## MATHEWS DESIREE

*West Bengal and the Federalizing Process in India* Universal Law Publishing

This book argues that the effectiveness of the state apparatus is one of the crucial variables determining human rights conditions, and that state weakness and failure is responsible for much of the human rights abuses we see today. Weak states are unable to control their own agents or to police abuses by private actors, resulting in less accountability and more abuse. By contrast, stronger states have greater capacities to protect human rights; even strong authoritarian states tend to have better human rights conditions than weak ones. The first two chapters of the book develop the theoretical connections between international law, sovereignty, states and rights, and the consequences of state failure for these relationships. The empirical chapters (Chapters 3-6) test the validity of these theoretical claims, employing a multi-method approach that combines quantitative and qualitative methods. Englehart uses case studies of Afghanistan, Burma/Myanmar and the Indian state of Bihar to analyze types and patterns of state failure, based on analysis of NGO reports, archival research, primary and secondary texts, and interviews and field research. Examining what happens to human rights when states fail, the book concludes with implications for scholars and activists concerned with human rights. This book will be of great use to scholars of international relations, comparative politics, human rights law and state sovereignty.

In any Medico Legal case the two crucial issues are "medical negligence" and "deficiency of services". Medical Negligence apart from its simple meaning of commissions and omissions, includes treatments done beyond one's skill and competence, unacceptable deviations, lack of required minimum standards of care & attention etc. The elements of classic definition of Medical Negligence extracted from a landmark British judgement of Blyth Vs. Birmingham Waterworks Co. are "The omission to do something which a reasonable man would do or doing something which a prudent and reasonable man would not do. Neglect of the use of ordinary care or skill in treatment by which the patient has suffered for which the Doctor is liable both ethically and legally". Courts have listed different types of negligence. Active negligence, collateral negligence, comparative negligence, gross negligence, hazardous negligence, active & passive negligence, willful or reckless negligence, negligence per se etc. Deficiency of service is mainly any fault or shortcoming in the quality, nature and manner of treatment which is required. Medico Legal cases are medical cases landing up for judicial scrutiny to consider the apprehended suffering of the patient due to medical negligence or service deficiency and possible compensation or justice for the perceived harm. It is mostly civil disputes in nature but in extremely rare cases particularly when the criminal intent or blatant recklessness is possible to be proved may go as criminal also. Civil cases like those before the consumer commissions determine only the compensation whereas the criminal action includes penal actions like fine, arrest or imprisonment as envisaged in criminal laws. In the event of facing such cases it is essential for Doctors to engage a competent Advocate. Since the criminal cases insist on men's rea i.e. intent to harm or gross negligence or blatant recklessness, it is extremely rare to get into a criminal negligence case. Dealing the cases before either civil or criminal court requires a sound understanding of the prevailing related laws augmented with ruling judicial interpretations particularly by the Supreme Court. Whereas the connected literature is huge and both medical and legal fields are continuously evolving, changing and growing, a solid grasp of at least the basics helps the health professionals in dealing with any contingencies to stave off a potential situation which may lead to a Medico Legal case. Further, unless you keep pace, you get stagnated with the outdated information. Hence a humble attempt is made here to present such information in a concise form. This book deals with clarity all the concepts and issues relating to medicolegal cases along with providing all the landmark judgements of The Supreme Court of India in abridged form. This work is intended to be a ready reference to practising Advocates, Academicians and Doctors. [Litigating Health Rights](#) APH Publishing

Since its independence in 1947, India, as a large, diverse, and rapidly changing country, has had to meet federalizing problems of a magnitude unprecedented in history. The result has been a process that combines, modifies, and transforms many established ideas about federalism. Professor Franda deals with the complexities of India's experience by analyzing the politics of center-state relations as they affect one Indian state. He explores the various ways in which central and state leadership groups in India and West Bengal have developed working relationships, and examines the effect of state and regional political, economic, and social conditions on the evolution of center-state behavior patterns.
