The debate on whether to privilege economic growth over ecological security is passé.

Environmental considerations must be at the heart of economic growth, especially for a country of 1.25 billion people destined to add another 400 million by the middle of the century. Green Signals chronicles the '1991 moment' in India's environmental decision-making, telling the story of how, for the first time, the doors of the environment ministry were opened to voices, hitherto unheard, into the policy-making process. It details efforts to change the way environment is viewed both by proponents of environmental security and those who prize economic growth at all costs. Told from the perspective of a pivotal decision maker, the book addresses the challenges involved in trying to ensure economic growth with ecological security. It takes us through India's coming of age in the global environmental and climate change community to take on a leadership role that is progressive, proactive, and steeped in national interest. Using speaking orders on high-profile projects, notes and letters to the Prime Minister, ministerial colleagues, chief ministers and others, Jairam Ramesh gives an insight into the debates, struggles, challenges, and obstacles to bringing environmental considerations into the mainstream of political and economic decision-making. This collection reveals the story of the author's attempt at the highest levels of governance to introduce effective decision-making, a transparent and accountable administration, and to make environmental concerns an essential component of a nation's quest to accelerate economic growth and end the scourge of poverty and deprivation.

About the book ETHICS IN GOVERNANCE Amidst modern complexities and riddles, executives and organizational heads face immense ethical dilemmas in their decision-making. Circumstantial adversaries pose unique challenges and threats to their conscience and leadership abilities. This book tends to address such dilemmas, threats and challenges in a rather systematic and elucidate manner. It attempts to construct perspectives that may find practical solutions to governance rigor and internal moral conflicts. This is a book full of people, almost too many of them who took part in a national seminar on 'Ethical dimensions of governance' organized at India International Centre: executives, politicians, jurists, media people, medical practitioners, academicians, and organizational heads. Those who were philosophically as well as emotionally interested in the inter-faith debate and who believed in trying to create a synthesis of different belief systems on governance. So there is a kind of internal moral dialogue and deliberations that are captured by the authors. There are countless anecdotes, some humorous and some poignant, and they are fascinating also because such people have never been so exuberant in the public eye anyway. Individuals who are responsible for good governance and deep-down care ethical practices and human values would get enough impetus reading this book. It is also meant to benefit those who want to understand the realities of governance and based up on that want to frame their own philosophy of work and life. This book would further be useful to students and professionals who would like to learn the pitfalls of governance and there-upon set benchmarks for their future endeavors. Nevertheless, if you are unhappy allowing your trinity (intellect, soul and heart) to do the

talking in the context of governance then this text cannot be recommended. Governance:- Public Policy • Corporate Sector • Public Sector • Health Care • Banking Industry • Environment Sector • Leadership challenging corruption • Tasks and Solutions for the Future.

Indian society is characterized by a high degree of stratification, based on caste, creed, color, region, and social origin. Caste is a unique system of stratification found in India, intimately related to social, economic, and religious systems, and in recent times, to the political system as well. It is due to the prevalence of the caste system that social justice was denied to a substantial number of its population, including backward classes. The term 'backward classes' has not been defined in the Constitution of India, and, as a result, it has become increasingly difficult to work out a uniform criteria to measure their backwardness. However, an attempt on the part of Indian government to bring about social justice to the backward classes has resulted in the reservation policy. It is against this backdrop that this book examines backward classes and social justice. Divided into four sections, the first part of the book includes the editors' introduction, along with a profile of Prof. C. Paravathamma. The second part deals with the theme 'Backward Classes and Social Justice,' which is then followed by a section of papers on 'Dalits and Development.' The final section examines the problems of Dalits in various parts of the country
