The most comprehensive, all-inclusive look at the history and evolution of shot on video horror films. In 1982, "Boardinghouse" became the first shot on video feature-length horror film ever made.

Totally lensed on videotape, the film was later transferred to 16mm and blown-up to 35mm for theatrical exhibition. In 1983, David A. Prior shot "Sledgehammer" on video and eventually released the film on videotape. For the first time, analog video became the format used in motion picture productions. It was smeary, messy and it wasn't film... but it was cheap. In 1985, United Home Video boldly released "Blood Cult" with the claim it was "the first movie made for the home video market." The booming popularity of video stores coupled with a never-satisfied demand for content ensured these films longevity. Soon hundreds of titles followed, all video-created features by independent unknowns. They weren't from Hollywood. They weren't trained. But they had a lot of heart and a love for horror. And they made their own movies against the odds. For the first time EVER - "ANALOG NIGHTMARES" has brought these films together. Everything from "Boardinghouse" to "Zombie Holocaust" individually reviewed, categorized and presented chronologically by production year. Over 260 films! Featuring in-depth interviews with the filmmakers themselves - some speaking for the very first time! TIM BOGGS! MARK POLONIA! DONALD FARMER! TIM RITTER! JOEL D. WYNKOOP! DOUG STONE! ANDREA ADAMS! With his earlier books, Quantum Healing, Perfect Health and Creating Health, Dr Chopra developed a blend of Eastern and Western medical philosophy with the intention of creating a cleaner, richer view of the road to perfect health - a balance of mind, body and spirit. He now continues his prescription as he describes his journey from India to the West and from a formal practice as a board-certified endocrinologist to a wider view of the primacy of the mind and spirit.

America's safety net is torn and tattered. Income inequality continues to grow—the gap between rich and poor has expanded fivefold in the last 25 years. For millions of working families achieving basic middle class comforts has begun to seem as distant a dream as winning the lottery. What is needed, and what veteran organizer and ACORN founder Wade Rathke provides in this hard-hitting new book, is a comprehensive grassroots strategy to create what he calls citizen wealth: an enduring foundation on which working people can build a future that extends beyond paying next month's rent. Rathke shares breakthrough strategies that have enabled ACORN and other organizations help people secure the basics of citizen wealth—a house and a decent income—offering from-the-trenches advice on mounting successful living wage campaigns, battling unscrupulous and predatory lending practices, and developing new forms of worker organizations to protect wages and benefits. The anti-poverty programs still out there can provide critical support for citizen wealth-building efforts, but they're woefully underutilized. Rathke shows how to cut through government indifference and bureaucratic obstacles to provide those in need with access to these vital resources. But community organizations can't do it alone. Rathke describes ACORN partnerships with HSBC Bank and H & R Block that helped these businesses see building citizen wealth as a new market opportunity—a win for them and for the people they once exploited. And he looks at other examples of strange bedfellows in the fight for citizen wealth, including Citibank, once the target of massive protests by ACORN and now, working with them, a major investor in working class communities. "We need to create a national economic and political consensus that increasing family income, wealth and assets is not 'welfare' or an entitlement 'give-away' program but an investment in the public good and well-being." Rathke writes. Based on forty years of hard-won experience, Wade Rathke offers a new blueprint for helping millions to achieve the American Dream. *Running with the Giants* Sapna Book House (P) Ltd.

Would you like to become a better composer, advance your skills, and increase your creativity? This book can help you: Become a more skilled composer. Be a more prolific composer. Promote your work. Get your pieces performed. Publish your music. Even now, as a published, award-winning composer, if I saw this book, I'd buy it. That's because earning a high school diploma, a college

degree, or even an advanced degree is a wonderful, promising achievement--I know. I did that. But the problem is: Diplomas and degrees don't guarantee that you know how to advance your skills and increase your output and success. Degrees don't ensure your continued success in today's complicated, competitive world. A degree doesn't guarantee success especially when you make major or even minor career changes. This book's huge amount of specifics makes it a valuable reference that you read, reread, and consult often. This book is a vital standalone guide for composers outside of formal learning circles and a practical supplement for composers who are studying or who have studied in classrooms. Because composing music is so varied with an enormous number of opportunities, a diverse, international group of 24 fellow composers contributed their ideas to this book. These composers work in different genres and styles. This book includes details of specific composer how-to skills, so composers and those who want to be composers get an intimate, unique view of the private professional procedures and practices of fellow composers--a perspective few composers ever see in one comprehensive source. Let this book's wealth of guidance, insights, and suggestions inspire you! Dive into this book and watch your skills, output, and success blossom!
