A Soldier of the Great War Candlewick Press (MA)

From the New York Times bestselling author of *Six Crimson Cranes* comes a fantasy filled with courtly intrigue, deceitful demons, and breathtaking gowns ... the stakes are higher than ever in this thrilling sequel to *Spin the Dawn!* Maia Tamarin's journey to sew the dresses of the sun, the moon, and the stars has taken a grievous toll. She returns to a kingdom on the brink of war. Edan, the boy she loves, is gone--perhaps forever--and no sooner does she set foot in the Autumn Palace than she is forced to don the dress of the sun and assume the place of the emperor's bride-to-be to keep the peace. When the emperor's rivals learn of her deception, there is hell to pay, but the war raging around Maia is nothing compared to the battle within. Ever since she was touched by the demon Bandur, she has been changing . . . glancing in the mirror to see her own eyes glowing red; losing control of her magic, her body, her mind. It's only a matter of time before Maia loses herself completely, and in the meantime she will stop at nothing to find Edan, protect her family, and bring lasting peace to her country.

The Kangaroo Chronicles Pan Macmillan

For the past 140 years, Germany has been the central power in continental Europe. Twenty-five years ago a new German state came into being. How much do we really understand this new Germany, and how do its people understand themselves? Neil MacGregor argues that, uniquely for any European country, no coherent, overarching narrative of Germany's history can be constructed, for in Germany both geography and history have always been unstable. Its frontiers have constantly shifted. Königsberg, home to the greatest German philosopher, Immanuel Kant, is now Kaliningrad, Russia; Strasbourg, in whose cathedral

Wolfgang von Goethe, Germany's greatest writer, discovered the distinctiveness of his country's art and history, now lies within the borders of France. For most of the five hundred years covered by this book Germany has been composed of many separate political units, each with a distinct history. And any comfortable national story Germans might have told themselves before 1914 was destroyed by the events of the following thirty years. German history may be inherently fragmented, but it contains a large number of widely shared memories, awarenesses, and experiences; examining some of these is the purpose of this book. MacGregor chooses objects and ideas, people and places that still resonate in the new Germany—porcelain from Dresden and rubble from its ruins, Bauhaus design and the German sausage, the crown of Charlemagne and the gates of Buchenwald—to show us something of its collective imagination. There has never been a book about Germany quite like it.

Beautiful World, Where Are You Ember

A civilian, a mother, and a writer's unique account of a world devastated by conflict 'A rare glimpse of life in neutral Sweden and an insight into the dark setting that created her best-known work' FT Before she became internationally known for her children's books, Astrid Lindgren was an aspiring author living in Stockholm with her family at the outbreak of The Second World War. In these diaries, Lindgren emerges as a morally courageous critic of violence and war, as well as a deeply sensitive and astute observer of world affairs. Alongside political events, she includes delightful vignettes of domestic life, moments of personal crisis, and reveals the origins of Pippi Longstocking - soon to become one of the most famous and beloved children's books of the twentieth century.

Mother Holle (Illustrated) Random House

The first book to present a comprehensive overview of postwar Japanese design For the Japanese, the concept of design is not limited to functionality or materiality--it is deeply connected with ancient culture and rituals. In this sense, a chair is much more than what you sit on, a cup more than what you drink from: these objects are to be reflected upon, to be touched and cherished. As mass manufacture became widespread in the post-war period,

fascinating cross-cultural exchanges began to take place between Japan and the West. And in recent years, a new generation of designers has taken Japanese creativity into entirely new territory, reconceptualizing the very meaning of design. Showcasing over 80 designers, hundreds of objects, and contributions from both Japanese and Western designers inspired by Japan, this volume will remain the definitive work on the subject for many years to come.

Konrad Zuse is one of the great pioneers of the computer age. He created the first fully automated, program controlled, freely programmable computer using binary floating-point calculation. It was operational in 1941. He built his first machines in Berlin during the Second World War, with bombs falling all around, and after the war he built up a company that was taken over by Siemens in 1967. Zuse was an inventor in the traditional style, full of phantastic ideas, but also gifted with a powerful analytical mind. Single-handedly, he developed one of the first programming languages, the Plan Calculus, including features copied only decades later in other languages. He wrote numerous books and articles and won many honors and awards. This is his autobiography, written in an engagingly lively and pleasant style, full of anecdotes, reminiscences, and philosophical asides. It traces his life from his childhood in East Prussia, through tense wartime experiences and hard times building up his business after the war, to a ripe old age and well-earned celebrity.

Nature's Mutiny ABRAMS

What if, instead of discovering our sexuality only once, during puberty, we discover it again later—and then again, after that? What if our sexuality reinvents itself every time our desire shifts, every time the object of our desire changes? What if the nature of our desire is constantly changing—growing deeper, lighter, wilder, more reckless, more tender, more selfish, more devoted, more radical? *How We Desire* is an enthralling essay about gender, sexuality and love by one of Germany's most admired writers. It's about growing up, and discovering the contours of desire and difference, about understanding that we sometimes 'slip into norms the way we slip into clothes, putting them on because they're laid out ready for us'. In telling her own story, Emcke draws back the veil on how we experience desire, no matter what our sexual orientation. And she examines how prejudice against homosexuality has survived its decriminalisation in the west. This marvellous book pays homage to the radical magic and liberating tenderness of desire itself. Carolin Emcke was born in 1967. She studied philosophy, politics and history in London, Frankfurt and at Harvard. From 1998 to 2013 she reported from war and crisis zones including Kosovo, Afghanistan, Pakistan, Iraq, Gaza and Haiti. She has written a number of books, and in 2016 she received the Peace Prize of the German Book Trade, which has also been won by Svetlana Alexievich, Orhan Pamuk and Susan Sontag. *How We Desire* is the first book by Carolin Emcke to be translated into English. 'Hypnotic.' *Sydney Morning Herald* 'A beautiful account of discovering and rediscovering one's identity.' *Otago Daily Times* 'Delicate and vulnerable, angry, passionate, clever and thoughtful. An amazing work.' *Westdeutsche Allgemeine Zeitung* 'Her words tremble with fury...A compelling conversation, urging readers to rethink the borderlands of the erotic.' *Australian* 'Huge intellect and tremendous energy.' *Radio NZ*

Toxic Positivity S. Fischer Verlag

New York City: a battered town left for dead, one that almost a million people abandoned and where those who remained had to live behind triple deadbolt locks. It was reinvigorated and became the capital of wealth and innovation, an engine of cultural vibrancy, a magnet for immigrants, and a city of endless possibility. Since its founding in 1968, *New York Magazine* has told the story of that city's constant morphing, week after week. This book draws from all that coverage to present an enormous,

sweeping, idiosyncratic picture of a half-century at the center of the world. It constitutes an unparalleled history of that city's transformation, and of a New York City institution as well.

Armstrong Chronicle Books

Einstein Simon and Schuster

#1 German bestseller "I have no idea how late it actually is. We flew off somewhere this morning, and my cell phone automatically turns off the clock if we're getting close to a new time zone by plane. Mile by mile, the bus pushes through the inner city. Flake, the legendary keyboardist for the German band Rammstein, takes readers on a journey of what it is to be a touring musician. The excitement, the boredom, the moments that will be remembered and those that are forgotten. It's *The World's Birthday Today* is a strange and moody book about life on the road.
