; and Brighton College. His analysis of their

innovations and achievements provides an insight into some of England's most successful schools.
