MOHAMMED HANNAH

The Earth on Show Tor Books
From the combined talents of the UK's bestselling novelist and a giant of British science fiction comes the dazzling new chapter in the extraordinary and bestselling The Long Earth sequence. 2040-2045: In the years after the cataclysmic Yellowstone eruption there is massive economic dislocation as populations flee Datum Earth to myriad Long Earth worlds. Sally, Joshua, and Lobsang are all involved in this perilous

work when, out of the blue, Sally is contacted by her long-vanished father and inventor of the original Stepper device, Willis Linsay. He tells her he is planning a fantastic voyage across the Long Mars and wants her to accompany him. But Sally soon learns that Willis has an ulterior motive for his request: he needs her help to trace an advanced alien technology which, he believes, will help mankind's post-Yellowstone recovery. Meanwhile U. S. Navy Commander Maggie Kauffman has embarked on an incredible journey of her own, leading an expedition to the outer limits of the far Long Earth. For

Joshua, the crisis he faces is much closer to home. He becomes embroiled in the plight of the Next: the super-bright post-humans who are beginning to emerge from their 'long childhood' in the community called Happy Landings, located deep in the Long Earth. Ignorance and fear have caused 'normal' human society to turn against the Next, and the authorities, afraid of anything or anyone not deemed 'normal', order that all Next children be imprisoned. Joshua is determined to liberate the children -- and a dramatic showdown over the inhumanity of humans against their own kind seems inevitable.

The Dark Side Of The Sun Da Capo Press Completed by the authors some eighteen months before Terry Pratchett's untimely death, The Long Cosmos is the

grand climax of the Long Earth series. Terry had always wanted to explore the question 'what's it all for?' -- and in this novel, we find an answer. 2070-71. Nearly six decades after Step Day and in the Long Earth, the new Next post-human society continues to evolve. For Joshua Valienté, now in his late sixties, it is time to take one last solo journey into the High Meggers: an adventure that turns into a disaster. Alone and facing death, his only hope of salvation lies with a group of trolls. But as Joshua confronts his mortality, the Long Earth receives a signal from the stars. A signal that is picked up by radio astronomers but also in more abstract ways -- by the trolls and by the Great Traversers. Its message is simple but its implications are enormous: JOIN US. The super-smart

Next realise that the Message contains instructions on how to develop an immense artificial intelligence but to build it they have to seek help from throughout the industrious worlds of mankind. Bit by bit, byte by byte, they assemble a computer the size of a continent -- a device that will alter the Long Earth's place within the cosmos and reveal the ultimate, life-affirming goal of those who sent the Message. Its impact will be felt by and resonate with all -- mankind and other species, young and old, communities and individuals -- who inhabit the Long Earths.

The Long Earth Galaxy Press LLC

The first volume in the Homecoming saga from bestselling author Orson Scott Card, *The Memory of Earth* High above the planet Harmony, the Oversoul

watches. Its task, programmed so many millennia ago, is to guard the human settlement on this planet--to protect this fragile remnant of Earth from all threats. To protect them, most of all, from themselves. The Oversoul has done its job well. There is no war on Harmony. There are no weapons of mass destruction. There is no technology that could lead to weapons of war. By control of the data banks, and subtle interference in the very thoughts of the people, the artificial intelligence has fulfilled its mission. But now there is a problem. In orbit, the Oversoul realizes that it has lost access to some of its memory banks, and some of its power systems are failing. And on the planet, men are beginning to think about power, wealth, and conquest. Homecoming

series *The Memory of Earth* *The Call of Earth* *The Ships of Earth* *Earthfall* *Earthborn* At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Long Mars Asiapac Books Pte Ltd 2015: Astronaut Reid Malenfant is flying over the African continent, intent on examining a mysterious glowing construct in Earth's orbit.

A Slip of the Keyboard National Geographic Books

'An absorbing collaborative effort from the two giants of SF' Guardian A generation after the events of *The Long Earth*, mankind has spread across the new worlds opened up by Stepping. Where Joshua and Lobsang once pioneered, now fleets of airships link the stepwise Americas with trade and

culture. Mankind is shaping the Long Earth – but in turn the Long Earth is shaping mankind ... A new 'America', called Valhalla, is emerging more than a million steps from Datum Earth, and it is growing restless . . . Meanwhile the Long Earth is suffused by the song of the trolls, graceful hive-mind humanoids. But the trolls are beginning to react to humanity's thoughtless exploitation . . . And a gathering multiple crisis that threatens to plunge the Long Earth into a war unlike any mankind has waged before. _____ The Long War is the second in The Long Earth series.

Dragons at Crumbling Castle Random House

A mind-expanding, cheerfully dystopian new novel by Yoko Tawada, winner of

the 2022 National Book Award Welcome to the not-too-distant future: Japan, having vanished from the face of the earth, is now remembered as “the land of sushi.” Hiruko, its former citizen and a climate refugee herself, has a job teaching immigrant children in Denmark with her invented language Panska (Pan-Scandinavian): “homemade language. no country to stay in. three countries I experienced. insufficient space in brain. so made new language. homemade language.” As she searches for anyone who can still speak her mother tongue, Hiruko soon makes new friends. Her troupe travels to France, encountering an umami cooking competition; a dead whale; an ultra-nationalist named Breivik; unrequited love; Kakuzo robots; red herrings; uranium; an Andalusian

matador. Episodic and mesmerizing scenes flash vividly along, and soon they’re all next off to Stockholm. With its intrepid band of companions, *Scattered All Over the Earth* (the first novel of a trilogy) may bring to mind Alice’s *Adventures in Wonderland* or a surreal *Wind in the Willows*, but really is just another sui generis Yoko Tawada masterwork.

[Battlefield Earth](#) Open Road Media

For the past twelve thousand years, Earth’s stable climate has allowed human civilization to flourish. But this long benign summer is an anomaly in the Earth’s history and one that is rapidly coming to a close. The radical experiment of our modern industrial civilization is now disrupting our planet’s very metabolism; our future hinges in

large part on how Earth responds. Climate change is already bearing down, hitting harder and faster than expected. The greatest danger is not extreme yet discrete weather events, such as Hurricane Katrina or the calamitous wildfires that now plague California, but profound and systemic disruptions on a global scale. Contrary to the pervasive belief that climate change will be a gradual escalator ride into balmy temperatures, the Earth's climate system has a history of radical shifts—dramatic shocks that could lead to the collapse of social and economic systems. The question is no longer simply how can we stop climate change, but how can we as a civilization survive it. The guiding values of modern culture have become dangerously obsolete in

this new era. Yet as renowned environmental journalist Dianne Dumanoski shows, little has been done to avert the crisis or to prepare human societies for a time of growing instability. In a work of astonishing scope, Dumanoski deftly weaves history, science, and culture to show how the fundamental doctrines of modern society have impeded our ability to respond to this crisis and have fostered an economic globalization that is only increasing our vulnerability at this critical time. She exposes the fallacy of banking on a last-minute technological fix as well as the perilous trap of believing that humans can succeed in the quest to control nature. Only by restructuring our global civilization based on the principles that have

allowed Earth's life and our ancestors to survive catastrophe—diversity, redundancy, a degree of self-sufficiency, social solidarity, and an aversion to excessive integration—can we restore the flexibility needed to weather the trials ahead. In this powerful and prescient book, Dumanoski moves beyond now-ubiquitous environmental buzzwords about green industries and clean energy to provide a new cultural map through this dangerous passage. Though the message is grave, it is not without hope. Lucid, eloquent, and urgent, *The End of the Long Summer* deserves a place alongside transformative works such as *Silent Spring* and *The Fate of the Earth*. *Earth Abides* New Directions Publishing Praised as "one of the most inventive

writers that science fiction has ever produced" (SF Site), national bestselling author Stephen Baxter presents a new saga of a world that could have become our own.... Ten thousand years ago, a vast and fertile plain existed that linked the British Isles to Europe. Home to a tribe of simple hunter-gatherers, Northland teems with nature's bounty, but is also subject to its whims. Fourteen-year-old Ana calls Northland home, but her world is changing. The air is warming, the ice is melting, and the seas are rising. One day Ana meets a traveler from a far-distant city called Jericho—a town that is protected by a wall. And she starts to imagine the impossible....

The Martian Chronicles Del Rey
The fourth novel in Terry Pratchett and

Stephen Baxter's internationally bestselling "Long Earth" series, hailed as "a brilliant science fiction collaboration . . . a love letter to all Pratchett fans, readers, and lovers of wonder everywhere" (Io9). 2045-2059. Human society continues to evolve on Datum Earth, its battered and weary origin planet, as the spread of humanity progresses throughout the many Earths beyond. Lobsang, now an elderly and complex AI, suffers a breakdown, and disguised as a human attempts to live a "normal" life on one of the millions of Long Earth worlds. His old friend, Joshua, now in his fifties, searches for his father and discovers a heretofore unknown family history. And the super-intelligent post-humans known as "the Next" continue to adapt to life among "lesser"

humans. But an alarming new challenge looms. An alien planet has somehow become "entangled" with one of the Long Earth worlds and, as Lobsang and Joshua learn, its voracious denizens intend to capture, conquer, and colonize the new universe—the Long Earth—they have inadvertently discovered. World-building, the intersection of universes, the coexistence of diverse species, and the cosmic meaning of the Long Earth itself are among the mind-expanding themes explored in this exciting new installment of Terry Pratchett and Stephen Baxter's extraordinary Long Earth series.

The Long Utopia Penguin

The bestselling Journey to the West comic book by artist Chang Boon Kiat is now back in a brand new fully coloured

edition. Journey to the West is one of the greatest classics in Chinese literature. It tells the epic tale of the monk Xuanzang who journeys to the West in search of the Buddhist sutras with his disciples, Sun Wukong, Sandy and Pigsy. Along the way, Xuanzang's life was threatened by the diabolical White Bone Spirit, the menacing Red Child and his fearsome parents and, a host of evil spirits who sought to devour Xuanzang's flesh to attain immortality. Bear witness to the formidable Sun Wukong's (Monkey God) prowess as he takes them on, using his Fiery Eyes, Golden Cudgel, Somersault Cloud, and quick wits! Be prepared for a galloping read that will leave you breathless!

The Memory of Earth Harper Collins
A #1 New York Times bestseller! Sarah J.

Maas's brand-new CRESCENT CITY series begins with *House of Earth and Blood*: the story of half-Fae and half-human Bryce Quinlan as she seeks revenge in a contemporary fantasy world of magic, danger, and searing romance. Bryce Quinlan had the perfect life-working hard all day and partying all night-until a demon murdered her closest friends, leaving her bereft, wounded, and alone. When the accused is behind bars but the crimes start up again, Bryce finds herself at the heart of the investigation. She'll do whatever it takes to avenge their deaths. Hunt Athalar is a notorious Fallen angel, now enslaved to the Archangels he once attempted to overthrow. His brutal skills and incredible strength have been set to one purpose-to assassinate his boss's

enemies, no questions asked. But with a demon wreaking havoc in the city, he's offered an irresistible deal: help Bryce find the murderer, and his freedom will be within reach. As Bryce and Hunt dig deep into Crescent City's underbelly, they discover a dark power that threatens everything and everyone they hold dear, and they find, in each other, a blazing passion—one that could set them both free, if they'd only let it. With unforgettable characters, sizzling romance, and page-turning suspense, this richly inventive new fantasy series by #1 New York Times bestselling author Sarah J. Maas delves into the heartache of loss, the price of freedom—and the power of love.

Stone Spring HarperCollins UK

At the turn of the nineteenth century,

geology—and its claims that the earth had a long and colorful prehuman history—was widely dismissed as dangerous nonsense. But just fifty years later, it was the most celebrated of Victorian sciences. Ralph O'Connor tracks the astonishing growth of geology's prestige in Britain, exploring how a new geohistory far more alluring than the standard six days of Creation was assembled and sold to the wider Bible-reading public. Shrewd science-writers, O'Connor shows, marketed spectacular visions of past worlds, piquing the public imagination with glimpses of man-eating mammoths, talking dinosaurs, and sea-dragons spawned by Satan himself. These authors—including men of science, women, clergymen, biblical literalists,

hack writers, blackmailers, and prophets—borrowed freely from the Bible, modern poetry, and the urban entertainment industry, creating new forms of literature in order to transport their readers into a vanished and alien past. In exploring the use of poetry and spectacle in the promotion of popular science, O'Connor proves that geology's success owed much to the literary techniques of its authors. An innovative blend of the history of science, literary criticism, book history, and visual culture, *The Earth on Show* rethinks the relationship between science and literature in the nineteenth century.

Galaxias Anchor

What would happen to the world if the sun went out? New epic sci-fi from Stephen Baxter, the award-winning

author whose credits include co-authorship of the Long Earth series with Terry Pratchett. By the middle of the 21st century, humanity has managed to overcome a series of catastrophic events and maintain some sense of stability. Space exploration has begun again. Science has led the way. But then one day, the sun goes out. Solar panels are useless, and the world begins to freeze. Earth begins to fall out of its orbit. The end is nigh. Someone has sent us a sign.

Journey to the West Harper Collins 2045-2059. After the cataclysmic upheavals of *Step Day* and the Yellowstone eruption humanity is spreading further into the Long Earth, and society, on a battered Datum Earth and beyond, continues to evolve. Now an elderly and cantankerous AI, Lobsang

lives in disguise with Agnes in an exotic, far-distant world. He's convinced they're leading a normal life in New Springfield – they even adopt a child – but it seems they have been guided there for a reason. As rumours of strange sightings and hauntings proliferate, it becomes clear that something is very awry with this particular world. Millions of steps away, Joshua is on a personal journey of discovery: learning about the father he never knew and a secret family history. But then he receives a summons from New Springfield. Lobsang now understands the enormity of what's taking place beneath the surface of his earth – a threat to all the worlds of the Long Earth. To counter this threat will require the combined efforts of humankind, machine and the super-

intelligent Next. And some must make the ultimate sacrifice . . .

Anti-ice Gollancz

In *Yellow Earth*, John Sayles introduces an epic cast of characters, weaving together narratives of competing agendas and worldviews with lyrical dexterity, insight, and wit. When rich layers of shale oil are discovered beneath the town of Yellow Earth, all hell breaks loose. Locals, oil workers, service workers, politicians, law enforcement, and get-rich-quick opportunists—along with an earnest wildlife biologist—commingle and collide as the population of the town triples overnight. Harleigh Killdeer, chairman of the tribal business council of the neighboring Three Nations reservation, entertains visions of "sovereignty by the barrel"

and joins forces with a fast-talking entrepreneur. From casino dealers to activists and high school kids, everyone in the region is swept up in the unsparing wave of an oil boom. Sayles's masterful storytelling draws an arc from the earliest exploitation of this land and its people all the way to twenty-first-century privatization schemes. Through the intertwining lives of its characters, *Yellow Earth* lays bare how the profit motive erodes human relationships, as well as our living planet. The fate of *Yellow Earth* serves as a parable for our times.

The Long War National Geographic Books

From Snuff: 'Vimes' prompt arrival got a nod of approval from Sybil, who gingerly handed him a new book to read to Young

Sam. Vimes looked at the cover. The title was *The World of Poo*. When his wife was out of eyeshot he carefully leafed through it. Well, okay, you had to accept that the world had moved on and these days fairy stories were probably not going to be about twinkly little things with wings. As he turned page after page, it dawned on him that whoever had written this book, they certainly knew what would make kids like Young Sam laugh until they were nearly sick. The bit about sailing down the river almost made him smile. But interspersed with the scatology was actually quite interesting stuff about septic tanks and dunnakin divers and gongfermors and how dog muck helped make the very best leather, and other things that you never thought you would need to know,

but once heard somehow lodged in your mind.'

The Long Utopia National Geographic Books

History of the various branches of the Long family who were prominent in Wiltshire society

The End of the Long Summer Crown
Robot armies, an arms race in space, and a brain at war with itself add up to “a futuristic version of Dr. Jekyll and Mr. Hyde” (The Boston Phoenix). Anxious to avoid a war that would destroy the entire planet, the major powers of Earth have come to an ingenious compromise. Each country sends a force of adaptable, self-programming robots to the surface of the moon to play out the conflict there and, hopefully, reach a mutually agreeable stalemate. But when the

robots stop responding, it is up to Ijon Tichy to travel to the lunar war zone and discover what went wrong. Tichy finds what he needs to know, but falls victim to an attack that severs the left and right sides of his brain: one of which knows nothing about the status of the moon, the other of which isn't telling. Now Tichy finds himself at the center of a new sort of war of attrition, with each world power clamoring for his knowledge and each half of his stubborn brain clamoring for control. Wry and action-packed in equal measure, Stanislaw Lem's absurd, insightful sendup of the Cold War is required reading for any fan of science fiction. Here, “humor and a breathless pace create a delightful and thought-provoking read” (Publishers Weekly).

Bowl of Heaven Simon and Schuster
The third novel in Terry Pratchett and Stephen Baxter's "Long Earth" series, which I call "a brilliant science fiction collaboration." 2040-2045: In the years after the cataclysmic Yellowstone eruption there is massive economic dislocation as populations flee Datum Earth to myriad Long Earth worlds. Sally, Joshua, and Lobsang are all involved in this perilous rescue work when, out of the blue, Sally is contacted by her long-vanished father and inventor of the original Stepper device, Willis Linsay. He tells her he is planning a fantastic voyage across the Long Mars and wants her to accompany him. But Sally soon learns that Willis has an ulterior motive for his request. . . . Meanwhile U. S. Navy Commander Maggie Kauffman has

embarked on an incredible journey of her own, leading an expedition to the outer limits of the far Long Earth. For Joshua, the crisis he faces is much closer to home. He becomes embroiled in the plight of the Next: the super-bright post-humans who are beginning to emerge from their "long childhood" in the community called Happy Landings, located deep in the Long Earth. Ignorance and fear have caused "normal" human society to turn against the Next. A dramatic showdown seems inevitable. . . .

The World of Poo Houghton Mifflin Harcourt

In *Bowl of Heaven*, the first collaboration by science fiction masters Larry Niven (*Ringworld*) and Gregory Benford (*Timescape*), the limits of wonder are

redrawn once again as a human expedition to another star system is jeopardized by an encounter with an astonishingly immense artifact in interstellar space: a bowl-shaped structure half-englobing a star, with a habitable area equivalent to many millions of Earths...and it's on a direct path heading for the same system as the human ship. A landing party is sent to investigate the Bowl, but when the

explorers are separated—one group captured by the gigantic structure's alien inhabitants, the other pursued across its strange and dangerous landscape—the mystery of the Bowl's origins and purpose propel the human voyagers toward discoveries that will transform their understanding of their place in the universe. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
