Thoroughly revised and
up-dated edition of a
highly successful
textbook.

Applied Law for Police Officials

Springer Nature

Taken literally, the title
"All of Statistics" is an
exaggeration. But in
spirit, the title is apt,
as the book does cover
a much broader range
of topics than a typical
introductory book on
mathematical
statistics. This book is
for people who want to
learn probability and
statistics quickly. It is
suitable for graduate or

advanced
undergraduate
students in computer
science, mathematics,
statistics, and related
disciplines. The book
includes modern topics
like non-parametric
curve estimation,
bootstrapping, and
classification, topics
that are usually
relegated to follow-up
courses. The reader is
presumed to know
calculus and a little
linear algebra. No
previous knowledge of
probability and
statistics is required.
Statistics, data mining,
and machine learning
are all concerned with
collecting and
analysing data.

 Edition Oswaal Books
 Descriptive and
 Theoretical Approaches
 to African Linguistics
 contains a selection of
 revised and peer-
 reviewed papers from
 the 49th Annual
 Conference on African
 Linguistics, held at
 Michigan State
 University in 2018. The
 contributions from both
 students and more
 senior scholars, based
 in North America,
 Africa and other parts
 of the world, provide a
 glimpse of the breadth
 and quality of current
 research in African
 linguistics from both
 descriptive and
 theoretical
 perspectives. Fields of
 interest range from

phonetics, phonology,
 morphology, syntax,
 semantics to
 sociolinguistics,
 historical linguistics,
 discourse analysis,
 language
 documentation,
 computational
 linguistics and beyond.
 The articles reflect
 both the typological
 and genetic diversity of
 languages in Africa and
 the wide range of
 research areas covered
 by presenters at ACAL
 conferences.

The Kraals of Ulundi

CreateSpace
 An award-winning play
 about the relationship
 between brothers.
 Nothing but the Truth
 is the story of two
 brothers, of sibling
 rivalry, of exile, of
 memory and
 reconciliation, and the
 ambiguities of
 freedom. The play was
 John Kani's debut as

sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

A study of mass media in twenty-first-century South Africa offering “revelations about the nature of citizenship and public engagement in our media saturated age” (Daniel R. Magaziner,

author of *The Law and the Prophets: Black Consciousness in South Africa, 1968-1977*). In *Media in Postapartheid South Africa*, Sean Jacobs turns to media politics and the consumption of media as a way to understand recent political developments in South Africa and their relations with the African continent and the world. Jacobs looks at how mass media define the physical and human geography of the society and what it means for comprehending changing notions of citizenship in postapartheid South Africa. Jacobs claims that the media have unprecedented control over the distribution of public goods, rights claims, and South Africa’s integration into

the global political economy in ways that were impossible under the state-controlled media that dominated the apartheid years. Jacobs takes a probing look at television commercials and the representation of South Africans, reality television shows and South African continental expansion, soap operas and postapartheid identity politics, and the internet as a space for reassertions and reconfigurations of identity. As South Africa becomes more integrated into the global economy, Jacobs argues that local media have more weight in shaping how consumers view these products in unexpected and consequential ways.

This manual, TRADOC Pamphlet TP 600-4 The Soldier's Blue Book: The Guide for Initial Entry Soldiers August 2019, is the guide for all Initial Entry Training (IET) Soldiers who join our Army Profession. It provides an introduction to being a Soldier and Trusted Army Professional, certified in character, competence, and commitment to the Army. The pamphlet introduces Soldiers to the Army Ethic, Values, Culture of Trust, History, Organizations, and Training. It provides information on pay, leave, Thrift Saving Plans (TSPs), and organizations that will be available to assist you and your Families. The Soldier's

Blue Book is mandated reading and will be maintained and available during BCT/OSUT and AIT. This pamphlet applies to all active Army, U.S. Army Reserve, and the Army National Guard enlisted IET conducted at service schools, Army Training Centers, and other training activities under the control of Headquarters, TRADOC.

The events at Rorke's Drift, the iconic defence of a mission station by a small force of British and colonial troops, were immortalised in the 1964 film Zulu. In January 1879, a small garrison of just over 150 British and colonial troops successfully defended the mission against a force of 3,000 to 4,000 Zulu warriors. The fierce, but piecemeal, Zulu attacks on Rorke's Drift came very close to defeating the defenders but were ultimately repelled. Eleven Victoria Crosses were awarded to the defenders. The battle at Rorke's Drift was an

early engagement in the Zulu War. Lasting between January and July 1879. Noted for several particularly bloody battles, including a stunning opening victory by the Zulu at Battle of Isandlwana, as well as for being a landmark in the timeline of imperialism in the region the war ended in a British victory and the end of the Zulu nation's independence. This unique collection of original accounts will prove to be an invaluable resource for historians, students and all those interested in what was one of the most significant periods in British military history.

Student-Teacher Relationship Quality Research: Past, Present and Future Cambridge University Press

Bruce Sandison's Rivers & Lochs of Scotland is the only book on fishing in Scotland that an angler will ever need. This new, edition describes more than 5,000 freshwater fishing locations complete with access details, flies and tactics and where to obtain permission to fish. For anyone fishing in Scotland, this book is the angler's bible. 'The definitive guide for any resident or visitor to Scotland' - Fly Fishing & Fly Tying magazine

Reader's comments on the previous edition: - 'This single book provides comprehensive coverage of all one needs to know to arrange fishing in any region of Scotland.' - 'If you are going fishing in Scotland, this is THE

book. Brilliant and worth its weight in gold.' - 'Bruce's love of the high mountains and open spaces of Scotland shines through in this bible of freshwater fly fishing.'

For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of

Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual

professional development. Mission Command places great responsibility on our Soldiers.

Integrated management of the Fall Armyworm on maize World Bank Publications

This book examines the conceptual foundations of the participatory approach to local development, assesses the evidence of its efficacy, and draws key lessons for policy.

Africa in the Post-2015 Development Agenda

World Health Organization

As the nature of global malnutrition changes, there is a growing need and increasing urgency for more and better information about food consumption and dietary patterns. The past two decades have

seen a dramatic increase in the number, availability, and analysis of the food consumption data collected in a variety of multipurpose household surveys, referred to collectively as household consumption and expenditure surveys (HCESs). These surveys are heterogeneous, and their quality varies substantially by country. Still, they share some common shortcomings in their measurement of food consumption, nutrient intakes, and nutrition status that undermine their relevance and reliability for purposes of designing and implementing food policies and programs. This review crafts a strategic approach to the unfinished global agenda of improving

HCEs' collection of food consumption data. Starting with the priority studies recommended by a 100-country HCES review (Smith, Dupriez, and Troubat 2014), it focuses on a strategic subset of those studies that deal most directly and exclusively with the measurement of food, and that are of fundamental importance to all HCES stakeholders in low- and middle-income countries. Drawing from the literature, this study provides a more detailed, more circumspect justification as to why these particular studies are needed, while identifying key hypotheses, explaining why these studies are of growing urgency, and demonstrating why now is a propitious

time for undertaking them. The review also identifies important study design considerations while pointing out potential challenges to successful implementation stemming from technical capacity, economic, administrative, and political considerations. Six key studies are rank ordered from a global perspective as follows, taking into account (1) the likely shared consensus that a topic is an important source of measurement error in estimating consumption; (2) the perceived urgency of the need for addressing a particular source of measurement error; (3) the perceived likelihood of

success—that is, that the efforts will improve the accuracy of measurement; (4) whether or not the study entails modifying the questionnaire; (5) the ease with which a study may begin; and (6) the extent to which the study is independent of necessary negotiations with existing HCES stakeholders because of the types of changes it is likely to entail (in either the questionnaire or the way the data have traditionally been processed).

Language and Institutional Identity in the Post-Apartheid South African Higher Education Language Science Press

This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Language Grade 4-6
NYU Press

Most writing on sociological method has been concerned with how accurate facts can be obtained and how theory can thereby be more rigorously tested. In *The Discovery of Grounded Theory*, Barney Glaser and

Anselm Strauss address the equally Important enterprise of how the discovery of theory from data?systematically obtained and analyzed in social research?can be furthered. The discovery of theory from data?grounded theory?is a major task confronting sociology, for such a theory fits empirical situations, and is understandable to sociologists and laymen alike. Most important, it provides relevant predictions, explanations, interpretations, and applications. In Part I of the book, "Generation Theory by Comparative Analysis," the authors present a strategy whereby sociologists can facilitate the discovery of grounded theory, both substantive and

formal. This strategy involves the systematic choice and study of several comparison groups. In Part II, "The Flexible Use of Data," the generation of theory from qualitative, especially documentary, and quantitative data is considered. In Part III, "Implications of Grounded Theory," Glaser and Strauss examine the credibility of grounded theory. The Discovery of Grounded Theory is directed toward improving social scientists' capacity for generating theory that will be relevant to their research. While aimed primarily at sociologists, it will be useful to anyone Interested In studying social phenomena?political, educational, economic,

industrial? especially If their studies are based on qualitative data.

Fall armyworm

(Spodoptera

frugiperda) – FAW, a

dangerous

transboundary pest

native to the Americas,

has been spreading

rapidly to all sub-

regions of Africa since

2016, causing

significant yield losses

to crops. Farmer

education and

community action are

critical elements in the

strategy to best

manage FAW

populations, using an

integrated and

ecological pest

management

approach. Farmer Field

School (FFS), a holistic

farmer education

approach used in over

90 countries, will be a

key component of the response effort. This guide seeks to provide guidance on how to conduct FFS on the integrated and sustainable management of the FAW in Africa, with emphasis on maize as FAW's preferred host plant. It provides information on the biology and ecology of FAW; field studies and exercises for use in season-long FFS; and suggestions on how to build a training programme for rural advisory services/extension on FAW and FFS refresher courses of Master Trainers and Facilitators.

The Zulu War BoD –

Books on Demand

This book investigates

how customary

practices in South

Africa have led to

negotiation and contestation over human rights, gender and generational power. Drawing on a range of original empirical studies, this book provides important new insights into the realities of regulating personal relationships in complex social fields in which customary practices are negotiated. This book not only adds to a fuller understanding of how customary practices are experienced in contemporary South Africa, but it also contributes to a large discussion about the experiences, impact and ongoing negotiations around changing structures of gender and generational power and rights in

contemporary South Africa. It will be of interest to researchers across the fields of sociology, family/customary law, gender, social policy and African Studies. The Other Wes Moore Princeton University Press

"Although there is debate about the estimated health burden of rabies, the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases. Poor surveillance, underreporting in many developing countries, frequent misdiagnosis of rabies, and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease It

is clear, however, that rabies disproportionately affects poor rural communities, and particularly children. Most of the expenditure for post-exposure prophylaxis is borne by those who can least afford it. As a result of growing dog and human populations, the burden of human deaths from rabies and the economic costs will continue to escalate in the absence of concerted efforts and investment for control. Since the first WHO Expert Consultation on Rabies in 2004, WHO and its network of collaborating centres on rabies, specialized national institutions, members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates

Foundation, the Global Alliance for Rabies Control and the Partnership for Rabies Prevention, have been advocating the feasibility of rabies elimination regionally and globally and promoting research into sustainable cost-effective strategies. Those joint efforts have begun to break the cycle of rabies neglect, and rabies is becoming recognized as a priority for investment. This Consultation concluded that human dog-transmitted rabies is readily amenable to control, regional elimination in the medium term and even global elimination in the long term. A resolution on major neglected tropical diseases, including rabies, prepared for submission to the

World Health Assembly in May 2013 aims at securing Member States' commitment to the control, elimination or eradication of these diseases. Endorsement

of the resolution would open the door for exciting advances in rabies prevention and control."--Publisher's description.
