Knaurs Lexikon moderner Kunst Symmetry as a Developmental Principle in Nature and Art World Scientific

Paolo Soleri, Urban Designer Gunter Narr Verlag

Looking beyond the boundaries of various disciplines, the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges. He explains that it is possible to readapt art to the sciences, and vice versa, by means of an evolutionary concept of symmetry. Many pictorial examples are included to enable the reader to fully understand the issues discussed. Based on the artistic evidence that the author has

collected, he proposes that the new ars evolutoria can function as an example for the sciences. The book is divided into three distinct parts, each one focusing on a special issue. In Part I, the phenomenon of symmetry, including its discovery and meaning is reviewed. The author looks closely at how Vitruvius, Polyclitus, Democritus, Plato, Aristotle, Plotinus, Augustine, Alberti, Leonardo da Vinci and Durer viewed symmetry. This is followed by an explanation on how the concept of symmetry developed. The author further discusses symmetry as it appears in art and science, as well as in the modern age. Later, he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science. In Part II, he covers the points of contact between the form-developing process in nature and art. He deals with biological questions, in particular evolution. The collection of

new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry in Part III. The author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles. He demonstrates symmetry as a far-reaching, leading, structuring, causal element of evolution, as the idea lying behind nature and culture. Numerous controllable reproducible double-mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception.

The Cobra group, founded in 1948, was the most important avant-garde movement in European art after the Second World War. Its members, primarily artists from Copenhagen, Brussels and Amsterdam were driven by Marxist ideals and felt they were

A History of Six Ideas Springer

The history of aesthetics, like the histories of other sciences, may be treated in a two-fold manner: as the history of the men who created the field of study, or as the history of the questions that have been raised and resolved in the course of its pursuit. The earlier History of Aesthetics (3 volumes, 1960-68, English-language edition 1970-74) by the author of the present book was a history of men, of writers and artists who in centuries past have spoken up concerning beauty and art, form and creativity. The present book returns to the same subject, but treats it in a different way: as the history of aesthetic questions, concepts, theories. The matter of the two books, the previous and the present, is in part the same; but only in part: for the earlier book ended with the 17th century, while the present one brings the subject up to our own times. And from the 18th century to the 20th much happened in aesthetics; it was only in that period that aesthetics achieved recognition as a separate science, received a name of its own, and produced theories that early scholars and artists had never dreamed of.

This collection of essays focuses on the way blurred boundaries are represented in pre-modern texts and visual art and how they

were received and perceived by their audiences: readers, listeners, and viewers. According to the current understanding that opposing cognitive categories that are so common in modern thinking do not apply to pre-modern mentalities, we argue that individuals in medieval and pre-modern societies did not necessarily consider sacred and secular, male and female, real and fictional, and opposing emotions as absolute dichotomies. The contributors to the present collection examine a wide range of cultural artifacts – literary texts, wall paintings, sculptures, jewelry, manuscript illustrations, and various objects as to what they reflect regarding the dominant perceptual system – the network of beliefs, worldviews, presumptions, values, and norms of viewing/reading/hearing different from modern epistemology strongly predicated on the binary nature of things and people. The essays suggest that analyzing pre-modern cultural works of art or literature in light of reception theory can lead to a better understanding of how those cultural products influenced individuals and impacted their thoughts and actions.

Over a quarter of a century has passed since Muntu was first published in English, but this landmark examination still provides one of the most in-depth looks at African and neo-African culture. In his insightful study, Janheinz Jahn surveys the whole range of traditional and modern African thought expressed in religion, language, philosophy, literature, art, music and dance. He demonstrates that African culture, far from being doomed to destruction or homogenization under the onslaught of the West, is evolving into a rich and independent civilization that is capable

of incorporating those elements of the West that do not threaten its basic values. Muntu (the Bantu word for “human”) presents an invaluable insight into the foundations of the unique and vital tapestry of cultures that compromise Africa today.

Up to now the culture of the Stalin period has been studied mainly from a political or ideological point of view. In this book renowned specialists from many countries approach the problem rather 'from inside'. The authors deal with numerous aspects of Stalinist culture such as art, literature, architecture, film and popular culture. Yet the volume is more than a mere collection of studies on special issues. It is an inquiry into the very nature of a certain type of culture, its symbols, rites and myths. The book will be useful not only for students of Soviet culture but also for a

wider audience.
