Education in Minnesota
was first published in
1950.As a guidepost of
comprehensive
information on the status
of post high-school
education in Minnesota
and its likely role in the
future, this report
provides a basis for
constructive thinking by
administrators, teachers,
legislators, and others
concerned with higher
education, not only in
Minnesota but in other
sections of the
country.Presented here is
a summary of the findings
and recommendations of
the Minnesota

Commission on Higher
Education, created by
action of the Minnesota
State Legislature in 1947
to survey and report on
the state's resources in
this area of education.
The Minnesota
Commission has probed
and evaluated all of
higher education,
synthesizing its own and
other research into a
detailed yet
comprehensive picture
that suggests necessary
next steps.A practical,
down-to-earth viewpoint
is held throughout, and
the recommendations are
based on factual research.
The colleges are studied
in relation to the kinds of
work Minnesota people
do, their cultural
backgrounds, the amount
of money they have to
spend, their social
activities, their grade and
high school educations,
their responsibilities as
citizens. In this way,
higher education is
considered, not as an
abstraction, but as a
social force affecting the
kinds of people who live in
Minnesota.The major
divisions of the volume
indicate its scope and

realistic viewpoint: The Setting of Higher Education in Minnesota, The Student Potential for Higher Education, Junior College Education, Liberal Arts Education, Teacher Education, Education at the University of Minnesota, The Future of Higher Education in Minnesota. Chapters are by 23 different authors representing various types of colleges and agencies involved in the study. Minneapolis College, the most selected higher education destination of students from all Minneapolis Public High Schools, is located downtown, nestled between the hustle of Hennepin Avenue and the green spaces of Loring Park. As a part of the Minnesota State system of colleges and universities, Minneapolis College most serves those students who are least likely to go to college. With three-quarters of the student body composed of those underrepresented in higher education, the hallways are filled with recent immigrants, those seeking to learn English, members of communities with the highest unemployment and incarceration rates in the state, veterans, those of low socioeconomic status, seekers of diversity, and those who wish to serve them. Collected here are their stories, stories of overcoming, coming up, perseverance, pride, and power in the face of depressed opportunity and systemic oppression.
