Jack would rather stay at sea than fix the mistakes of his grandfather, the late Earl of Stansworth. But inheriting his grandfather's wealth and title and securing the welfare of his sister and mother require living with the aristocracy. Ivy Carlisle, the granddaughter of a dear old family friend, is willing to teach him etiquette and properly introduce him into society. Yet Jack soon learns that his new lifestyle isn't the only challenge. He must survive the conspiracies against him -- and try not to fall madly in love with his tutor.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Proudly supporting the Royal Flying Doctors Mental Health Service

In most forms of racing, cornering speed is the key to winning. On the street, precise and predictable handling is the key to high performance driving. However, the art and science of engineering a chassis can be difficult to comprehend, let alone apply. Chassis Engineering explains the complex principles of suspension geometry and chassis design in terms the novice can easily understand and apply to any project. Hundreds of photos and illustrations illustrate what it takes to design, build, and tune the ultimate chassis for maximum cornering power on and off the track.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

The Lancer name conjures up many different images. For some, it evokes memories of the first generation cars, introduced in 1973, which fought with the best on the Safari Rally and came out the victors. Others will remember the second generation models especially the turbocharged versions, the original Mitsubishi wolf in sheep s clothing and who could not be aware of the Evolution (Evo) series, launched in 1992? Forged in the fierce heat of WRC competition and honed by years of continuous development, the Lancer Evolution is not only one of the greatest rally cars of all time, it is also a desirable high-performance road car, too. Written in Japan with the full cooperation of Mitsubishi and key staff members, this is the definitive international story of all the world s Lancers, whether they carried Mitsubishi, Dodge, Colt, Plymouth, Valiant, Eagle, Proton or Hyundai badges, with special emphasis on the Evolution models.

Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages

but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

They must travel abroad by hook or by crook; they bribe and corrupt and swim and stow and prostitute and forge but travel they must. These are illegal immigrants who escape frustration, war, hunger, poverty...They are prisoners in a cycle of mediocrity perpetuated by governments that don't perform. The drudgery at home is too much to bear. Lured by prospects of luxury and abundance only seen in movies, they land in Europe, America and elsewhere by whatever means
