## CARLO CRUZ

**Whitaker's Cumulative Book List** Rama  
 The conference on 'Interdisciplinary Research in Technology and Management' was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme. By attempting to bring diverse inter-related topics on a common platform, the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well. The spectrum of topics covered in the

research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day.

Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A-Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives, as their outcomes are principal determinants of young people's future prospects. These examinations are external--they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as 'blind' arbiters of student achievement, providing the proverbial 'level playing field' which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters, regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up, from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever-higher social demand for access to higher levels of formal education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems (including the modification and, in some instances, abandonment of external examinations). This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies, which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of 'external examinations beyond national borders', including a contribution by the International Baccalaureate Organisation. A defining

feature of the work is the attention it pays to what it calls the 'nuts and bolts' of external examinations, from question-setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons--it is accessible to teachers and interested laypeople, as well as to academics."

**Research in Education** Springer Science & Business Media

My autobiography is a record of my life and interactions with many interesting people over the course of my work. This involved key industries and organisations like Keppel Corp, Wearnes, Natsteel, SPH, UOB, LTA, JTC, and SSO. Having the good fortune to meet many prominent Singaporeans such as Tan Chin Tuan, Wee Cho Yaw as well as Mr Lee Kuan Yew, Dr Goh Keng Swee, Dr Toh Chin Chye, Mr Lim Kim San and SR Nathan, allowed me not only a good perspective of various industries and businesses but also how some of these eminent statesmen think. They moulded my view of life. I've also gone through a wide range of experiences from changes in governments, impact of technology on our daily lives, changes in entertainment media to various life-threatening crises. I hope this unique compendium would be of interest to younger readers, growing up in a new and different world, but knowing how we got here, and why.

In recent times, there has been intense global interest on and scrutiny of Islamic education. In reforming Islamic schools, what are the key actions initiated and are

they contested or negotiated by and among Muslims? This edited collection brings together leading scholars to explore current reforms in Islamic schools. Drawing together international case studies, Reforms in Islamic Education critically discusses the reforms, considering the motivations for them, nature of them and perceptions and experiences of people affected by them. The contributors also explore the tensions, resistance, contestations and negotiations between Muslims and non-Muslims, and among Muslims, in relation to the reforms. Highlighting the need to understand and critique reforms in Islamic schools within broad historical, political and socio-cultural contexts, this book is a valuable resource for academics, policymakers and educators.

**Explanation by Rama Publishers** Rama

This volume represents an edited selection of papers presented at the International symposium on the geology of tin deposits held in Nanning City in October 1984. It documents a great advance in our knowledge of tin deposits, particularly of the People's Republic of China. Details are presented in English for the first time on the major tin-polymetallic sulphide deposits of Dachang and Gejiu, which bear similarities to the deposits of Tasmania, but are little known to the geological community outside of China. The publication of this volume was sponsored by the United Nations ESCAP Regional Mineral Resources Development Centre (RMRDC), now a Regional Mineral Resources Development Project (RMRDP) within ESCAP. The Centre had previously published a report on the Symposium in Nanning City and the following field trip to the Dachang tin-polymetallic sulphide deposit of Guangxi, entitled "Report on the International Symposium on the Geology of Tin Deposits: Nanning and Dachang, China, 27 October - 8 November 1984". It is my privilege to acknowledge the help provided by Dr. J. F. McDivitt and Dr. H. W. Gebert, co-ordinator of ESCAP-RMRDC. *Papers on Echinoidea, Fishes, and Copeda* World Scientific

The spread, functions and models of the New Englishes have become a dominant theme of the eighties. This volume

addresses, specifically, the English used in Singapore in the private and public domains, particularly the school system. The topics covered include: an overview of earlier studies and attempts at codification; a consideration of whether the formal mode of written Singapore English should be standardised; the problems of pronunciation; etc. and specific lexico-grammatical problems

which have proved to be ambiguous for those not familiar with Singapore English. Also included in this volume is the largest bibliography so far published on Singapore English with over 700 titles listed, thus providing an essential tool for any future research.
