 In this book
 Rita talks
 about what it
 means to be
 psychic,
 where her gift
 comes from
 and how she
 uses her
 powers to help
 others, with
 the emphasis

is on the supernatural and paranormal. Rita examines subjects such as seances, Tarot, 'ghosts', premonitions, curses, hauntings and possessions. Mysteries also details the numerous trails that Rita has followed in her life as a medium. This involves her work with the police and army, the murders she has helped families solve, and the missing people (dead or alive) she has located.

She also talks about helping people find wills, money, objects and how she has diagnosed illness. Following Rita's extraordinary career, and reading her astonishing stories, the 'other' world no longer feels quite so far away. *Special Air Warfare and the Secret War in Laos* Doubleday Books 'One of the more earnest and interesting writers of his generation.' - The Guardian

'Readable to an almost hypnotic degree . . . absorbing and exciting.' - Sphere 'Some really good narrative . . . impressive.' - New Statesman As a child, the brilliant mathematical prodigy Hugh Greene's two major influences were his eccentric old uncles, Nick and Sam. From Uncle Nick, Hugh learned a love of mathematics, which came to represent clarity and order, and

from Uncle Sam he acquired an overwhelming fear of violence. Now seventeen and unsure of what to do with his life and whether life is even worth bothering with at all, Hugh finds his hatred of violence becoming even more intense when he witnesses a gang of brutal thugs beating an innocent man. Determined to protect himself, he purchases a gun and joins a pistol club.

But when he becomes involved with a senseless shooting and gets mixed up with a group of criminals, including a sex murderer, Hugh will be forced to confront the question of whether his mathematics and philosophy have any relevance in a world of violence. . . . Colin Wilson's third novel, *The World of Violence* (1963), is a fascinating and gripping story that critic Sidney Campion

called 'one of the most complex and satisfying bildungsromans ever written in English.' This new edition of Wilson's brilliant novel, the first in more than twenty years, includes a new introduction by Nicolas Tredell. Colin Wilson in one fantastic volume. Containing extracts from Wilson's work on existentialism, criminology, psychology and the occult, this is an invaluable introduction to one of the late twentieth-century's most incisive thinkers. This is a new edition of the classic Colin Wilson collection The Essential Colin Wilson (first published in 1985), updated and introduced by Wilson's bibliographer	Colin Stanley. It is the only book to contain extracts from Colin Wilson's most important work in one volume, including The Outsider (1956), A Criminal History of Mankind (1983), The New Existentialism (1966), The Occult (1971), New Pathways in Psychology (1972) and Mysteries (1978), as well as three of his novels and many other texts. Subjects covered include	existentialism, criminology, psychology, consciousness studies, the occult and much more. This second edition includes all of the original volume plus six essential post-1985 essays and chapters chosen by Stanley and other Colin Wilson experts including Gary Lachman. These essays provide a much needed update covering aspects of Wilson's work from the 28 years that followed the

publication of the first edition to his death in December 2013. This is an invaluable introduction for those approaching one of the late twentieth century's most incisive thinkers for the first time and also a timely reminder, to Colin Wilson's many fans and scholars worldwide, of a unique and challenging body of work. Mysteries Watkins Media Limited The mystic's moment of illumination

shares with great poetry the liberating power of the deepest levels of consciousness . In the words of William Blake, "If the doors of perception were cleansed, everything would appear to a man as it is, infinite." Poetry, Wilson argues, is a contradiction of the habitual prison of daily life and shows the way to transcend the ordinary world through an act of intense attention-and intention. The poet, like the

mystic, is subject to sudden ""peak experiences"" when ""everything we look upon is blessed."" W.B. Yeats, Dostoevsky, Gautama Buddha, Kazantzakis, Van Gogh, Rupert Brooke, Arunja, Nietzsche, A.L. Rouse, Jacob Boehme, Suzuki, Edgar Allan Poe: their visionary understanding can generate an awareness in each of us of our potential to open the floodgates of inner energy

that creates mystic experience. Colin Wilson first received international acclaim in 1956 for *The Outsider*. "Ever since I was thirteen, I have been obsessed by the question of the nature of mystical experience," he writes, and from that time he has been on a quest of the mystical in poetry, religion, and psychology. *A Criminal History of Mankind* Del Rey This follow-up to the international

bestseller, *The Occult*, is essential reading for anyone interested in the mystical and the paranormal—from ESP and clairvoyance to poltergeists and spirit possession. Colin Wilson has explored the paranormal universe ever since he researched his first highly successful work, *The Occult*—hailed as "the most interesting, informative and thought-provoking book on the subject" The

Sunday Telegraph). Now, he offers an even wider examination of the mystical and paranormal. The result is a thoroughly convincing general theory of the occult. Wilson powerfully posits that our so-called "normal" experience may in fact be subnormal, and that evolution has brought us near the edge of a quantum leap into a hugely expanded human consciousness. Combining

fascinating glimpses into the paranormal world with the latest scientific thinking on the nature of "physical reality," he reveals the usually unseen powers of the human mind and discusses why he has become convinced that disembodied spirits do exist.

The Philosopher's Stone

Penguin
Colin Wilson's first book *The Outsider* was published to

great critical acclaim in May 1956. It was the first of six philosophical books, known collectively as *The Outsider Cycle* (TM), compiled by Wilson during the following decade. A summary volume, *Introduction to the New Existentialism*, appeared in 1966. During the 1970s, however, Wilson's interests became, on the surface, more varied, publishing books on criminology,

psychology and the occult. But he always maintained a philosophical stance, irrespective of subject matter, and continued to write purely philosophical essays for journals, magazines, and symposia. This volume brings together, for the first time, his essays on seventeen philosophers, including some of those he met personally to discuss their ideas. In his essay on Spinoza he

wrote: "Philosophers are never so entertaining as when they are beating one another over the head. It is that statement, applied to this particular volume, that makes these essays, from England's only home-grown existential philosopher, so eminently readable, entertaining, instructive and, sometimes, controversial. *Starseekers* Monkfish Book

Publishing International Bestseller: The essential guidebook to the history of magic and occultism—"the most interesting, informative, and thought-provoking book on [the occult]" (The Sunday Telegraph) Colin Wilson's great classic work is a comprehensive history of mystery and magic. His genius lies in producing a skillful synthesis of the available material; clarifying without

simplifying, seeing the occult in the light of reason and reason in the light of the mystical and paranormal. It is a journey of enlightenment—a wide-ranging survey of the whole subject and an insightful exploration of Man's latent powers. Republished two years after the author's death, and with a new foreword by bibliographer Colin Stanley, Wilson brings his own refreshingly optimistic and

stimulating interpretation to the worlds of the paranormal, the occult, and the supernatural.

'He writes a clear, light prose, and he makes his interests, however bizarre, seem important.' - Punch 'One of the more earnest and interesting writers of his generation.' - The Guardian 'He has the kind of story-telling power which could charm the

birds off the trees.' - The Journal (Newcastle upon Tyne) Gerard Sorme has been hired by a New York publisher to edit a book on Esmond Donelly, notorious 18th-century Irish rake, friend of Rousseau, Boswell and Horace Walpole, and author of a bawdy work on the deflowering of virgins. Sorme's quest for information on Donelly takes him to the home of a

pyromaniac and flagellant in Baton Rouge, the labyrinthine corridors of the British Museum, and a remote castle in Ireland. As he digs deeper into the mystery of Donelly, Sorme uncovers a tale of intrigue, conspiracy, and murder involving a secret society, the Sect of the Phoenix, that dates back to medieval times. But the Sect still exists, and Sorme's researches

have not gone unnoticed by powerful men who have their own reasons for wanting the truth about Esmond Donnelly to remain hidden. . . . The God of the Labyrinth (1970), the third book of Wilson's 'Gerard Some trilogy', is a novel in the mode of Jorge Luis Borges that explores two of Wilson's major interests - philosophy and sex - in the form of a thrilling literary mystery. This

edition, the first in more than 30 years, includes a new introduction by Gary Lachman and the original afterword by the author, in which he discusses the role of sex in literature and defends his work against charges of pornography. The Age of Defeat Vintage Via paleontology and ritual cannibalism, Wilson's tour through time and space sets out to reconstruct that ancient

knowledge. In a fascinating exploration of the remote depths of history, From Atlantis to the Sphinx takes us from the structure of the pyramids and the purpose of their tortuous interior shafts, to the prehistoric cities of America by way of ancient sea maps apparently showing the outlines of Antarctica before it was covered by ice.

Beyond the Robot
Weidenfeld & Nicolson

Wilson has blended H.P. Lovecraft's dark vision with his own revolutionary philosophy and unique narrative powers to produce a stunning, high-tension story of vaulting imagination. A professor makes a horrifying discovery while excavating a sinister archaeological site. For over 200 years, mind parasites have been lurking in the deepest layers of human consciousness

, feeding on human life force and steadily gaining a foothold on the planet. Now they threaten humanity's extinction. They can be fought with one weapon only: the mind, pushed to--and beyond--its limits. Pushed so far that humans can read each other's thoughts, that the moon can be shifted from its orbit by thought alone. Pushed so that man can at last join battle with the

loathsome parasites on equal terms. **Tales of the Cthulhu Mythos** City Lights Books In 1971 a curious new character appeared on the London academic scene, her name was Charlotte Bach. She was a former lecturer at the University of Budapest and she had a new theory of sex and evolution. At the height of her cult status, she would be compared to Einstein and Freud. *Rogue*

The God of the

Labyrinth Pan Macmillan Colin Wilson's (1931-2013) first book, 'The Outsider', was published in 1956. It brought him instant recognition as one of the most radical thinkers of his generation. 'Brandy of the Damned' was first published in 1964, and in revised form in 1967. In this book Wilson navigates a fascinating journey through the world of music, providing insights into Mozart and Beethoven, provocatively tackling what was then the 'modern' music of Schoenberg and Stravinsky, and speculating on the nature and spirit of jazz and many other musical subjects. Foruli Classics - classic music and popular culture books reborn. *The Personality Surgeon* Kogan Page Publishers "The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown." --H. P. LOVECRAFT, "Supernatural Horror in Literature" Howard Phillips Lovecraft forever changed the face of horror, fantasy, and science fiction with a remarkable series of stories as influential as the works of Poe, Tolkien, and Edgar Rice Burroughs. His chilling mythology established a gateway between the

known universe and an ancient dimension of otherworldly terror, whose unspeakable denizens and monstrous landscapes--dread Cthulhu, Yog-Sothoth, the Plateau of Leng, the Mountains of Madness--have earned him a permanent place in the history of the macabre. In *Tales of the Cthulhu Mythos*, a pantheon of horror and fantasy's finest authors pay tribute to the master of the macabre

with a collection of original stories set in the fearsome Lovecraft tradition: *The Call of Cthulhu* by H. P. Lovecraft; *The slumbering monster-gods return to the world of mortals.* *Notebook Found in a Deserted House* by Robert Bloch: A lone farmboy chronicles his last stand against a hungry backwoods evil. *Cold Print* by Ramsey Campbell: An

avid reader of forbidden books finds a treasure trove of deadly volumes--available for a bloodcurdling price. *The Freshman* by Philip José Farmer: A student of the black arts receives an education in horror at notorious Miskatonic University. PLUS EIGHTEEN MORE SPINE-TINGLING TALES! *Dreaming to Some Purpose* Watkins In this intense and revealing essay, Wilson analyses our

literary heritage from the standpoint of existential criticism. Using specific examples and detailed biographical data, he reveals a fact that we tend to ignore: that almost all modern literature is an ode to despair, a stubborn cult to the man in the street, to the defeated, the loser. The prevailing romantic disability we suffer has diminished the stature of man to unforeseen levels. The imagination to

which Wilson appeals in this book is a power capable of transcending the immediate, of freeing us from the limits of what is possible. Those who can imagine in this way have dominion over the earthly world and for that reason alone are liberated from the futility of the ordinary. To imagine is to invoke the impossible, to reject things as they are and dare to shape them as they should be. "...art in

the twentieth century - literary art in particular - has ceased to take itself seriously as the primary instrument of existential philosophy. It has ceased to regard itself as an instrument for probing questions of human significance. Art is the science of human destiny." Colin Wilson "Existential criticism is therefore the attempt to judge works of art by the contribution they make to

the science of living, to judge them by standards of meaning as well as impact." Colin Wilson	Books Charles Peruzzi, a general practitioner in London's East End, finds himself the proponent of a revolutionary	method of psychological therapy using computers to cure patients by breaking their personalities apart and restructuring them
