Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Although the scarcity of public intellectuals among today's academic professionals is certainly a cause for concern, it also serves as a challenge to explore alternative, more subtle forms of political intelligence. Letters to Power accepts this challenge, guiding readers through ancient, medieval, and modern traditions of learned advocacy in search of persuasive techniques, resistant practices, and ethical sensibilities for use in contemporary democratic public culture. At the center of this book are the political epistles of four renowned scholars: the Roman Stoic Seneca the Younger, the late-medieval feminist Christine de Pizan, the key Enlightenment thinker Immanuel Kant, and the Christian anti-philosopher Søren Kierkegaard. Anticipating much of today's online advocacy, their letter-writing helps would-be intellectuals understand the economy of personal and public address at work in contemporary relations of power, suggesting that the art of lettered protest, like letter-writing itself, involves appealing to diverse, and often strictly virtual, audiences. In this sense, Letters to Power is not only a nuanced historical study but also a book in search of a usable past.

full terms as a US Senator. Thirty years. The Senate Majority leader's power is as undeniable as it is infuriating, and the people of Kentucky have had enough. Led by Matt Jones, they (and they alone) have the power to oust him from office. How did Jones, a local boy turned attorney turned sports radio host come to shine the brightest light on McConnell's ineptitude? Simple—he knows Kentucky inside and out, and has used the state's love of sports as an entry point for showcasing how McConnell has failed his fellow citizens both economically and socially for three decades. Entertaining, maddening, yet ultimately inspiring, these stories from Kentuckians in each of its 120 counties illustrate the Senate Majority leader's stunning shortcomings. "Jones employs a sharp, political scalpel eviscerating McConnell...[and this book is] an effective combination of description and vivisection" (Kirkus Reviews). Jones brings his trademark wit and wisdom throughout the book, while also offering a beautiful portrait of a state with arguably the most untapped potential in our country. Ultimately, the white-hot hatred for McConnell on the coasts is just white noise. Only the people of Kentucky can remove him from office. Here, Matt Jones demonstrates he has the influence, charisma, and institutional knowledge to lead the charge. He and his fellow Kentuckians have had enough—and they're ready for a fight.

"The National Environmental Policy Act has grown more, not less, important in the decades since its enactment. No one knows more about NEPA than Lynton Caldwell. And no one has a clearer vision of its relevance to our future. Highly recommended." —David W. Orr, Oberlin College What has been achieved since the National Environmental Policy Act was passed in 1969? This book points out where and how NEPA has affected national environmental policy and where and why its intent has been frustrated. The roles of Congress, the President, and the courts in the implementation of NEPA are analyzed. Professor Caldwell also looks at the conflicted state of public opinion regarding the environment and conjectures as to what must be done in order to develop a coherent and sustained policy.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
