Der Band untersucht das Genre erstmals eingehend in seinen komplexen und vielschichtigen interkulturellen Auffächerungen, die sich in nationalspezifischen Western-Variationen finden. Er eröffnet interessante Perspektiven auf diesen film- und kulturgeschichtlich kaum erschlossenen Bereich. Ein Schwerpunkt gilt den verschiedenen nationalen Western-Varianten in Osteuropa. Beiträge von Spezialisten aus Polen, Tschechien und Russland arbeiten bislang unbekannte Übereinstimmungen und Differenzen im Gebrauch des Genres in den damals kommunistischen Ländern zu Tage. Deutlich wird dabei u.a., dass das ideologisch als anrüchig betrachtete, aber beim Publikum sehr beliebte Genre vor allem in Russland und Polen über die Intervention der Regierungen dazu diente, sowohl Kapitalismuskritik

als auch Überhöhungen der eigenen Nationalkultur zu inszenieren. Darüber hinaus beinhaltet der Band auch Texte mit neuen Perspektiven auf den deutschen Western sowie auf Western-Variationen im französischen, britischen, australischen, indischen und afrikanischen Kino. Auch die vielfältigen Verbindungen zwischen Western und Eastern werden u.a. anhand internationaler Koproduktionen beleuchtet. Der Band betont die Vielschichtigkeit und Komplexität der interkulturellen Transformationen des Western, die sich von Europa über Lateinamerika und Afrika bis nach Australien und Asien nachweisen lassen. Dabei wird herausgearbeitet, wie Western-Elemente in sehr unterschiedlicher Weise zur Geltung kommen, um nationalspezifische Kulturmuster und Kommunikationszusammenhänge zu verhandeln.

Carl Gustav Carus (1789-1869)--court

physician to the king of Saxony--was a naturalist, amateur painter, and theoretician of landscape painting whose *Nine Letters on Landscape Painting* is an important document of early German romanticism and an elegant appeal for the integration of art and science. Carus was inspired by and had contacts with the greatest German intellectuals of his day. Carus prefaced his work with a letter from his correspondence with Johann Wolfgang von Goethe, who was his primary mentor in both science and art. His writings also reflect, however, the influence of the German natural philosopher Friedrich Wilhelm Joseph Schelling, especially Schelling's notion of a world soul, and the writings of the naturalist and explorer Alexander von Humboldt. Carus played a role in the revolution in landscape painting taking place in Saxony around Caspar David Friedrich. The first edition appears here in English for the first time.

An essential work of the

cinematic history of the Weimar Republic by a leading figure of film criticism First published in 1947, *From Caligari to Hitler* remains an undisputed landmark study of the rich cinematic history of the Weimar Republic. Prominent film critic Siegfried Kracauer examines German society from 1921 to 1933, in light of such movies as *The Cabinet of Dr. Caligari*, *M*, *Metropolis*, and *The Blue Angel*. He explores the connections among film aesthetics, the prevailing psychological state of Germans in the Weimar era, and the evolving social and political reality of the time. Kracauer makes a startling (and still controversial) claim: films as popular art provide insight into the unconscious motivations and fantasies of a nation. With a critical introduction by Leonardo Quaresima which provides context for Kracauer's scholarship and his contributions to film studies, this Princeton Classics edition makes an influential work available to new generations of cinema enthusiasts. Photography is now more popular than ever thanks to the rapid development of digital cameras. *Read This If You Want to Take Great Photographs* is ideal for this new wave of snapshotters using DSLR, compact system and bridge cameras. It contains no graphs, no techie diagrams and no camera-club jargon. Instead, it inspires readers through iconic images and playful copy, packed with hands-on tips. Split into five sections, the book covers composition, exposure, light, lenses and the art of seeing. *Masterpieces by acclaimed photographers* – including Henri Cartier-Bresson, Sebastião Salgado, Fay Godwin, Nadav Kander, Daido Moriyama and Martin Parr – serve to illustrate points and encourage readers to try out new ideas. Today's aspiring photographers want immediacy and see photography as an affordable way of expressing themselves quickly and creatively. This handbook meets their needs, teaching them how to take photographs using professional techniques. [Fotografie Springer Nature](#) Written by teachers, the chapters in this book

show how writing fosters learning in math, science, English, social studies, foreign language, philosophy, psychology, and art. Following an introduction by Anne Ruggles Gere, the first chapter, "Writing to Learn: The Nurse Log Classroom," by Steve Pearse, presents a comprehensive overview of a writing to learn classroom. The remaining chapters, each presenting a different angle on writing to learn, are as follows: "Writing for Art Appreciation" by Priscilla Zimmerman, "Writing to Learn German" by Deborah Peterson, "Writing to Learn Social Studies" by Bruce Beaman, "Teaching Special Education History Using Writing-to-Learn Strategies" by Ray Marik, "Writing to Learn Science" by Patricia Johnston, "Writing in Math Class" by Don Schmidt, "Writing to Learn Philosophy" by Jessie Yoshida, "Writing to Learn History" by Tom Watson, "Better Writers, Better Thinkers" by Stephen Arkle, "Writing to Learn Means Learning to Think," by Syrene Forsman, "Thirty Aides in Every Classroom" by Janet K. West, "The Course Journal" by Pat Juell, "An Impartial Observer's View

of Write-to-Learn Classes" by Barbara Bronson, and "Writing and Learning: What the Students Say" by Ralph S. Stevens III. A glossary and an annotated bibliography conclude the book. (EL)

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes

examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Due to computers' ability to combine different semiotic modes, texts are no longer exclusively comprised of static images and mute words. How have digital media changed the way we write and read? What methods of textual and data analysis have emerged? How do we rescue digital artifacts from obsolescence? And how can digital media be used or taught inside classrooms? These and other questions are addressed in this volume that assembles contributions by artists, writers, scholars and editors such as Dene Grigar, Sandy Baldwin, Carlos Reis, and Frieder Nake. They offer a multiperspectival view on the way digital media have changed our notion of textuality.

At the foot of Mount Ararat on the crossroads

of the eastern and western worlds, medieval Armenians dominated international trading routes that reached from Europe to China and India to Russia. As the first people to convert officially to Christianity, they commissioned and produced some of the most extraordinary religious objects of the Middle Ages. These objects—from sumptuous illuminated manuscripts to handsome carvings, liturgical furnishings, gilded reliquaries, exquisite textiles, and printed books—show the strong persistence of their own cultural identity, as well as the multicultural influences of Armenia's interactions with Romans, Byzantines, Persians, Muslims, Mongols, Ottomans, and Europeans. This unprecedented volume, written by a team of international scholars and members of the Armenian religious community, contextualizes and celebrates the compelling works of art that define Armenian medieval culture. It features breathtaking photographs of archaeological sites and stunning churches and monasteries that help fill out this unique history. With groundbreaking

essays and exquisite illustrations, Armenia illuminates the singular achievements of a great medieval civilization. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

Biometeorology continues to grow as a discipline. It is increasingly recognised for its importance in providing science of relevance to society and well being of the environment. This book is the first in a new book series on Biometeorology. The purpose of the new series is to communicate the interdisciplinary philosophy and science of biometeorology to as wide an audience as possible, introduce scientists and policy makers to the societal relevance of and recent developments in its fields and demonstrate how a biometeorological approach can provide insights to the understanding and possible solution of cross-cutting environmental issues. One such cross-cutting environmental issue is climate change. While the literature on the science of climate change, climate change mitigation and the impacts of climate change

is voluminous, that on adaptation to climate change is meagre in comparison. The purpose of this book is to partly redress this imbalance by providing insights from a biometeorological perspective. The book acknowledges that society has a long history of adapting to the impacts associated with climatic variability and change but makes the point that climate change poses a real threat to already strained coping systems. Therefore there is a need to realign human use systems with changing climate conditions.

Now in its second edition, this book is the ideal companion for outdoor enthusiasts who want their photography to do justice to the amazing experiences they have on their travels. The book has been completely rewritten and is fully up-to-date with the latest developments in the world of digital photography. The authors' invaluable knowledge as professional outdoor photographers allows them to introduce all the essential technical concepts to the reader and explain them in the clearest possible

language. With practical and realistic advice throughout, the emphasis of the book is on giving readers the information they need to take the best photographs they can, without compromising their enjoyment of the great outdoors.

This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now begun to take this context into focus for documentation, analysis, interpretation and understanding. Human footprints are prominent among the long-time under-researched features of the context in caves with rock art. In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides. The book gathers first the methodological diversity in the analysis of human tracks. Here major representatives of

anthropological, statistical and traditional approaches feature the multi-layered methods available for the analysis of human tracks. Second it compiles case studies from around the globe of prehistoric human tracks. For the first time, the most important sites which have been found worldwide are published in a single publication. The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe, expounding on how archaeological science can benefit from the ancestral knowledge. This book will be of interest to professional archaeologists, graduate students, ecologists, cultural anthropologists and laypeople, especially those focussing on hunting-gathering and pastoralist communities and who appreciate indigenous knowledge.--

 Some objects seem especially personal and important to us - be it a quickly packed suitcase, an inherited vase, or a photograph. In *Sensitive Objects* the authors discuss when, how, and why particular objects appear as 'sensitive'. They do so by analyzing the objects' affective charging in the context of historically embedded practices. *Sensitive Objects* is a contribution to the upcoming field of 'affect research' that has so far been dominated by psychology and cultural studies, and the authors examine the potential for epistemic gain by connecting the studies of affect with the studies of material culture. The contributors, predominantly ethnologists and anthropologists, use

fieldwork to examine how people project affects onto material objects and explore how objects embody or trigger affects and produce affective atmospheres.

This book provides a systematic and comprehensive guide to the current state of knowledge on tourism and water. It is the first book to thoroughly examine the interrelationships of tourism and water use based on global, regional and business perspectives. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the water sustainability of tourism will be measured for years to come. In making a clear case for greater awareness and enhanced water management in the tourism sector, it is hoped that the book will contribute to the wise and sustainable use of this critical resource. The book is interdisciplinary in coverage and international in scope. It is designed as essential reading for not only students of tourism but also practitioners.

ANTHONY HOPKINS Set in

the unforgiving Vermont wilderness, this is a

"gripping, taut tale of suspense . . . that

sparkles with sly insight and cuts like a knife"—for

fans of Cormac McCarthy

(The Boston Globe) The Vermont hill country is the

stark, vivid setting for this gripping and entertaining

story of bold

determination. The local villain, Blackway, is

making life hellish for Lillian, a young woman

from parts elsewhere. Her boyfriend has fled the

state in fear, and local law enforcement can do

nothing to protect her.

She resolves, however, to stand her ground, and to

fight back. A pair of unlikely allies—Lester, a

crafty old-timer, and Nate, a powerful but naive

youth—join her cause, understanding that there

is no point in taking up the challenge unless

you're willing to "go through." In this modern-

day drama, a kind of Greek chorus—wry, witty,

digressive; obsessively, amusingly reminiscent;

skeptical, opinionated, and not always entirely

sober—enriches the

telling of this unforgettable tale as the reader follows the threesome's progress on their dangerous, suspenseful quest.

(Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund A masterwork of W. G. Sebald, now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's "Anatomy Lesson," the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's The Emigrants (New Directions, 1996) was hailed by Susan Sontag as an "astonishing masterpiece perfect while being unlike any book one has ever read." It was "one of the great books of the last few years," noted Michael Ondaatje, who now acclaims The Rings of Saturn "an even more

inventive work than its predecessor, The Emigrants."

Reading Prehistoric Human Tracks

 After the dissolution of the Austro-Hungarian Monarchy, Austria transformed itself from an empire to a small Central European country. Formerly an important player in international affairs, the new republic was quickly sidelined by the European concert of powers. The enormous losses of territory and population in Austria's post-Habsburg state of existence, however, did not result in a political, economic, cultural, and intellectual black hole. The essays in the twentieth anniversary volume of Contemporary Austrian Studies argue that the small Austrian nation found its place in

the global arena of the twentieth century and made a mark both on Europe and the world. Be it Freudian psychoanalysis, the “fin-de-siècle” Vienna culture of modernism, Austro-Marxist thought, or the Austrian School of Economics, Austrian thinkers and ideas were still wielding a notable impact on the world. Alongside these cultural and intellectual dimensions, Vienna remained the Austrian

capital and reasserted its strong position in Central European and international business and finance. Innovative Austrian companies are operating all over the globe. This volume also examines how the globalizing world of the twentieth century has impacted Austrian demography, society, and political life. Austria's place in the contemporary world is increasingly determined by the forces

of the European integration process. European Union membership brings about convergence and a regional orientation with ramifications for Austria's global role. Austria emerges in the essays of this volume as a highly globalized country with an economy, society, and political culture deeply grounded in Europe. The globalization of Austria, it appears, turns out to be in many instances an “Europeanization”.
