WILSON WARE

Handbuch interkulturelle Kommunikation und Kompetenz SAGE

Tushman and O'Reilly examine how leadership, culture, and organizational architectures can be both important facilitators of innovation and, not uncommonly, formidable obstacles. They demonstrate how to clarify today's critical managerial problems, use culture and commitment to promote innovation and implement strategy, and deal with changing innovation requirements as organizations evolve.

Facilitation-Tools BoD – Books on Demand

Didaktik and Curriculum in Ongoing Dialogue revives the dialogue between the Continental European Didaktik tradition and the Anglo-Saxon tradition of curriculum. It highlights important research findings that bridge cultural differences and argues for a mutual exchange and understanding of ideas. Through analyses of shared conditions and cultural differences, the book invites a critical stance and continued dialogue on issues of significant importance for the current and future education of children and young people. It combines research at empirical, conceptual, and theoretical level to shed light on the similarities between the Didaktik and Anglo-Saxon educational traditions, calling for a comprehensive understanding of teaching and a renewed focus on content and knowledge. Addressing theoretical issues within contemporary educational scholarship, the book will be of great interest to academics, researchers and post-graduate students in the fields of curriculum studies, education theory and comparative education.

Applications of Nonverbal Communication Junfermann Verlag GmbH

Facilitation bedeutet, in der Arbeit mit Gruppen Prozesse zu ermöglichen und zu begleiten. Anlässe zum Einsatz dieses Formats können Konfliktklärungen oder -lösungen sein. Auch in der Gestaltung von Change-Prozessen haben sich Facilitation-Workshops bewährt, ebenso für das Teambuilding, z. B., wenn es darum geht, dass sich eine für eine Projektarbeit international zusammengestellte Gruppe schnell zu einem arbeitsfähigen Team entwickelt. Die Autorin gibt einen Überblick über verschiedene Facilitation-Anlässe. Sie erläutert, wie Kompetenzen und Elemente aus Mediation und Mediativer Kommunikation sowie weitere Tools dabei zum Einsatz kommen. Beispiele aus der Praxis fassen die Buchinhalte anwendungsbezogen zusammen und runden sie ab.

Computational Visualistics, Media Informatics, and Virtual Communities Walter de Gruyter GmbH & Co KG

Andreas Hepp takes an integrative look at one of the biggest questions in media and communications research: how digital media is changing society. Often, such questions are discussed in isolation, losing sight of the overarching context in which they are situated. Hepp has developed a theory of the re-figuration of society by digital media and their infrastructures, and provides an understanding of how profound today's media-related changes are, not only for institutions, organizations and communities, but for the individual as well. Rooted in the latest research, this book does not stop at a description of media-related change; instead, it raises the

normative challenge of what deep mediatization should look like so that it might just stimulate a 'good life' for all. Providing original and critical research, the book introduces deep mediatization to students of media and cultural studies, as well as neighboring disciplines like sociology, political science and other cognate disciplines.

Deep Mediatization BRILL

Ob in Tourismus, internationalem Management, Entwicklungszusammenarbeit oder Wissenschaft im Zeitalter der Globalisierung ist interkulturelle Kompetenz eine Schlüsselqualifikation. Das Handbuch verschafft einen systematischen Überblick. Es definiert Grundbegriffe wie Differenz, Identität, Verstehen, Konflikt und erörtert die wichtigsten Theorien aus Linguistik, Soziologie, Psychologie und anderen Disziplinen. Im Mittelpunkt stehen viel diskutierte Themen, darunter Migration, Medien, Rassismus. Unverzichtbar für Wissenschaft und Studium.

Entsprechende Motivation der Beteiligten beschleunigt Prozesse. Dies gilt in besonderem Maße für die aktuelle Bildungsreform. Mit der Planung, Entwicklung und Struktur von Studiengängen beschäftigten Kommissionen, Dekanaten und Hochschulleitungen wird hier eine Planungs- und Artikulationshilfe angeboten: Auf Basis der Untersuchung konkreter Lehrinhalte der Erziehungswissenschaft an der Freien Universität Berlin wird anhand eines kooperativen Curriculums für Diversity-Kompetenz exemplarisch gezeigt, wie der Weg zu einer erfolgreichen Studienreform aussehen kann. Lehrenden und Lernenden, TrainerInnen, ReferentInnen und WeiterbildungsinteressentInnen wird ein Überblick über Diversity Management als Lehr- und Lerninhalt, über Konzepte für integrative Mediationsausbildung, die Vermittlung von mediativer und interkultureller Kompetenz erstellt.

Recognition and Social Ontology Springer-Verlag

This unique collection focuses on the unexamined connections between two contemporary, intensively debated lines of inquiry: Hegel-inspired theories of recognition (Anerkennung) and analytical social ontology. These lines address the roots of human sociality from different conceptual perspectives and have complementary strengths, variously stressing the social constitution of persons in interpersonal relations and the emergence of social and institutional reality through collective intentionality. In this book leading theorists and younger scholars offer original analyses of the connections and suggest new ways in which theories of recognition and current approaches in analytical social ontology can enrich one another.

Diversity-Kompetenz in der Erziehungswissenschaft IAP

"Approaching Dialogue" has its primary focus on the theoretical understanding and empirical analysis of talk-in-interaction. It deals with conversation in general as well as talk within institutions against a backdrop of Conversation Analysis, context-based discourse analysis, social pragmatics, socio-cultural theory and interdisciplinary dialogue analysis. People's communicative projects, and the structures and functions of talk-in-interaction, are analyzed from the most local sequences to the comprehensive communicative activity types and genres. A second aim of the book is to explore the possibilities and limitations of dialogism as a general epistemology for cognition and communication.

On this point, it portrays the dialogical approach as a major alternative to the mainstream theories of cognition as individually-based information processing, communication as information transfer, and language as a code. Stressing aspects of interaction, joint construction and cultural embeddedness, and drawing upon extensive theoretical and empirical research carried out in different traditions, this book aims at an integrating synthesis. It is largely interdisciplinary in nature, and has been written in such a way that it can be used at advanced undergraduate courses in linguistics, sociopragmatics of language, communication studies, sociology, social psychology and cognitive science. About the author: Per Linell holds a Ph.D. in linguistics and has been professor within the interdisciplinary graduate program of Communication Studies at the University of Linköping, Sweden, since 1981. He has published widely in the fields of discourse studies and social pragmatics of language.

Science Education Research and Practice in Europe Springer-Verlag

Do the first two years of life really determine a child's future development? Are human beings, like other primates, only motivated by pleasure? And do people actually have stable traits, like intelligence, fear, anxiety, and temperament? This book, the product of a lifetime of research by one of the founders of developmental psychology, takes on the powerful assumptions behind these questions--and proves them mistaken. Ranging with impressive ease from cultural history to philosophy to psychological research literature, Jerome Kagan weaves an argument that will rock the social sciences and the foundations of public policy. Scientists, as well as lay people, tend to think of abstract processes--like intelligence or fear--as measurable entities, of which someone might have more or less. This approach, in Kagan's analysis, shows a blindness to the power of context and to the great variability within any individual subject to different emotions and circumstances. "Infant determinism" is another widespread and dearly held conviction that Kagan contests. This theory--with its claim that early relationships determine lifelong patterns--underestimates human resiliency and adaptiveness, both emotional and cognitive (and, of course, fails to account for the happy products of miserable childhoods and vice versa). The last of Kagan's targets is the vastly overrated pleasure principle, which, he argues, can hardly make sense of unselfish behavior impelled by the desire for virtue and self-respect--the wish to do the right thing. Written in a lively style that uses fables and fairy tales, history and science to make philosophical points, this book challenges some of our most cherished notions about human nature.

TransArea BoD - Books on Demand

The human mind is best understood when it is studied in the context of meaningful and goal-oriented interactions between individuals and their environment. These internal and external activities help to shape the human consciousness and experience. Contemporary Approaches to Activity Theory: Interdisciplinary Perspectives on Human Behavior is an opportunity to study the complex, socially-oriented contexts of humans by considering the entirety of our environments: cultures, motivations, signs and tools, and various activities. Highlighting strategies in design, educational and work practice, and methodological analysis, this book is an essential reference source for academicians, researchers, and students interested in gaining a thorough understanding of the interaction between humans and their environments.

Storytelling - Konflikte lösen mit Herz und Verstand Psychology Press

Cultural policy agents constantly stress their claim to a "dialogue of equals" in international cultural exchange partnerships. Annika Hampel reflects on the current projects and programmes in the arts. She proposes a criteria of fairness as the future guiding path of cultural politics, and the basis of an international culture of cooperation.

Three Seductive Ideas Taylor & Francis Group

Mediationsgesetz von 2012 geht über die rechtliche Regelung der Mediation weit hinaus: Von einem Paradigmenwechsel ist die Rede und auch einem Jahrhundertgesetz, das die Rechtskultur verändere. Es werden allerdings auch Zweifel laut, ob Erwartungen, mit dem Gesetz allein belebe sich der Mediationsmarkt, sich erfüllen werden. Das Buch führt in Mediation ein, beleuchtet Grenzbereiche zu anderen konsensualen Streitlösungsverfahren wie das der Schlichtung, es beschreibt Prinzipien, Methoden und Techniken. Das Verhältnis von Recht und Mediation wird in seiner Ambivalenz und Vielschichtigkeit dargestellt: Praktische Tipps und Formulierungshilfen beziehen sich nicht nur auf Rechtsfragen im engeren Sinne, sondern auch auf die methodische Ebene. Das Güterichterverfahren wird detailliert dargestellt. Der Autor beleuchtet den Mediationsmarkt, analysiert Marktsegmente und Entwicklungspotentiale aus allgemeiner und individueller Sicht. Nicht zuletzt wird die im Jahre 2015 in Kraft tretende Zertifizierungs-Verordnung beleuchtet. Peter Röthemeyer ist Leitender Ministerialrat im Niedersächsischen Justizministerium und ausgebildeter Mediator.

Social Cognition Springer Science & Business Media

An ideal text for undergraduate- and graduate-level courses, this accessible yet authoritative volume examines how people come to know themselves and understand the behavior of others. Core social-psychological questions are addressed as students gain an understanding of the mental processes involved in perceiving, attending to, remembering, thinking about, and responding to the people in our social world. Particular attention is given to how we know what we know: the often hidden ways in which our perceptions are shaped by contextual factors and personal and cultural biases. While the text's coverage is sophisticated and comprehensive, synthesizing decades of research in this dynamic field, every chapter brings theories and findings down to earth with lively, easy-to-grasp examples.

Teaching As A Reflective Practice Springer Science & Business Media

This book analyses recent developments in intergroup research. It diverges from classical approaches that looked at diverse needs and motives, focussing not on what motivates intergroup behaviour, but on how intergroup behavior functions.

The Subjectivity Of Participation Psychology Press

Scientists from management and strategy, information systems, engineering and telecommunications have discussed a novel concept: Smart Business Networks. They see the future as a developing web of people and organizations, bound together in a dynamic and unpredictable way, creating smart outcomes from quickly (re-)configuring links between actors. The question is: What should be done to make the outcomes of such a network 'smart', that is, just a little better than that of your competitor? More agile, with less pain, with more return to all the members of the network, now and over time? The technical answer is to create a 'business operating system' that should run business processes on different organisational platforms. Business processes would

become portable: The end-to-end management of processes running across many different organizations in many different forms would become possible. This book presents you the outcomes of an energizing and new direction in management science.

Smart Business Networks Springer Science & Business Media

Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

Fair Cooperation Kohlhammer Verlag

This comprehensive presentation of Axel Hägerström (1868-1939) fills a void in nearly a century of literature, providing both the legal and political scholar and the non-expert reader with a proper introduction to the father of Scandinavian realism. Based on his complete work, including unpublished material and personal correspondence selected exclusively from the Uppsala archives, *A Real Mind* follows the chronological evolution of Hägerström's intellectual enterprise and offers a full account of his thought. The book summarizes Hägerström's main arguments while enabling further critical assessment, and tries to answer such questions as: If norms are neither true nor false, how can they be adequately understood on the basis of Hägerström's theory of knowledge? Did the founder of the Uppsala school uphold emotivism in moral philosophy? What consequences does such a standpoint have in practical philosophy? Is he really the inspiration behind Scandinavian state absolutism? *A Real Mind* places the complex web of issues addressed by Hägerström within the broader context of 20th century philosophy, stretching from epistemology to ethics. His philosophy

of law is examined in the core chapters of the book, with emphasis on the will-theory and the relation between law and power. The narrative is peppered with vignettes from Hägerström's life, giving an insightful and highly readable portrayal of a thinker who put his imprint on legal theory. The appendix provides a selected bibliography and a brief synopsis of the major events in his life, both private and intellectual.

Boundless cyber world? Peter Lang

This book provides workers and individuals with knowledge on the effective ways to understand the importance of human health and safety in workplaces. Workplace incident scenarios and research findings on human health and safety that could be an ideal information source for university students and workers are detailed in the book. Knowledge made available includes: • Ergonomics, spine deformity associated with human posture. • Gender differences in biomechanical effects of the upper extremities. • Working conditions and gender inequalities and their effects on health and safety promotions. • Social support and job satisfaction relationship at workplaces. • Recommendations to enhance good handwashing practices. • Worker's Act impacts on health and safety practices. • Good hygiene practices at public places. Its comprehensive scope, along with its quick understanding, makes this book a handy working reference for good health and safety practices at workplaces.

Assessment in Early Childhood Settings Springer

Mediation Kohlhammer Verlag

Safety and Health for Workers Springer-Verlag

Each volume in the 7-volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe, Arab States, and Sub-Saharan Africa. The focus of this Handbook is on science education in Europe. In producing this volume the editors have invited a range of authors to describe their research in the context of developments in the continent and further afield. In reading this book you are invited to consider the historical, social and political contexts that have driven developments in science education research over the years. A unique feature of science education in Europe is the impact of the European Union on research and development over many years. A growing number of multi-national projects have contributed to the establishment of a community of researchers increasingly accepting of methodological diversity. That is not to say that Europe is moving towards homogeneity, as this volume clearly shows.
