FOLEY GLOVER

Historical Dictionary of Botswana Hutchinson

This volume collects new contributions to research on mafias, organized crime, money laundering, and other forms of complex crimes, gathering some of the most authoritative and well-known scholars in the field. The chapters for this volume are original pieces written in honor of the retirement of Dr. Ernesto U. Savona, highlighting his research and legacy. Throughout his academic career, Professor Ernesto U. Savona has investigated complex crimes ranging from organized crime, to economic crime, to money laundering. In his work, he has tried to bring together academics, policy makers, and practitioners to bring understanding for crime problems and innovative solutions. His passion towards the practical application of the findings of scientific research led him to found Transcrime in 1994, which is today among the most important criminological think-tanks in Europe. This important book is aimed at scholars studying criminal policy and research, particularly in the areas of criminal networks, organized crime, white collar crime, the history of criminology.

Company Law Reform OECD Publishing

Democracy is everywhere praised and aspired to as a political system. Yet in established democracies people feel dissatisfied with existing institutions and the levels of accountability they offer. This book explores the ways in which democracy in national states, local government and social institutions can be renewed and extended.

Why Theatre? Open Road Media

Your business reputation can take years to build—and mere minutes to destroy. The range of business threats is evolving rapidly but your organization can thrive and gain a competitive advantage with your business vision for enterprise risk management. Trends affecting markets—events in the global financial markets, changing technologies, environmental priorities, dependency on intellectual property—all underline how important it is to keep up to speed on the latest financial risk management practices and procedures. This popular book on enterprise risk management has been expanded and updated to include new themes and current trends for today's risk practitioner. It features up-to-date materials on new threats, lessons from the recent financial crisis, and how businesses need

to protect themselves in terms of business interruption, security, project and reputational risk management. Project risk management is now a mature discipline with an international standard for its implementation. This book reinforces that project risk management needs to be systematic, but also that it must be embedded to become part of an organization's DNA. This book promotes techniques that will help you implement a methodical and broad approach to risk management. The author is a well-known expert and boasts a wealth of experience in project and enterprise risk management. Easy-to-navigate structure breaks down the risk management process into stages to aid implementation. Examines the external influences that bring sources of business risk that are beyond your control. Provides a handy chapter with tips for commissioning consultants for business risk management services. It is a business imperative to have a clear vision for risk management. *Simple Tools and Techniques for Enterprise Risk Management, Second Edition* shows you the way.

South Africa Pushed to the Limit Wiley-Blackwell

Identity, belonging and voyages of personal discovery are but some of the themes inventively explored in Antjie Krog's first full-length work to appear in English since the publication of *Country of My Skull*. In times of fundamental change, people tend to find a space, lose it and then find another space as life and the world transform around them. What does this metamorphosis entail and in what ways are we affected by it? How do we live through it and what may we become on our journey towards each other, particularly when the space and places from which we depart are – at least on the surface – vastly different? Ranging freely and often wittily across many terrains, this brave book by one of South Africa's foremost writers and poets provides a unique and compelling discourse on living creatively in South Africa.

Producing Open Source Software Van Schaik Publishers

The text provides an overview of the different approaches to, and models of, public policy processes. It also presents an understanding of both the political and the administrative dynamics of policy-making, implementation, and evaluation. The title will assist education and training institutions in assessing the nature and value of their own programmes in public policy, as well as in considering mechanisms for the institutionalisation of critical policy, analytical structures and processes in the decision-

making structures of government units.

Darwin Day in America Intersentia nv

The book looks at contemporary political issues within the South African and the global context. It covers topics such as policy making process; the ethical conduct of government officials and politicians, information management, foreign policy, and the interplay between government and the private sector.

Poverty Is NOT a Learning Disability Abrams

At the dawn of the last century, leading scientists and politicians giddily predicted that science—especially Darwinian biology—would supply solutions to all the intractable problems of American society, from crime to poverty to sexual maladjustment. Instead, politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines. In criminal justice, these experts denied the existence of free will and proposed replacing punishment with invasive “cures” such as the lobotomy. In welfare, they proposed eliminating the poor by sterilizing those deemed biologically unfit. In business, they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior. In sex education, they advocated creating a new sexual morality based on “normal mammalian behavior” without regard to longstanding ethical and religious imperatives. Based on extensive research with primary sources and archival materials, John G. West's captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology. Marshaling fascinating anecdotes and damning quotations, West's narrative explores the far-reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature. It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong. West concludes with a powerful plea for the restoration of democratic accountability in an age of experts.

International Drivers of Corruption A Tool for Analysis

Rowman & Littlefield

Authored by one of the ballet's most respected experts, this volume includes scene-by-scene retellings of the most popular classic and contemporary ballets, as performed by the world's leading dance companies. Certain to delight long-time fans as

well as those just discovering the beauty and drama of ballet.
Agricultural Land Reform in South Africa Cambridge University Press

This volume presents an anthropological perspective on the hidden continuities between corruption and law. The authors argue that the two opposites, corruption and law, are inextricably linked - with the possibility of the former already inscribed into the latter. Taking a critical stance towards the normative good governance agenda spearheaded by institutions such as Transparency International and the World Bank, this volume argues that by uncritically depicting corruption as an absolute evil, these anti-corruption programs disregard the close relationship that exists between corruption and state power. Addressing various aspects of a complex and ambivalent phenomenon, *Corruption and the Secret of Law* draws on studies from different parts of the world including Burundi, China, Indonesia, Italy, Japan, Mexico and the USA and provides a valuable resource for students, researchers and policy-makers working in this area.

Corruption, Global Security, and World Order Anchor

The death of Botswana's last founding father, Sir Ketumile Quett Masire, in June 2017, marked the end of an era. Since the release of the Fourth Edition of *Historical Dictionary of Botswana* in 2008, Botswana has gone through its most turbulent and divided decade to date. Throughout September 2016, when Botswana celebrated its 50th anniversary of independence, all the successes of the Seretse and Masire era were sources of massive national pride. Botswana had expanded provisions of electricity, water, education, and health services to almost all of its people and become a model nation that owned its natural resources and plowed the profits back into the nation's development. Despite these successes, Botswana has a high unemployment rate (about 20 percent) and a much larger cohort of the underemployed. This fifth edition of *Historical Dictionary of Botswana* contains a chronology, an introduction, appendixes, an extensive bibliography, and more than 700 cross-referenced entries on important personalities and aspects of the country's politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Botswana.

Dominance and Decline Ashgate Publishing, Ltd.

"This book is the perfect guide for those administrators and teachers who are truly interested in equalizing educational opportunities at all levels." —Rebecca S. Compton, Professor of Elementary Education East Central University Proven strategies for increasing the academic performance of students with low school-readiness skills! Children of low socioeconomic status often enter school with low school-readiness skills, leading them to be misidentified as learning disabled. Educators in Grades K-12 can allocate resources for special education services more effectively and meet the needs of low SES students by preventing students from being placed in the wrong program and by providing readiness supports. Offering an in-depth look at schools that have realized effective results in remarkable time frames, the authors challenge educators and parents to consider how low expectations can affect student achievement—and emphasize optimism as a necessary tenet of schools' day-to-day teaching/learning programs and school-community relationships. This resource provides: Training resources for teaching low SES students Assessment tools for identifying learning needs Strategies for building relationships of trust and collaboration throughout the school community Data charts that illustrate the increase in student achievement from schoolwide initiatives A bibliography and glossary of pertinent research and terminology With these strategies and tools, schools can meet the developmental and environmental needs of their most vulnerable students and watch student achievement and confidence soar!

Developmental Local Government Springer Science & Business Media

This book concerns the role of the state in achieving development. In many developing countries conventional wisdom concluded that development is best achieved through a centralised development strategy. The failure of this centralised development strategy has brought about the emergence of decentralisation to local government as one of the means to turn the tide of underdevelopment. This book presents decentralisation not only as a manifestation of 'good governance', but also as an indispensable tool towards development. The central question, however, is the following: how should the transitional state convert this into constitutional and legal arrangements? The author proposes a model for capturing the developmental role of local government in institutional

arrangements. The new design for local government, put forward in South Africa's 1997 Constitution, is based on the notion that local government should be the epicentre of development. This has prompted the author to use this South African concept as well as the first experiences with the implementation of the new local government dispensation as a case study. The importance of the book thus lies in the fact that it produces an institutional model for developmental local government that is not only based on development and decentralisation theories but is also tested in practice. It is hoped that those with an interest in the role of the state in development will find the arguments and conclusions useful. The book also provides a comprehensive overview of the South African design for local government, which is of interest to lawyers, policy makers and other parties involved in the implementation of the South African decentralisation strategy. Jaap de Visser teaches public law at the Law Faculty of Utrecht University in the Netherlands. Until the end of 2002, he worked as a researcher for the Community Law Centre (University of the Western Cape), specialising in local government law.

The Cybernetics of Human Learning and Performance ASP / VUBPRESS / UPA

The corporate market is now embracing free, "open source" software like never before, as evidenced by the recent success of the technologies underlying LAMP (Linux, Apache, MySQL, and PHP). Each is the result of a publicly collaborative process among numerous developers who volunteer their time and energy to create better software. The truth is, however, that the overwhelming majority of free software projects fail. To help you beat the odds, O'Reilly has put together *Producing Open Source Software*, a guide that recommends tried and true steps to help free software developers work together toward a common goal. Not just for developers who are considering starting their own free software project, this book will also help those who want to participate in the process at any level. The book tackles this very complex topic by distilling it down into easily understandable parts. Starting with the basics of project management, it details specific tools used in free software projects, including version control, IRC, bug tracking, and Wikis. Author Karl Fogel, known for his work on CVS and Subversion, offers practical advice on how to set up and use a range of tools in combination with open mailing lists and archives. He also provides several chapters on the

essentials of recruiting and motivating developers, as well as how to gain much-needed publicity for your project. While managing a team of enthusiastic developers -- most of whom you've never even met -- can be challenging, it can also be fun. Producing Open Source Software takes this into account, too, as it speaks of the sheer pleasure to be had from working with a motivated team of free software developers.

The Journey to Transform Local Government Rowman & Littlefield

A "sharp, witty, and well-researched" history of 4chan and its cultural impact (The Rumpus). Created by a fifteen-year-old wunderkind in 2003, it is the creative force behind "the Web's most infectious memes and catchphrases" (Wired). Today it has millions of monthly users, and enormous social influence. Epic Win for Anonymous is the first book to tell 4chan's story. Longtime blogger and 4chan expert Cole Stryker writes with a voice that is engrossingly informative and approachable. Whether examining the 4chan-provoked Jessi Slaughter saga and how cyber-bullying is part of our new reality, or explaining how Sarah Palin's email account was leaked, Epic Win for Anonymous proves 4chan's transformative cultural impact, and how it has influenced—and will continue to influence—society at large.

Green Paper on Higher Education Transformation The Stationery Office

"As Jacob Zuma moves into the twilight years of his presidencies of the African National Congress (ANC) and of South Africa, ... [this book] takes stock of his administration ... Susan Booysen shows how the ANC has become centred on Zuma the person, and how its defence of his flawed leadership undermines the party's capacity to govern competently and to protect its long-term future."--Front cover flap.

English-Dutch and Dutch-English Dictionary Silvana Editoriale Koevoet! has been an global bestseller since its release over 20 years ago. This new edition goes far beyond the original in capturing the courage, fear and intensity of South Africa's deadly bush war. Never before had an outsider been given unrestricted access to Koevoet, the elite South West African Police counterinsurgency unit - also known as Operation K and officially as the South West Africa Police Counter Insurgency Unit (SWAPOL-COIN). Author Jim Hooper spent a total of five months embedded with the semi-secret and predominantly black 'Ops K',

which climaxed with one of the most vicious and determined infiltrations ever mounted by the communist-backed South West Africa People's Organization (SWAPO). Crossing regularly into Angola in pursuit of the insurgents, he saw friends die next to him and was twice wounded himself. This updated edition, drawing on the recollections and diaries of the men he rode with, will fascinate yet another generation of readers. In assembling this work, Jim Hooper had the opportunity to re-connect with so many of the men who allowed this outsider to ride with them. All of which brought a new intensity and poignancy. It also reminded Jim Hooper how privileged he was to have been witness to Koevoet's war. This stunning work is a tribute to Koevoet and the legend they created. "Hooper is a careful reporter, but also a born writer; his vivid word-pictures drag you in and hold you. He skillfully conveys his initially unwelcoming reception by an operational unit; the long, frustrating grind of search operations in punishing terrain and climate; the extraordinary bush skills of the Ovambo policemen; the shock of sudden contact, and its aftermath." Martin Windrow "Jim Hooper's account of South Africa's successful "Ops K" in Namibia against South West Africa's People's Organization guerrillas should be required reading. The classic narrative is as timely today as it was twenty years ago." Charles D. Melson, Chief Historian, U.S. Marine Corps University. "This expanded edition is a skillfully woven mosaic of personal accounts from those involved and what he experienced during combat with Koevoet. The use of new material from those he rode with lays bare the realities of war, the fears and emotions that ebb and flow in the heat of combat, and the courage one finds to bring the battle to the enemy" Piet Nortje, Author of 32 Battalion "Koevoet describes in great detail the men, both black and white, and their mine-protected cross-country vehicles which were years ahead of anything in use by other western forces, the dedicated helicopter support units and the tactics used to bring an elusive guerrilla force to battle." Paul French, Author of Shadows of a Forgotten Past: To the Edge with the Rhodesian SAS and Selous Scouts.

A Change of Tongue Penguin Random House South Africa While leftist governments have been elected across Latin America, this 'Pink Tide' has so far failed to reach Peru. Instead, the corporate elite remains firmly entrenched, and the left continues to be marginalised. Peru therefore represents a

particularly stark example of 'state capture', in which an extreme concentration of wealth in the hands of a few corporations and pro-market technocrats has resulted in a monopoly on political power. Post the 2016 elections, John Crabtree and Francisco Durand look at the ways in which these elites have been able to consolidate their position at the expense of genuine democracy, with a particular focus on the role of mining and other extractive industries, where extensive privatization and deregulation has contributed to extreme disparities in wealth and power. In the process, Crabtree and Durand provide a unique case study of state development, by revealing the mechanisms used by elites to dominate political discussion and marginalize their opponents, as well as the role played by external actors such as international financial institutions and foreign investors. The significance of Crabtree's findings therefore extends far beyond Peru, and illuminates the wider issue of why mineral-rich countries so often struggle to attain meaningful democracy.

Political History of Belgium Helion and Company / GG Books

Never before have world order and global security been threatened by so many destabilizing factors—from the collapse of macroeconomic stability to nuclear proliferation, terrorism, and tyranny. Corruption, Global Security, and World Order reveals corruption to be at the very center of these threats and proposes remedies such as positive leadership, enhanced transparency, tougher punishments, and enforceable sanctions. Although eliminating corruption is difficult, this book's careful prescriptions can reduce and contain threats to global security. Contributors: Matthew Bunn (Harvard University), Erica Chenoweth (Wesleyan University), Sarah Dix (Government of Papua New Guinea), Peter Eigen (Freie Universität, Berlin, and Africa Progress Panel), Kelly M. Greenhill (Tufts University), Charles Griffin (World Bank and Brookings), Ben W. Heineman Jr. (Harvard University), Nathaniel Heller (Global Integrity), Jomo Kwame Sundaram (United Nations), Lucy Koechlin (University of Basel, Switzerland), Johann Graf Lambsdorff (University of Passau, Germany, and Transparency International), Robert Legvold (Columbia University), Emmanuel Pok (National Research Institute, Papua New Guinea), Susan Rose-Ackerman (Yale University), Magdalena Sepúlveda Carmona (United Nations), Daniel Jordan Smith (Brown University), Rotimi T. Suberu (Bennington College), Jessica C. Teets (Middlebury College), and Laura Underkuffler (Cornell University).

Land Redistribution for Agricultural Development John Wiley & Sons

"The Journey to Transform Local Government is about the challenges and opportunities for municipalities in South Africa as they journey towards delivering on the promise of developmental local government. It deals with various issues on the continuum of local government transformation in South Africa, for example, what does Sustainable Development Goal 11 mean for a municipality? Given that good governance is essential for success, are municipalities implementing anti-corruption policies and are the Municipal Public Accounts Committees functioning? How do we staff municipalities with professionals who see local

government as their career of choice? And, given that our ageing infrastructure poses risks for the future, what should municipalities do to ensure proper maintenance? How do we manage the overlapping roles of traditional leaders and municipalities? Can traditional land use allocation and building practices co-exist with municipal planning and building regulations? And, when municipalities insist on town planning and building regulations, how does this affect local entrepreneurs? Lastly, how do we measure spatial transformation in practice? The authors grappling with these questions come from universities, government, civil society and the private sector. They fill the

pages of this book with some of the latest research on local government, grounded in the reality of today's South Africa."-- Back cover.

Epic Win for Anonymous UNESCO Publishing

Confronting contemporary African art's awkward coexistence with earlier African art as "ethnographic artifact," Geo-Graphics celebrates the flourishing of African art on the international circuit, while simultaneously asserting its ancestry and critiquing the valorization of heritage. David Adjaye's photographs of African capitals and an examination of contemporary African art centers further contextualize the continent's recent cultural transformations.
