Corporate social responsibility (CSR) is setting new missions for companies and shining a welcome light on issues such as the behaviour of board members, shared value, the well-being of stakeholders, the protection of vulnerable individuals and the roles played by public opinion and shareholders. This timely book seeks to lay the foundations for a sustainable corporate governance based on the European Commission definition of CSR as 'the responsibility of enterprises for their impacts on society'. More generally, this sustainable corporate governance responds to some of the pressing challenges of the 21st century, from sustainable finance and climate change to carbon reduction and population growth.

Both Leibniz and Humboldt are scholars in whose work we find a passionate interest in the history and development of languages combined with a strong theoretical commitment. Linking their names to linguistic comparativism draws attention to the contribution these scholars have made to the history of comparativism and also promotes discussion of the relationship of theory and practice in

linguistic research in more general terms. In September 1986, a conference on Leibniz, Humboldt and the Origins of Comparativism' was held in Rome. The papers included in this volume are revised versions of the papers presented at the conference.

The true nature and functions of a pioneer battalion were never fully understood during the war either by military or laymen. Pioneers pioneers, mused a red-hatted Staff Captain to me the other day. Sort of labor battalion, aren't you? We sure are! I agreed. These words, written by Captain R. Ede England, who served with 12th King's Own Yorkshire Light Infantry during the whole of the Great War, are as true today as they were when he wrote the original history of the battalion in the early 1920s. Little is known, or understood, of the contribution made by the many thousands of men who served with the original Pioneer battalions. Building and repairing roads, bridges, railway lines, gun emplacements, and laying barbed wire to protect the Front Line, were just some of the tasks that they performed on a regular basis. Fortunately, the subject of the British Army's logistical support in the war zone during the new industrialized warfare that developed between 1914 and 1918 is now being examined in greater detail. *Miners Battalion, A History of the 12th (Pioneers) Kings Own Yorkshire Light Infantry 1914-1918* follows the battalion throughout the war and shows how the men, mainly Yorkshire miners, applied their civilian skills to the purposes of war. It also reveals that in 1918, when forced to fight as infantrymen, the battalion performed with distinction, gaining the nickname, 'the Yorkshire Guards'.

After being dominant during about a century since its invention by Baudouin de Courtenay at the end of the nineteenth century, morpheme is more and more replaced by lexeme in contemporary descriptive and theoretical morphology. The notion of a lexeme is usually associated with the work of P. H. Matthews (1972, 1974), who characterizes it as a lexical entity abstracting over individual inflected words. Over the last three decades, the lexeme has become a cornerstone of much work in both inflectional morphology and word formation (or, as it is increasingly been called, lexeme formation). The papers in the present volume take stock of the descriptive and theoretical usefulness of the lexeme, but also address many of the challenges met by classical lexeme-based theories of morphology.
