### **Animal Symbolism in Ecclesiastical**

**Architecture** Museum  
Tusculanum Press

The first volume of Roman Questions appeared in 1995 and was received very positively by the scholarly community. The present collection contains 71 papers written mostly in English (with one paper in German and one in Latin) and predominantly published in the last 20 years in various leading journals in Europe and America. They are all reset, and supplied with addenda. There are also 5 inedita, and addenda to the previous volume. They deal with Roman republican and imperial history and constitutional law, prosopography, epigraphy, Latin philology, Roman religion, and the history of classical scholarship. They ask questions, try to answer them, and do not avoid polemic. They uphold the unity of Altermumswissenschaft: history cannot be understood without philology, and philology is blind without history; and history, law and literature are infused with ideology and religion. And the tool to knowledge is the

painstaking linguistic dissection of texts.

### **Script Writing for Short Films**

Routledge  
Building on the form-critical assessment of the Lukan ascension story (LK 24:50-53; Acts 1:1-12) as a rapture story, and motivated by the consideration that the 'monotheistic principle' almost inevitably must have led to a reestimate of the meaning and function of rapture in comparison with heathen rapture stories (immortalisation and deification!), the present study seeks to investigate the Lukan ascension story in the light of the first-century Jewish rapture traditions (Enoch, Elijah, Moses, Baruch, Ezra, etc.). The author argues that first-century Judaism provides a more plausible horizon of understanding for the ascension story than the Graeco-Roman rapture tradition, and that Luke develops his 'rapture christology' not as a reinterpretation of the primitive exaltation kerygma (G. Lohfink), but as a response to the eschatological question, i.e. the delay of the parousia, so as to secure the unity of salvation history.

### **The History Of The Decline And Fall Of The**

**Roman Empire;** Franz Steiner Verlag Wiesbaden GmbH

Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries. *Guardians of Language* Cambridge University Press

This volume contains papers and discussions of the VIth Dialyse-Arzte Workshop, which was held in Bernried at Lake Starnberg near Munich the 5th and 6th of March 1980. Generously sponsored by Travenol,

Munich, the Dialyse-Arzte meetings now have a tradition spanning 16 years. According to the constitution of these meetings, the topics of earlier years had to cover dialysis and related fields. Thus the sponsor requested that this year also one lecture - incorporated here as part - should deal with the state of art of dialysis, thereby hopefully linking this Workshop to the previous meetings. Dialysis techniques of the 1960s, pioneered by many of attending speakers and panelists (see List of Contributors), have never come to a standstill. Indeed, vascular access and extra corporeal circulation have become routine for the nephrologist and have made possible the introduction of new approaches, such as hemofiltration and hemoperfusion. Also today new membrane technologies provide us with a potentially even more effective therapeutic tool, namely plasma separation.

The Ādi-Granth, Or Arkose Press

The Book of the Ten Masters is the record of the teachers of the Sikhs. The history of human civilization took a new turn when the Sikh Gurus appeared on the scene of Medieval India. The Sikh movement served as a

light-house for the people groping in the dark. They were then changed men and elevated to the stage of the ideal man i.e. Gurmukh.

"Chit-Chat; Nirvana; The Searchlight" by Mathew Joseph Holt is a collection of thought-provoking essays that offer insights into various philosophical, spiritual, and metaphysical topics.

Holt's contemplative writing invites readers to explore the deeper aspects of life, consciousness, and human existence. From musings on self-discovery to reflections on the nature of reality, this compilation stimulates the mind and touches the soul.

*The Book of Ten Masters*  
Good Press

This book is a study of the long-term historical geography of Asia Minor, from the fourth century BC to the thirteenth century AD. Using an astonishing breadth of sources, ranging from Byzantine monastic archives to Latin poetic texts, ancient land records to hagiographic biographies, Peter Thonemann reveals the complex and fascinating

interplay between the natural environment and human activities in the Maeander valley. Both a large-scale regional history and a profound meditation on the role played by geography in human history, this book is an essential contribution to the history of the Eastern Mediterranean in Graeco-Roman antiquity and the Byzantine Middle Ages. *The History Of The Decline And Fall Of The Roman Empire*; Franklin Classics

Provides a unique, up-to-date survey of twelve Germanic languages from English and German to Faroese and Yiddish.

*A Plain Introduction to the Criticism of the New Testament for the Use of Biblical Students* Alpha Edition

What did it mean to be a professional teacher in the prestigious "liberal schools"—the schools of grammar and rhetoric—in late antiquity? How can we account for the abiding prestige of these schools, which remained substantially unchanged in their methods and standing despite the political and religious changes that had taken place around them? The grammarian was a pivotal

figure in the lives of the educated upper classes of late antiquity. Introducing his students to correct language and to the literature esteemed by long tradition, he began the education that confirmed his students' standing in a narrowly defined elite. His profession thus contributed to the social as well as cultural continuity of the Empire. The grammarian received honor—and criticism; the profession gave the grammarian a firm sense of cultural authority but also placed him in a position of genteel subordination within the elite. Robert A. Kaster provides the first thorough study of the place and function of these important but ambiguous figures. He also gives a detailed prosopography of the grammarians, and of the other "teachers of letters" below the level of rhetoric, from the middle of the third through the middle of the sixth century, which will provide a valuable research tool for other students of late-antique education.

The Priapeia is a collection of ninety-five poems in various meters on subjects pertaining to the phallic god Priapus. It was compiled from literary works and inscriptions on images of the god by an unknown editor, who composed the introductory epigram. From their style and versification it is evident that the poems belong to the classical period of Latin literature. Some, however, may be interpolations of a later period. These poems were posted upon statues of Priapus that stood in the midst of gardens as the protector of the fruits that grew therein. These statues were often crude carvings made from tree trunks. They roughly resembled the form of a man with a huge phallus. The statues also promoted the gardens' fertility. The verses are attributed variously to Virgil, Ovid, and Domitius Marsus. However, most authorities on the matter regard them to have been the work of a group of poets who met at the house of Maecenas, amusing themselves by writing tongue-in-cheek tributes to the garden Priapus. (Maecenas was Horace's patron.) Others,

including Martial and Petronius, were thought to have added more verses in imitation of the originals.

Educational Directory The History of the Decline and Fall of the Roman Empire, Volume 3

This book contributes to a new economic history of late antiquity, with tightly argued, stimulating studies of class, money and exchange.

**A Book of the Beginnings** Hemkunt Press

Monarchy was widespread as a political system in the ancient world. This 2007 volume offers a substantial discussion of ancient monarchies from the viewpoint of the ruler's court. The monarchies treated are Achaemenid and Sassanian Persia, the empire of Alexander, Rome under both the early and later Caesars, the Han rulers of China and Egypt's Eighteenth Dynasty. A comparative approach is adopted to major aspects of ancient courts, including their organisation and physical setting, their role as a vehicle for display, and their place in monarchical structures of power and control. This approach is broadly inspired by work on courts in later periods

of history, especially early-modern France. The case studies confirm that ancient monarchies created the conditions for the emergence of a court and court society. The culturally specific conditions in which these monarchies functioned meant variety in the character of the ruler's court from one society to another.

The History of the Decline and Fall of the Roman Empire, Volume 3 Arkose Press

**The Cansos of Raimon de Miraval** Cambridge University Press  
Fluid Mechanics, Second Edition deals with fluid mechanics, that is, the theory of the motion of liquids and gases. Topics covered range from ideal fluids and viscous fluids to turbulence, boundary layers, thermal conduction, and diffusion. Surface phenomena, sound, and shock waves are also discussed, along with gas flow, combustion, superfluids, and relativistic fluid dynamics. This book is comprised of 16 chapters and begins with an overview of the fundamental equations of

fluid dynamics, including Euler's equation and Bernoulli's equation. The reader is then introduced to the equations of motion of a viscous fluid; energy dissipation in an incompressible fluid; damping of gravity waves; and the mechanism whereby turbulence occurs. The following chapters explore the laminar boundary layer; thermal conduction in fluids; dynamics of diffusion of a mixture of fluids; and the phenomena that occur near the surface separating two continuous media. The energy and momentum of sound waves; the direction of variation of quantities in a shock wave; one- and two-dimensional gas flow; and the intersection of surfaces of discontinuity are also also considered. This monograph will be of interest to theoretical physicists.

With musical scores and helpful charts, noted jazz educator and featured jazz soloist, Jerry Coker, gives the beginning performer and the curious listener insights into the art of jazz improvisation. Improvising Jazz gives the beginning performer and the curious listener alike

insights into the art of jazz improvisation. Jerry Coker, teacher and noted jazz saxophonist, explains the major concepts of jazz, including blues, harmony, swing, and the

characteristic chord progressions. An easy-to-follow self-teaching guide, *Improvising Jazz* contains practical exercises and musical examples. Its step-by-step presentation shows the aspiring jazz

improviser how to employ fundamental musical and theoretical tools, such as melody, rhythm, and superimposed chords, to develop an individual melodic style.
