 In the global North the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post-industrial answer to dependency on labour and natural resources. Not only does it promise a more stable and sustainable future, but an economy focused on intellectual property is more environmentally friendly, so it is suggested. Contested Powers argues that the fixes being offered by this model are bluffs; development as witnessed in Latin

American energy politics and governance remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands. The authors call for a multi-layered understanding of sovereignty, arguing that it holds the key to undermining rigid accounts of the relationship between carbon and democracy, energy and development, and energy and political expression. Furthermore, a critical focus on energy politics is crucial to wider debates on development and sustainability. *Contested Powers* is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction.

Eli Rubin takes an innovative approach to consumer culture to explore questions of political consensus and consent and the impact of ideology on everyday life in the former East Germany. *Synthetic Socialism* explores the history of East Germany through the production and use of a deceptively simple material: plastic. Rubin investigates the connections between the communist government, its Bauhaus-influenced designers, its retooled postwar chemical industry, and its general consumer population. He argues that East Germany was neither a totalitarian state nor a niche society but rather a society shaped by the confluence of unique economic and political circumstances interacting with the concerns of ordinary citizens. To East Germans, Rubin says, plastic was a high-technology material, a symbol of socialism's scientific and economic superiority over capitalism. Most of all, the state and its designers argued, plastic goods were of a particularly special quality, not to be thrown away like products of the wasteful West. Rubin demonstrates that this argument was accepted by the mainstream of East German society, for whom the modern,

socialist dimension of a plastics-based everyday life had a deep resonance. *Price Filing Under NRA Codes* Zed Books Ltd.

This book explores the ways in which modernity shaped the relationship between socialist state and society in East Germany. The reunification of Germany in 1989 may have put an end to the experiment in East German communism, but its historical assessment is far from over. Where most of the literature over the past two decades has been driven by the desire to uncover the relationship between power and resistance, complicity and consent, more recent scholarship has tended to concentrate on the everyday history of East German citizens. experience of life in East Germany, with a particular view toward addressing the question: what did modernity mean for East German state and society? As such, the collection moves beyond the conceptual divide between state-level politics and everyday life so as to bring into sharper focus the specific contours of the GDR's unique experiment in Cold War socialism. What unites all the essays is the question of how the very tensions around socialist modernity shaped the views, memories and actions of East Germans over four decades. the Cold War, Eastern Europe, the history of communism, European social history and the history of everyday life, gender history, as well as modernity and socialist popular culture.

Hearings

In this deeply researched and revealing account, Robert Travers offers a new view of the transition from Mughal to British rule in India. By focusing on processes of petitioning and judicial inquiry, Travers argues that the East India Company consolidated its territorial power in the conquered province of Bengal by co-opting and transforming late Mughal, Persianate practices of administering justice to petitioning subjects. Recasting the origins of the pivotal 'Permanent Settlement' of the Bengal revenues in 1793, Travers explores the gradual production of a new system of colonial taxation and civil law through the selective adaptation and reworking of Mughal norms and precedents. Drawing on English and Persian sources, *Empires of Complaints* reimagines the origins of British India by foregrounding the late Mughal context for colonial state-formation, and the ways that British rulers reinterpreted and reconstituted Persianate forms of statecraft to suit their new empire.
