Fliegende Blätter Der Berggeist Illustriertes Briefmarken-Journal Das Postwertzeichen Florenz
A vibrantly illustrated official guide to everything unicorn-related, from the Magical Unicorn Society. After centuries of mystery, the mythical Magical Unicorn Society has published its official handbook. These learned lovers of unicorns have created a veritable treasure trove of unicorn lore—the facts, the fiction, the where, why and what of these elusive creatures. Discover where unicorns really live around the world, how to find them, and what they eat Learn how to look after them, what powers they have, how to tempt them, train them, and even ride them, and so much more. With breathtaking artwork from Helen Dardik and Harry and Zanna

Goldhawk, this special book is the ultimate gift for true believers.

The Snail Soup Can Decoy to keep the candy stash safe. The Customizable "Keep Out" Sign to deter meddlesome siblings and parents. A Bunk Bed Communicator made from cardboard tubes ("Psst! Can you keep the snoring down?"). Clever, whimsical, and kind of genius, here are 67 unique projects that will turn any dad with DIY leanings into a mad scientist hero that his kid(s) will adore. No screens, no hi-tech gadgetry. Made by Dad combines the rough-edged, handmade ethos of a Boy Scout manual or The Dangerous Book for Boys with a sly sense of humor that kids love. Scott Bedford, a creative director by day and Webby Award-winning blogger by nights and weekends, wields an X-ACTO knife, magic marker, and prodigious imagination to create endlessly delightful projects for his two sons. He knows that kids like contraptions and gadgets, things that are

surprising—a chair that appears to be balanced on eggshells. Things that are complex—a multilevel city, with buildings, tunnels, and roads, built from old boxes around the legs of a table. And especially things with humor—the Snappy Toast Rack, made to resemble a crocodile's gaping mouth. The projects are shown in full-color photographs, and the instructions are illustrated in detailed line drawings that exude personality. Some are quick and simple enough to be done in a coffee shop; others are more of an afternoon project—yielding hours and hours of rich, imaginative playtime.

Die Uffizien, der sagenhafte Dom, die Kirchen, die Paläste der Medici, Florenz ist eine der kunstvollsten und kunstsinnigsten Städte der Welt. Doch ist das Zentrum der Toscana auch eine Stadt der Gegenwart, die für pulsierende Lebensfreude und Lebensart alla italiana steht. In 15 »Direkt-Kapiteln« führt Autorin Michaela Namuth Besucher direkt zu den

Highlights der Stadt und hilft, ihr Wesen zu entdecken: Treffpunkt Ponte Vecchio; Kunstgalerie Uffizien; Piazza della Signoria; Dom, Campanile und Baptisterium; Piazza della Repubblica und Dante-Viertel; rund um die Via Tornabuoni; Santa Maria Novella; Mercato Centrale di San Lorenzo; Medici im Viertel San Lorenzo; Studentenviertel San Marco; rund um Santa Croce; San Miniato al Monte; Palazzo Pitti und Giardino di Boboli; Renaissance-Tempel - S. Spirito und Sta. Maria del Carmine; Oltrarno-Viertel. Rund 200 handverlesene Adressen für jede Laune, jeden Geschmack, jeden Geldbeutel, von der Übernachtung über Essen und Trinken sowie Einkaufen bis Ausgehen lassen den Citytrip zum Erlebnis werden. Jede Adresse ist mit einem Schlagwort versehen - das erleichtert die schnelle Orientierung. Im großen separaten Cityplan sind alle im Buch empfohlenen Adressen namentlich eingetragen, außerdem zeigt er einen vergrößerten Zentrumsausschnitt, Extrakarten zu Fiesole, Florenz und Toskana. Die Übersichtskarte zeigt alle Highlights, Detailpläne

erlauben die präzise Orientierung in den 15 »Direkt-Kapiteln«.

History of the Electric Automobile covers the evolution from the first electric vehicles of the 1880s to the advances of today. Beginning with early electric vehicle development in England, France, and the United States, this book provides an in-depth look at the so-called "golden age of electric vehicles" (1895-1905), demonstrating the technological improvements and business risks of this era. This history also explores the "dead period" of the 1930s, 1940s and 1950s, and the subsequent re-birth of interest in electric vehicles in the early 1960s. Events which have impacted the development of electric cars since then -- most notably the Electric Vehicle Act of 1976 -- are also examined. The book also features an appendix section containing such information as a name table of American electric cars, the Electric Vehicle Act of 1976, "nostalgia", and more. A glossary and index are also included. "For more than a century, nearly all seers who have

predicted the role of electric vehicles in personal transportation have been wrong. This book records what actually happened, both within America and internationally." - Ernest H. Wakefield

Hinrichs' Fünffjahrs-Katalog der im deutschen Buchhandel erschienenen Bücher, Zeitschriften, Landkarten usw Workman Publishing
This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility

issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits

of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and

scientifically sound treatment of the emerging field of "autonomous driving".
