NEW YORK TIMES BESTSELLER • The remarkable true story of a man who lived alone in the woods of Maine for 27 years, making this dream a reality—not out of anger at the world, but simply because he preferred to live on his own. "A meditation on solitude, wildness and survival." —The Wall Street Journal In 1986, a shy and intelligent twenty-year-old named Christopher Knight left his home in Massachusetts, drove to Maine, and disappeared into the forest. He would not have a conversation with another human being until nearly three decades later, when he was arrested for stealing food. Living in a tent even through brutal winters, he had survived by his wits and courage, developing ingenious ways to store edibles and water, and to avoid freezing to death. He broke into nearby cottages for food, clothing, reading material, and other provisions, taking only what he needed but terrifying a community never able to solve the mysterious burglaries. Based on extensive interviews with Knight himself, this is a vividly detailed account of his secluded life—why did he leave? what did he learn?—as well as the challenges he has faced since returning to the world. It is a gripping story of survival that asks fundamental questions about solitude, community, and what makes a good life, and a deeply moving portrait of a man who was determined to live his own way, and

succeeded.

What would happen if you built one of the world's most advanced societies inside a forest—and strove to make made women full

partners in power? After living for twenty-five years in New York, Naomi Moriyama moved with her husband and co-author William Doyle and their seven-year-old child to the vast forest of Finland's Karelia, a mysterious region on the Russian border that helped inspire J.R. R. Tolkien's Middle Earth fantasies. She entered a life-altering zone of tranquility, peace, and beauty, the spiritual heart of the nation ranked as the happiest nation on Earth, with among the world's most empowered women. Finland is also the country with cleanest air and water and the best schools, a country where motherhood and fatherhood are championed by law, childhood is revered, schoolchildren are required to play outdoors multiple times a day, and trains contain mini-libraries and mini-playgrounds for children to enjoy. It was here in the Karelian forest that Naomi found a culinary symphony of succulent wild edibles, herbs, berries, mushrooms and fish, all freshly plucked from the moss-carpeted forest and sparkling clear streams. She also found something that changed her life—a tribe of invincible women who became her soul-sisters. As an idyllic summer and fall gave way to a sub-Arctic winter of mind-bending darkness and cold, Naomi faced her fears and her future. Over the course of six unforgettable months with her family and her new "sisters", she found her life transformed, and discovered the power that lay within her all along. Then she tried to leave. But she kept coming back. Come, take a journey deep into Europe's most distant, magical wilderness, and join the sisterhood of the enchanted forest.

The methods of Indian basket weaving explained in this excellent manual are the very ones employed by native practitioners of the craft. members of the Navajo School of Basketry have set down their secrets in clear and simple language, enabling even the beginner to create work that can rival theirs in grace, design, and usefulness. Beginning with basic techniques, choice of materials, preparation of the reed, splicing, the introduction of color, principles and methods of design, shaping the basket and weaves from many cultures, such as Lazy Squaw, Mariposa, Taos, Samoan, Klinkit, and Shilo, each accompanied by specific instructions. There are suggestions for the weaving of shells, beads, feathers, fan palms, date palms, and even pine needles, and recipes for the preparation of dyes. Examples of each type of basket are illustrated by photographs, often taken from more than one angle so that the bottom can be seen as well as the top and sides. Close-up photography of the various types of stitching, especially at the crucial stage of beginning the basket, is an invaluable aid to the weaver. In addition, the authors have provided line drawings which are exceptionally clear magnifications of the various weave patterns. Anyone who follows the lessons contained in this book will have a knowledge of basketry unattainable in any other way. They are so lucid and complete that the amateur as well as the experienced weaver will be able to manufacture baskets distinguishable from authentic native articles only in that they were not woven by Indians. For those who merely seek a broader knowledge of American Indian arts, the book provides a comprehensive introduction to the subject of basketry.
