Puffin Classics: the Adventures of Mowgli

Harper Perennial
 This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a

past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.

Four different voices tell their own versions of the same walk in the park. The radically different perspectives give a fascinating depth to this simple story which explores many of the author's key themes, such as alienation, friendship and the bizarre amid the mundane. Anthony Browne's world-renowned artwork is full of expressive gorillas, vibrant colours and numerous nods to Magritte and other artists, while being uniquely Browne's own style.

A cult modern classic, Tropic of Capricorn is as daring, frank and influential as Henry Miller first novel, Tropic of Cancer A story of sexual and spiritual awakening, Tropic of Capricorn shocked readers when it was published in 1939. A mixture of fiction and autobiography, it is the story of Henry V. Miller who works for the Cosmodemonic telegraph company in New York in the 1920s and tries to write the most important work of literature that was ever published. Tropic of Capricorn paints a dazzling picture of the life of the writer and of New York City between the wars: the skyscrapers and the sewers, the lust and the dejection, the smells and the sounds of a city that is perpetually in motion, threatening to swallow everyone and everything. 'Literature begins and ends with the meaning of what Miller has done' Lawrence Durrell 'The only imaginative prose-writer of the slightest value who has appeared among the English-speaking races for some years past' George

Orwell 'The greatest American writer' Bob Dylan Henry Miller (1891-1980) is one of the most important American writers of the 20th century. His best-known novels include Tropic of Cancer (1934), Tropic of Capricorn (1939), and the Rosy Crucifixion trilogy (Sexus, 1949, Plexus, 1953, and Nexus, 1959), all published in France and banned in the US and the UK until 1964. He is widely recognised as an irreverent, risk-taking writer who redefined the novel and made the link between the European avant-garde and the American Beat generation.

From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island?

What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

 Rudyard Kipling's eternal classics, *The Jungle Book* and *The Second Jungle Book* are most loved for the stories of Mowgli, the boy who grew up in a wolf pack. This book brings together all the stories of Mowgli. It begins with Father Wolf rescuing an abandoned baby boy from the tiger Shere Khan, terror of the jungle. The child grows up among the animals, befriending Bagheera the Panther, Balu the Bear, and making mortal enemies with Shere Khan the Tiger. He is kidnapped by monkeys, exiled by the wolf pack, disowned by humans, till he finally vanquishes Shere Khan and returns to the forest. But the call of his own kind grows stronger, and he eventually finds his own, tenuous place among men and animals. Kipling's creations from the two Jungle Books—human and animal—have remained alive in literature and celluloid for nearly a century. They have mesmerized, entertained and educated generations of children. In this special Puffin Classics edition, Mowgli comes alive once more, accompanied by illustrations rendered by Gond artist Durga Bai,

and an affectionate, heartwarming introduction by that other favourite children's writer, Ruskin Bond.

The Apache Diaries Slack
In this nimble work, Germán Arciniegas, one of South America's great minds, sets history on its ear. Too often have we heard that Columbus's discovery of America heralded the importation of Europe to the New World. What Arciniegas considers here is the argument in reverse. Indeed, the New World has so profoundly affected the Old, Arciniegas says, that 1492 marks the date Europe began its Americanization. With a grand, almost cinematic sweep, Arciniegas takes the reader from continent to continent and from influence to outcome. Copernicus, for example, was twenty when Columbus discovered America. The discovery had an enormous effect on his concept of astronomy and that, in turn, had the most profound effects on European intellectual identity. He shows how Cartesian philosophy and baroque art have

identifiable roots in American soil. How Vivaldi's music was inspired by Moctezuma. How Garibaldi's Risorpimento can be traced to Montevideo. How Benjamin Franklin, Thomas Jefferson, and Tom Paine decisively influenced the French Revolution. It was from America's experience with slavery and colonialism that Europe learned the meaning of the word "independence." And, lofty concepts aside, it was from America that Europe received goods that would change the tastes of its palate and the face of its trade: tobacco, potatoes, corn, tomatoes, chocolate...and gold. Combining deftness with scholarly mastery, Arciniegas here gives us his most daring work--one that will stimulate animated discussion among European and American intellectuals for many years to come.--

One powerful truth is undeniable: if Christ had never been born, nearly every facet of human life would be worse. We live in a cynical age in which only one prejudice is tolerated: anti-Christian bigotry. Yet despite the near constant and attacks against the faith, one powerful truth is undeniable: if Christ had never been born, nearly every aspect of human life would be much more miserable than it is today. In *What if Jesus Had Never Been Born?*, discover: Christianity's impact on the value of human life, helping the poor, and education Christianity's impact on world history and the founding of America Christianity's contribution to civil liberties, science, medicine, and economics Lives changed by Jesus Christ The author also examines what happens in a world without Christianity, as well as fulfilling the purpose of
