The Bibliographical Decameron

Nineteenth-century California was not a destination for the faint of heart, and Frenchmen are usually said to prefer their slippers to their traveling boots. Yet many visitors from France--starting in 1786 with legendary explorer Count de LapAA(c)rouse--made their way to the remote and beautiful territory, leaving enduring accounts and images of their experience. As France's troubled revolutionary era began in the 1840s, tens of thousands of Frenchmen journeyed to California's goldfields. Some found wealth, others freedom, and some death. Many remained in San Francisco, helping shape the city and make it French from the inside.

Bibliomania, the almost obsessive collecting of rare books and early editions by the aristocracy, which peaked in 1812 with the sale of the Valdarfer Boccaccio, was fuelled in no small part by the work of the bibliographer Thomas Frognall Dibdin (1776-1847). His most famous book, Bibliomania,

popularised the word's use in England. The present work was first published in three volumes in 1817 and may be considered a continuation of Bibliomania in both style and content. Using a dialogue format with extensive footnotes, it covers all aspects of bibliography from early illuminated manuscripts and printed books through to contemporary book collectors and auctions. The work is notable for the number and quality of its illustrations. Volume 2 presents the rise and progress of printing, particularly on the Continent, and a survey of the history of bookbinding. Dibdin's Bibliomania (revised edition, 1811) and his Reminiscences of a Literary Life (1836) are also reissued in this series.
