Can better targeting improve the effectiveness of Ghana's Fertilizer Subsidy Program? Springer Nature
This book introduces a new typology of

“inward- and outward-oriented” higher education internationalization, and investigates China’s current situation of shifting from a mainly “inward-oriented” higher education internationalization to a more balanced approach. It describes the gap between China’s soft power goals of using higher education

internationalization for image and influence enhancement and the reality, and examines the three major dimensions of China's "outward-oriented" higher education internationalization (i.e. the Confucius Institute program based on Sino-foreign higher education collaboration, international development aid in higher education, and higher education level international student recruitment) based on reflections provided by international graduate students in English instruction programs in education-related majors in three Chinese universities. Providing both theoretical insights and real-world examples, this book is suitable for higher education researchers, graduate students in the relevant fields, administrators of higher education

institutions, and policymakers in the government sector.

Educational Leaders Without Borders
Springer Nature

Quality of Life and Climate Change: Impacts, Sustainable Adaptation, and Social-Ecological Resilience delves into the pressing concerns surrounding climate change and its profound impacts on the quality of life (QoL) experienced by individuals and communities worldwide. This book explores the intricate relationship between climate change, variability, and QoL in both rural and urban settings. It undertakes a detailed review of QoL assessments to examine the extent to which climatic changes and livability conditions are incorporated into existing evaluations. By shedding light on the critical need to

consider climatic factors in measuring and comparing QoL, especially in the context of creating aging-friendly and climate-neutral cities, this publication addresses a significant research gap. This book presents prospective themes, including sustainable solutions, mitigation strategies, and models to enhance socio-ecological resilience. The chapters within the book cover a wide range of topics including climatic variations and future projections, technological advancements in climate change mitigation, implications for residential and non-residential areas, industrial solutions, SDG attainment, mitigation strategies, QoL measurement instruments, and urban QoL models. By addressing these themes, the book provides a comprehensive analysis of

the complex interactions between climate change, QoL, and the pursuit of sustainable development. This book serves as a valuable resource for researchers, academicians, policymakers, civil society groups, think tanks, government and non-government organizations, international agencies, and other interested parties seeking to deepen their knowledge and capacity in the field of climate change and its impacts on QoL and Sustainable Development Goals (SDGs) attainment.

Ethnic Piano Rolls in the United States Springer

Global interest in African studies has been rapidly growing as researchers realize the importance of understanding the impact African communities can have on the economy, development,

education, and more. As the use, acceptance, and popularity of African knowledge increases, it is crucial to explore how this community-based knowledge provides deeper insights, understanding, and influence on such things as decision making and problem solving. *African Studies: Breakthroughs in Research and Practice* examines the politics, culture, language, history, socio-economic development, methodologies, and contemporary experiences of African peoples from around the world. Highlighting a range of topics such as indigenous knowledge, developing countries, and public administration, this publication is an ideal reference source for sociologists, policymakers, anthropologists, government officials, economists, instructors, researchers,

academicians, and graduate-level students in a variety of fields.

Engagement of Africa in Conflict Dynamics and Peace Architectures

African Books Collective

Transitioning from secondary to higher education is not a natural step for many first-year students in higher education institutions. There is a considerable difference between being a student at school and university, and previous research has highlighted the difficulties faced by first-year university students during their transition phase. Higher education institutions and their departments acknowledge the challenges faced by new students, and they differ in their approach to coping with the issue; each seeks to find the most effective solution for its students.

To reduce the withdrawal rate during the first year of college, higher education providers are expected to apply transition programs to help students transition. The Handbook of Research on Coping Mechanisms for First-Year Students Transitioning to Higher Education presents a comprehensive account of the dynamics in higher education institutions and culture shock for new students and analyzes models and theories of adjustment of new students in higher education institutions. Covering key topics such as gender, institutional support, and success factors, this reference work is ideal for administrators, higher education professionals, researchers, scholars, academicians, practitioners, instructors, and students.

Joke-Performance in Africa IGI Global
The COVID-19 pandemic brought about a sudden transition from traditional face-to-face instruction to online and blended learning. The repercussions of this seismic change have left an indelible mark on students, particularly those thrust into the challenging realm of fully engaging in online learning during this tumultuous period. As we navigate the delicate landscape of higher education post-pandemic, a critical gap in scholarly literature becomes glaringly apparent; there is a scarcity of focused works addressing the nuanced well-being of students in this new academic reality. *Mental Health Crisis in Higher Education* is a groundbreaking book that boldly steps into this void, offering a comprehensive and meticulously

researched examination of the challenges faced by students transitioning from secondary to higher education amid the pandemic. By delving into stressors, coping mechanisms, and the intricate web of factors influencing emotional, psychological, and physical well-being, the book is an invaluable resource for academics, researchers, and institutions seeking to understand and address the multifaceted dimensions of student well-being.

The Status of Student Involvement in University Governance in Kenya

Routledge

This book summarizes the evidence from different African countries about the local impacts of climate change, and how farmers are coping with current

climate risks. The different contributors show how agricultural systems in developing countries are affected by climate changes and how communities prepare and adapt to these changes.

Historical Dictionary of Kenya

Springer Nature

Kenya has a long and complex history that began thousands of years ago. Indeed, some archaeologists contend that the country was the "cradle of mankind" or, at the very least, one of the places that was home to the earliest hominids. In later centuries, Kenya's strategic location astride the Indian Ocean and the East African littoral attracted numerous foreign peoples, some of the most significant of which have been the Americans, Arabs, British, Chinese, French, Germans, and

Portuguese. Additionally, Africans from throughout the subcontinent have settled in Kenya to escape conflict or political persecution, while others wanted an opportunity to begin a new life. As a result of being a gateway to the world, the country traditionally has been one of the most important business, cultural, diplomatic, and political centers in Africa. Although it has maintained this reputation during the post-independence period, Kenya, like most African countries, has been plagued by an increasing array of complex economic, political, and social problems. This third edition of Historical Dictionary of Kenya provides a starting point for those interested in any of the phases of Kenya's historical evolution. This is done through a chronology, an introductory

essay, appendixes, and an extensive bibliography. The dictionary section has 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Kenya.

The Report: Kenya 2014 AOSIS

'Ethnic' piano rolls are an important part of a still-neglected musical heritage. Having come to prominence in the first part of the twentieth century, they encapsulate the musical life of several continents and various ethnic communities based in the USA. This volume represents the latest research on these unique and rare cultural artefacts. *Cucumber Economic Values and Its*

Cultivation and Breeding Springer
 Building from the history of inequality in education up to current problems, this text posits viewpoints on how to cultivate humanistic leaders in education to best benefit underserved children around the world. Among perspectives examined are economic, cultural, and political circumstances that benefit some and harm others, creating educational inequality. To illustrate the work that must be done, this book connects vignettes of compelling school issues to educational philosophies, e.g., Makiguchi's work, to bridge the theoretical and the practical and pose real solutions.

Impact of Global University Ranking Systems on Developing Countries Royal Society of Chemistry

Colleges and universities have been meeting places of students for the sake of studies all over the world. As students transcend from secondary level education to tertiary level, the degree of freedom increases; they become free to live the style of life they choose. This freedom is mainly caused by their advance in age--from childhood to youth ages. Cohabitation is one of the styles of life that students in most higher-learning institutions choose to live. However, cohabitation is not the style of life that emerges in the recent time. In the industrialized world, for example, cohabitation among youth started a long time ago. By the 1970s and 1980s its rate increased greatly due to secularization and increase in freedom. Being aware of this growing trend in

cohabitation, this book surveys the extent of cohabitation among students in higher-learning institutions in Tanzania and how it affects the academic performance of the cohabiting partners. It means that the book assesses both positive and negative effects for this style of life among the surveyed students. Therefore, this book is important to both university and college students so that they can be aware of the positive and negative effects of cohabitation, especially in terms of academic performance.

The Oxford Handbook of Kenyan Politics IAP

This book explores a critical question: in the wake of identity-based violence, what can internal and international peacebuilders do to help “deeply divided

societies” rediscover a sense of living together? In 2016, ethnic, religious, and sectarian violence in Syria and Iraq, the Central African Republic, Myanmar, and Burundi grab headlines and present worrying scenarios of mass atrocities. The principal concern which this volume addresses is “social cohesion” - relations within society and across deep divisions, and the relationship of individuals and groups with the state. For global peacebuilding networks, the social cohesion concept is a leitmotif for assessment of social dynamics and a strategic goal of interventions to promote resilience following violent conflict. In this volume, case studies by leading international scholars paired with local researchers yield in-depth analyses of social cohesion and related

peacebuilding efforts in seven countries: Guatemala, Kenya, Lebanon, Nepal, Nigeria, Myanmar, and Sri Lanka.

Mental Health Crisis in Higher

Education BoD – Books on Demand

The field of nanoscience continues to grow and, with such a vast landscape of material, careful distillation of the most important discoveries will help researchers find the key information they require. Nanoscience provides a critical and comprehensive assessment of the most recent research and opinion from across the globe. Topics covered in this volume include metal halide perovskite nanomaterials, properties and applications, nanoparticles and nanocomposites for new permanent magnets and graphene-based materials for energy conversion applications.

Anyone practising in any nano-allied field, or wishing to enter the nano-world will benefit from this resource, presenting the current thought and applications of nanoscience.

The Future of Accessibility in International Higher Education IGI Global

In a time of too many graduates for too few jobs, and in a context where applicants have similar levels of educational capital, what other factors influence graduate career trajectories? Based on the life history interviews of graduates and framed through a Bourdieusian sociological lens, Culture, Capitals and Graduate Futures explores the continuing role that social class as well as cultural and social capitals have on both the aspirations and expectations

towards, and the trajectories within, the graduate labour market. Framed within the current context of increasing levels of university graduates and the falling numbers of graduate positions available in the UK labour market, this book provides a critical examination of the supposedly linear and meritocratic relationship between higher education and graduate employment proposed by official discourses from government at both local and national levels. Through a critical engagement with the empirical findings, *Culture, Capitals and Graduate Futures* asks important questions for the effective continuation of the widening participation agenda. This timely book will be of interest to higher education professionals working within widening participation policy and higher education

policy.

Pastoralist Resilience to Environmental Collapse in East Africa since 1500 IGI Global

Every generation of students comes to the classroom with different needs than that of their predecessors. Implementing new methods and styles of teaching to meet these diverse needs will provide students with the best chance of success in their educational careers. The *Handbook of Research on Pedagogical Models for Next-Generation Teaching and Learning* is a critical scholarly source that examines the most effective and efficient techniques for implementing new educational strategies in a classroom setting. Featuring pertinent topics including mixed reality simulations, interactive lectures,

reflexive teaching models, and project-based learning, this is an ideal publication for educators, academicians, students, and researchers that are interested in discovering more about the recent advances in educational fields.

[African Studies: Breakthroughs in Research and Practice](#) Rowman & Littlefield

This book critically examines the role of governments in promoting parity during and in post-pandemic education. This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to 'normative educational practices' where those on the margins would have been pushed further behind while the privileged would have been further

initiated into the cultural and capital flows of private schools and historically research-intensive institutions of higher learning. This has far-reaching implications for the education of underprivileged citizens, and education, particularly modes and modalities of delivery, has to be reimaged to subvert the challenges wrought by the pandemic. This book significantly bridges the gap between the pre-and post-COVID-19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time. The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark.

Agricultural Research in Africa
Springer

The country has a strong private sector and received encouraging forecasts of new oil, gas and water reserves, which if harnessed appropriately bode well for future growth. While a pending international court case resulting from prior elections provoked a measure of uncertainty, the country's medium to long-term economic outlook is robust. With over 40% of the population under the age of 15, Kenya stands to benefit from a significant demographic dividend, provided that sufficient jobs can be found when this population bulge enters the workforce. The country has a reasonably sized industrial base, competitive infrastructure and a large agricultural sector, all of which offer opportunities for capital-intensive investment.

Journal of Student Affairs in Africa Volume 1, Issues 1 and 2 IGI Global
Sweetpotato and potato are expanding faster than any other food crops in sub-Saharan Africa. There is growing investment in research to address bottlenecks in value chains concerning these two crops, and growing interest from the private sector in investing in them. This book addresses five major themes on sweetpotato and potato: policies for germplasm exchange, food security and trade in Africa; seed systems; breeding and disease management; post-harvest management, processing technologies and marketing systems; nutritional value and changing behaviours.
The Palgrave Handbook of Contemporary Kenya University of Wisconsin Pres

As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only "how?" Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential

reference source for educators, academics, students, researchers, and librarians.

Distance Learning Cambridge Scholars Publishing

The Journal of Student Affairs in Africa (JSAA) is an independent, peer-reviewed, multi-disciplinary, open-access academic journal that publishes scholarly research and reflective discussions about the theory and practice of student affairs in Africa. The JSAA strives to be the foremost academic journal dealing with the theory and practice of the student affairs domain in universities on the African continent, and an indispensable resource for national policy makers, the executive leadership of universities and colleges dealing with student affairs, deans of students and other senior

student affairs professionals, as well as institutional researchers and academics and students focused on the field of higher education studies and student affairs.

Perspectives on comprehensive internationalisation of higher education

Wipf and Stock Publishers

Jokes have always been part of African culture, but never have they been so blended with the strains and gains of the contemporary African world as today. *Joke-Performance in Africa* describes and analyses the diverse aesthetics, forms, and media of jokes and their performance and shows how African jokes embody the anxieties of the time and space in which they are enacted. The book considers the pervasive phenomenon of jokes and their

performance across Africa in such forms as local jests, street jokes, cartoons, mchongoano, ewhe-eje, stand-up comedy, internet sex jokes, and 'comicast' transmitted via modern technology media such as the TV, CDs, DVDs, the internet platforms of YouTube, Facebook, and other social arenas, as well as live performances. Countries represented are Egypt, Kenya, Malawi, Morocco, Nigeria, and Zambia, covering the North, West, East and Southern Africa. The book explores the description of the joke form from various perspectives, ranging from critical discourse analysis, interviews, humour theories, psychoanalysis, the postcolony and technauriture, to the interactive dramaturgy of joke-performances, irrespective of media and modes of

performance. Containing insightful contributions from leading African scholars, the book acquaints readers with detailed descriptions of the diverse aesthetics of contemporary African jokes, thereby contributing to the

current understanding of joke-performance in Africa. It will appeal to students and scholars of African studies, popular culture, theatre, performance studies and literary studies.
