"Born in 1907 in El Paso, Texas, Lea says he can't remember when he didn't like to draw pictures. Recognizing his talent, his parents and teachers encouraged him to attend the Art Institute of Chicago. After high school graduation in 1924, he boarded a train for Chicago, where for ten years he studied and worked with his mentor, the muralist John Norton. Drawn back to the Southwest in 1934, Lea lived in Santa Fe for two years and then returned to El Paso, which has been his home ever since." "During World War II, Lea was a war correspondent for Life magazine, and he witnessed action in the North Atlantic, the South Pacific, Europe and North Africa. As a portraitist, he came in personal contact with men who changed the course of history, including Jimmy Doolittle, Claire Chennault, and Chiang Kai-Shek. After the war, an assignment with Life took him to Mexico where his interest was stimulated in bullfighting. That experience led to the writing of his

first novel, *The Brave Bulls*, published in 1949. It became a bestseller and a successful film. In the 1950s and 1960s Lea wrote and illustrated three more novels, an autobiography, and the notable two-volume history, *The King Ranch*."--

Immigration Outside the Law Crown
Chasing Villa is a record of events in Western history, military history, the Mexican Revolution, and the last of the horse cavalry. Following its first publication in 1934, U.S. Army Colonel Frank Tompkins' account of the Punitive Expedition by a participant became widely considered to be one of the most comprehensive. The book tells the story of the Columbus Raid and Pershing's Expedition into Mexico. On March 9, 1916 the border town of Columbus, New Mexico was attacked by forces under the command of the Mexican revolutionary, Pancho Villa. Eighteen Americans were killed and a number of buildings were

burned to the ground before the U.S. Cavalry, inflicting heavy losses, drove Villa and his mounted band back into Mexico. Frank Tompkins, a Major in the U.S. Cavalry at the time, led the counterattack against Villa's mounted men on March 9th, and was with General John "Black Jack" Pershing during the subsequent year-long "Punitive Expedition" that sought to capture the elusive Villa in Mexico. The Columbus Raid and Punitive Expedition proved to be the last major campaign of the U.S. Cavalry. At the same time it presaged the more modern military techniques that would soon be employed by American forces in World War I. First published in 1934 and long out of print, "Chasing Villa" is a sound and literate record of milestone events in Western history, military history, the Mexican revolution, and the last of the horse cavalry.

A Pound of Flesh University of Chicago Press

Over seven million Americans are either incarcerated, on probation, or on parole, with their criminal records often following them for life and affecting access to higher education, jobs, and housing. Court-ordered monetary sanctions that compel criminal defendants to pay fines, fees, surcharges, and restitution further inhibit their ability to reenter society. In *A Pound of Flesh*, sociologist Alexes Harris analyzes

the rise of monetary sanctions in the criminal justice system and shows how they permanently penalize and marginalize the poor. She exposes the damaging effects of a little-understood component of criminal sentencing and shows how it further perpetuates racial and economic inequality. Harris draws from extensive sentencing data, legal documents, observations of court hearings, and interviews with defendants, judges, prosecutors, and other court officials. She documents how low-income defendants are affected by monetary sanctions, which include fees for public defenders and a variety of processing charges. Until these debts are paid in full, individuals remain under judicial supervision, subject to court summons, warrants, and jail stays. As a result of interest and surcharges that accumulate on unpaid financial penalties, these monetary sanctions often become insurmountable legal debts which many offenders carry for the remainder of their lives. Harris finds that such fiscal sentences, which are imposed disproportionately on low-income minorities, help create a permanent

economic underclass and deepen social stratification. *A Pound of Flesh* delves into the court practices of five counties in Washington State to illustrate the ways in which subjective sentencing shapes the practice of monetary sanctions. Judges and court clerks hold a considerable degree of discretion in the sentencing and monitoring of monetary sanctions and rely on individual values—such as personal responsibility, meritocracy, and paternalism—to determine how much and when offenders should pay. Harris shows that monetary sanctions are imposed at different rates across jurisdictions, with little or no state government oversight. Local officials' reliance on their own values and beliefs can also push offenders further into debt—for example, when judges charge defendants who lack the means to pay their fines with contempt of court and penalize them with additional fines or jail time. *A Pound of Flesh* provides a timely examination of how monetary sanctions permanently bind poor offenders to the judicial system. Harris concludes that in letting monetary sanctions go unchecked, we have created a two-tiered legal system that imposes additional burdens on

already-marginalized groups. *Criminal Liability for Serious Traffic Offences* Pickle Partners Publishing The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-

psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. "A 1975 state-wide law in Texas made it legal for school districts to bar students from public schools if they were in the country illegally, thus making it extremely difficult or even possible for scores of children to receive an education. The resulting landmark Supreme Court case, *Plyler v. Doe* (1982), established the constitutional right of children to attend public elementary and secondary schools

regardless of legal status and changed how the nation approached the conversation about immigration outside the law. Today, as the United States takes steps towards immigration policy reform, Americans are subjected to polarized debates on what the country should do with its "illegal" or "undocumented" population. In *Immigration Outside the Law*, acclaimed immigration law expert Hiroshi Motomura takes a neutral, legally-accurate approach in his attention and responses to the questions surrounding those whom he calls "unauthorized migrants." In a reasoned and careful discussion, he seeks to explain why unlawful immigration is such a contentious debate in the United States and to offer suggestions for what should be done about it. He looks at ways in which unauthorized immigrants are becoming part of American society and why it is critical to pave the way for this integration. In the final section of the book, Motomura focuses on practical and politically viable solutions to the problem in three public policy areas: international economic development, domestic economic policy, and educational policy.

Amidst the extreme opinions voiced daily in the media, Motomura explains the complicated topic of immigration outside the law in an understandable and refreshingly objective way for students and scholars studying immigration law, policy-makers looking for informed opinions, and any American developing an opinion on this contentious issue"--

Throughout its history, America's policies have alternatively embraced human rights, regarded them with ambivalence, or rejected them out of hand. The essays in this volume put these shifting political winds into a larger historical perspective, from the country's very beginnings to the present day.

Pass of the North High Lonesome Books
AMERICA IS FACING UNPRECEDENTED CHALLENGES—new threats to our economic well-being, our environment, and our security. The American people are

looking for real answers; the next president must mobilize our government and our citizens in ways that no president has done since FDR. America needs the power of progress . . . once again. At the turn of the twentieth century, the American Dream was beginning to dim in a nation riven by growing inequalities in wealth and run by a powerful network of privileged industrialists and their political allies. But that era also gave birth to a renaissance in American political thought that forever changed our nation. At a time when conservative ideology served as an excuse for the accumulation of wealth and privilege, the original Progressive movement created a new political order built on America's basic principles—justice and equality for all, economic opportunity, and a commitment to the common good. The lives of all Americans have been profoundly improved by the achievements of progressive reformers, from the eight-hour workday and voting rights to our victory in the Cold War and the economic gains middle-class Americans enjoyed under our most recent progressive president, Bill Clinton. Today's challenges demand a second great Progressive era.

America needs an economy in which workers at every income level share in our riches; a climate policy that stops global warming and ends our addiction to fossil fuels; and American leadership in the global fight against terrorism, nuclear proliferation, and poverty. In *The Power of Progress*, John Podesta—former Clinton chief of staff—along with his colleague, John Halpin, explains how progressive values changed America in the wake of the Gilded Age and how these values will reshape America after the Bush presidency. Tapping the spirit of great progressive leaders from Theodore and Franklin Roosevelt to Martin Luther King Jr., *The Power of Progress* provides the road map toward a government responsive to the needs of its citizens; one that is focused on our generation's greatest challenges: combating global warming, growing our economy and expanding the middle class, and meeting America's twenty-first-century security challenges.

Public awareness regarding the life-threatening nature and intense traumatic

impact of domestic violence has substantially increased in the past decade. At the same time, dramatic changes have taken place regarding criminal justice and social work policies and practices applied to domestic violence intervention. And while the prevalence of domestic violence has declined slightly, national estimates still indicate that every year, approximately eight million women are abused, battered, stalked, or killed by their husbands, boyfriends, and other intimate partners. Featuring cutting-edge research and expert intervention strategies, the *Handbook of Domestic Violence Intervention Strategies: Policies, Programs, and Legal Remedies* is designed to prepare professionals to swiftly and compassionately meet the multiple needs of women and children who have suffered from domestic violence. This original and indispensable volume focuses on the numerous advances in legal remedies, program developments, treatment protocols, and multidisciplinary perspectives. It is a comprehensive guide to the latest research, public policies, and legal and criminal justice responses, covering federal and state legislation as

well as trends in police and court responses to domestic violence. This is the first book to include court-based technology developments and new research related to the duration and intensity of woman battering. Highlighting actual cases and promising programs, the handbook also addresses important social work issues, including risk assessment protocols, a new five level continuum of woman battering, intervention methods, and treatment models. The book also examines the myriad legal issues and health problems facing the most neglected and vulnerable battered women. Written by expert practitioners and leading scholars in the field, the book's 23 chapters provide rich insights into the complexities and challenges of addressing domestic violence. This timely and definitive handbook is recommended for students, clinicians, policy makers, and researchers in the fields of social work, victim services, criminal justice, hospital administration, mental health counseling, public health, pastoral counseling, law enforcement. In fact, this volume is a critical resource for all helping professionals who are assisting abused

women in escaping and remaining free from violent relationships.

Fifty years of large-scale immigration has brought significant ethnic, racial, and religious diversity to North America and Western Europe, but has also prompted hostile backlashes. In *Fear, Anxiety, and National Identity*, a distinguished multidisciplinary group of scholars examine whether and how immigrants and their offspring have been included in the prevailing national identity in the societies where they now live and to what extent they remain perpetual foreigners in the eyes of the long-established native-born. What specific social forces in each country account for the barriers immigrants and their children face, and how do anxieties about immigrant integration and national identity differ on the two sides of the Atlantic? Western European countries such as Germany, the Netherlands, and the United Kingdom have witnessed a significant increase in Muslim immigrants, which has given rise to nativist groups that question their belonging. Contributors Thomas Faist and Christian Ulbricht discuss how German politicians have

implicitly compared the purported “backward” values of Muslim immigrants with the German idea of *Leitkultur*, or a society that values civil liberties and human rights, reinforcing the symbolic exclusion of Muslim immigrants. Similarly, Marieke Sloomman and Jan Willem Duyvendak find that in the Netherlands, the conception of citizenship has shifted to focus less on political rights and duties and more on cultural norms and values. In this context, Turkish and Moroccan Muslim immigrants face increasing pressure to adopt “Dutch” culture, yet are simultaneously portrayed as having regressive views on gender and sexuality that make them unable to assimilate. Religion is less of a barrier to immigrants’ inclusion in the United States, where instead undocumented status drives much of the political and social marginalization of immigrants. As Mary C. Waters and Philip Kasinitz note, undocumented immigrants in the United States. are ineligible for the services and freedoms that citizens take for granted and often live in fear of detention and deportation. Yet, as Irene Bloemraad points out, Americans’ conception of national identity

expanded to be more inclusive of immigrants and their children with political mobilization and changes in law, institutions, and culture in the wake of the Civil Rights Movement. Canadians’ views also dramatically expanded in recent decades, with multiculturalism now an important part of their national identity, in contrast to Europeans’ fear that diversity undermines national solidarity. With immigration to North America and Western Europe a continuing reality, each region will have to confront anti-immigrant sentiments that create barriers for and threaten the inclusion of newcomers. *Fear, Anxiety, and National Identity* investigates the multifaceted connections among immigration, belonging, and citizenship, and provides new ways of thinking about national identity.

These records are publicly disclosed on the internet, commodified into valuable big data, and leveraged against people. In *Digital Punishment*, Sarah Lageson demonstrates the consequences this
