It is therefore obvious that good patient management necessitates the use of an alternative route of nutritional support in patients unable to eat or absorb an oral diet. This alternative is parenteral nutrition, which is the subject of this book. While there are many texts on the subject of parenteral nutrition, very few if any are directed to the practical details of organizing the delivery of parenteral nutrition from a multidisciplinary point of view. In this publication we present the practice of parenteral nutrition as

viewed by a team of a physician, nurse, and pharmacist.

The China Study: Revised and Expanded Edition BenBella Books, Inc.

The revised and expanded edition of the bestseller that changed millions of lives The science is clear. The results are unmistakable. You can dramatically reduce your risk of cancer, heart disease, and diabetes just by changing your diet. More than

30 years ago, nutrition researcher T. Colin Campbell and his team at Cornell, in partnership with teams in China and England, embarked upon the China Study, the most comprehensive study ever undertaken of the relationship between diet and the risk of developing disease. What they found when combined with findings in Colin's laboratory, opened their eyes to the dangers of a diet high in animal protein and the unparalleled health benefits of a whole foods, plant-based diet. In 2005, Colin and his son Tom, now a physician, shared those findings with the world in *The China Study*, hailed as one of the most important books about diet and health ever written. Featuring brand new content, this heavily expanded edition of Colin and Tom's groundbreaking book includes the latest undeniable evidence of the power of a plant-based diet, plus updated information about the changing medical system and how patients stand to benefit from a surging interest in plant-based nutrition. *The China Study—Revised and Expanded Edition* presents a clear and concise message of hope as it dispels a multitude of health myths and misinformation. The basic message is clear. The key to a long, healthy life lies in three things: breakfast, lunch, and dinner.
