Political Pressures on Educational and Social Research draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy. Chapters explore the impacts this can have on the researchers, as well as the influence it has on the research, including the methodology and the publication of results. The book offers innovative ways of seeing how these connect, overlap and interact, revealing particular issues of concern for researchers and evaluators in the context of research internationally. Key topics include the power and positioning of research, evidence based policy development, ethics and the importance of research that seeks to explore and discover knowledge. The book is divided into two sections. The first presents chapters from international academics, which provide a theoretical underpinning and discussion of power, policy, ethics and

their influence on research resourcing, autonomy, purpose and methodology. The second section explores specific case studies and instances from the authors' own experiences in the field. This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers, evaluators and postgraduate students in the fields of education and the social sciences. It will be of particular interest to those studying research methods.

The Almost True Story of Sandy Primary School Routledge

The transition from primary to secondary school can often be a difficult time for children, and managing the transition smoothly has posed a problem for teachers at both upper primary and lower secondary level. At a time when 'childhood' recedes and 'adulthood' beckons, the inequalities between individual children can widen, and meeting the needs of all children is a challenge. Bridging the Transition from Primary to Secondary School offers an insight into children's development, building a framework for the creation of appropriate and relevant educational experiences of children between the ages of 10-12. Based on the five 'transition bridges' - administrative, social and personal, curriculum, pedagogy, and autonomy and managing

learning - this book is a complete guide to the primary-secondary transition. Chapters cover: A review of the issues and challenges of transition and school transfer; Management of physical, intellectual, social and emotional changes; Issues of changing self-identity; Approaches to ensure curriculum progression and continuity; Ways to develop cooperation between primary and secondary schools; Alternatives to traditional primary-secondary systems and pedagogy. This book will be essential reading for all trainee teachers, undergraduate and postgraduate education students, and those working with children over the transition. The contributors offer a wealth of guidance and insight into meeting the educational and social needs of children through early adolescence.

Rubble and Roseleaves, and Things of That Kind Portage & Main Press

Building Better Schools with Evidence-based Policy: Adaptable Policy for Teachers and School Leaders provides an extensive set of free-to-use policies for building better schools. The policies included in this book cover a broad range of popular topics for schools that are not readily accessible, and each policy is built on theory, driven by research, and created by experts. Each

policy is based on substantial evidence, and this is ensured through the inclusion of contributors who are active and highly reputable in their respective field. Most schools are obliged to write and maintain policy, and not all school leaders have the required skills, time, or expertise to do this effectively. *Building Better Schools with Evidence-based Policy: Adaptable Policy for Teachers and School Leaders* is a time-saving resource for schools. It aims to address the reported research-to-practice gap in education by delivering accessible evidence-based practice in a ready-to-use adaptable format. All policies within this book are designed to be adapted and tailored to the unique diversity and needs of each school as reflected by the context and the people that make up the school community. This book is relevant to every person who works in a school - worldwide. Users of this book can rest assured that each policy has been carefully formulated from the current understandings of best practice. This is a practical innovation and an example of how schools can use research evidence in their day-to-day practices. "The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non-Commercial-No Derivatives 4.0 license."

Educating the Student Body DigiCat

This handbook acts as an essential guide to understanding and using reflective and experiential learning - whether it be for personal or professional development, or as a tool for learning. It takes a fresh look at experiential and reflective learning, locating them within an overall theoretical framework for learning and exploring the relationships between different approaches. As well as the theory, the book provides practical ideas for applying the models of learning, with tools, activities and photocopiable resources which can be incorporated directly into classroom practice. This book is essential reading to guide any teacher, lecturer or trainer wanting to improve teaching and learning.

The Sockeye Mother National Academies Press

To the Gitksan people of Northwestern British Columbia, the sockeye salmon is more than just a source of food. Over its life cycle, it nourishes the very land and forests that the Skeena River runs through and where the Gitksan make their home. The Sockeye Mother explores how the animals, water, soil, and seasons are all intertwined.

A second collection of stories for primary-school assembly.

The Publishers Weekly Routledge

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. *Educating the Student Body* makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Building Better Schools with Evidence-based Policy Routledge

Rubble and Roseleaves, and Things of That Kind is a collection of short stories by Frank Boreham.

These small gems touch upon any and all subjects within a human life, and are perfect companions for a comfy armchair and a blazing fire.

[The Outlook](#) Paul Chapman Educational Publishing Issues for Jan 12, 1888-Jan. 1889 include monthly "Magazine supplement".

Powerful Thinking

In this practical book, the author encourages teachers to make more use of picture books in the language and literacy curriculum of the primary classroom. He suggests that picture books can be of immense value to teachers concerned with the development of children's literacy by making activities both purposeful and pleasurable. He argues that far from being mere illustrations, pictures are an integral part of the storytelling process.

Continent

A second collection of stories for primary-school assembly.

[Hideaway Cove](#)

An inspiring book to help teachers shift their beliefs and "stretch" their thinking around reading comprehension, literacy instruction, and content-area learning. Using the key concepts and strategies introduced in her ground-breaking book, *Reading Power*, Adrienne Gear shows teachers practical ways to create a "culture of thinking" that can be integrated into all areas of learning. Using knowledge-rich texts as tools, Adrienne shares how read-alouds can be used in content areas to support literacy skills and build knowledge. This timely book offers classroom-tested lessons and anchor books to create a content-rich learning environment that helps strengthen student learning and knowledge-building.
