Think you need a patent? Think again. Many of the products Stephen Key has licensed required no intellectual property protection whatsoever, yet have made millions in royalties. But Key also knows what it takes to protect a big idea. Years ago, after reading about how medication bottles rarely contain enough space for the information that needs to be printed on them, he was inspired to develop an innovative label technology. The Spinformation rotating label has been licensed on products the world over, is protected by 20 U.S. and international patents, and has received more than 13 industry awards. To put it simply: Key knows how to use intellectual property to profit. This book will teach you how to:

- Get a licensing contract with or without intellectual property
- Write a provisional patent application that stops others from stealing your idea
- Find and hire a killer patent attorney (they are not all created equal!)
- Save thousands of dollars on legal expenses
- File patents that have true value
- Negotiate a win-win agreement

It also details Stephen's experience defending his patents in Federal Court—a David versus Goliath saga he has never before written about at length—as well as provides tips about how to avoid a licensing contract from going bad.

An electrifying biography of one of the most extraordinary scientists of the twentieth century and the world he made. The smartphones in our pockets and computers like brains. The vagaries of game theory and evolutionary biology. Nuclear weapons and self-replicating spacecrafts. All bear the fingerprints of one remarkable, yet largely overlooked, man: John von Neumann. Born in Budapest at the turn of the century, von Neumann is one of the most influential scientists to have ever lived. A child prodigy, he mastered calculus by the age of eight, and in high school made lasting contributions to mathematics. In Germany, where he helped lay the foundations of quantum mechanics, and later at Princeton, von Neumann's colleagues believed he had the fastest brain on the planet—bar none. He was instrumental in the Manhattan Project and the design of the atom bomb; he helped formulate the bedrock of Cold War geopolitics and modern economic theory; he created the first ever programmable digital computer; he prophesized the potential of nanotechnology; and, from his deathbed, he expounded on the limits of brains and computers—and how they might be overcome. Taking us on an astonishing journey, Ananyo Bhattacharya explores how a combination of genius and unique historical circumstance allowed a single man to sweep through a stunningly diverse array of fields, sparking revolutions wherever he went. *The Man from the Future* is an insightful and thrilling intellectual biography of the visionary thinker who shaped our century.

Awarded "Special Recognition" by the 2018 Robert F. Kennedy Book & Journalism Awards Finalist for the American Bar Association's 2018 Silver Gavel Book Award Named one of the "10 books to read after you've read Evicted" by the Milwaukee Journal Sentinel "Essential reading for anyone trying to understand the demands of social justice in America."—Bryan Stevenson, author of Just Mercy Winner of a special Robert F. Kennedy Book Award, the book that Evicted author Matthew Desmond calls "a powerful investigation into the ways the United States has addressed poverty . . . lucid and troubling" In one of the richest countries on Earth it has effectively become a crime to be poor. For example, in Ferguson, Missouri, the U.S. Department of Justice didn't just expose racially biased policing; it also exposed exorbitant fines and fees for minor crimes that mainly hit the city's poor, African American population, resulting in jail by the thousands. As Peter Edelman explains in

Not a Crime to Be Poor, in fact Ferguson is everywhere: the debtors' prisons of the twenty-first century. The anti-tax revolution that began with the Reagan era led state and local governments, starved for revenues, to squeeze ordinary people, collect fines and fees to the tune of 10 million people who now owe \$50 billion. Nor is the criminalization of poverty confined to money. Schoolchildren are sent to court for playground skirmishes that previously sent them to the principal's office. Women are evicted from their homes for calling the police too often to ask for protection from domestic violence. The homeless are arrested for sleeping in the park or urinating in public. A former aide to Robert F. Kennedy and senior official in the Clinton administration, Peter Edelman has devoted his life to understanding the causes of poverty. As Harvard Law professor Randall Kennedy has said, "No one has been more committed to struggles against impoverishment and its cruel consequences than Peter Edelman." And former New York Times columnist Bob Herbert writes, "If there is one essential book on the great tragedy of poverty and inequality in America, this is it."
