With extraordinary narrative power, New York Times bestselling author Colleen McCullough sweeps the reader into a whirlpool of pageantry and passion, bringing to vivid life the most glorious epoch in human history. When the world covered before the legions of Rome, two extraordinary men

dreamed of personal glory: the military genius and wealthy rural "upstart" Marius, and Sulla, penniless and debauched but of aristocratic birth. Men of exceptional vision, courage, cunning, and ruthless ambition, separately they faced the insurmountable opposition of powerful, vindictive foes. Yet allied they could answer the treachery of rivals, lovers, enemy generals, and senatorial vipers with intricate and merciless machinations of their own—to achieve in the end a bloody and splendid foretold destiny . . . and win the most coveted honor the Republic could bestow.

What if the goddess Athena, who sprang fully-grown from Zeus's head and denied she had a mother, became aware of the compelling existence of her other parent? What if she discovered that her mother, Metis,—first wife of Zeus and 'wiser than all gods and mortal men,' according to Hesiod—was swallowed by her father and continued to impart her wisdom to him from inside his belly? Recent Spanish novels by women parallel this hypothetical situation based on Greek myth by featuring female protagonists who obsessively re-examine the lives of their mothers, seeking to know and understand them. In *Mother & Myth in Spanish Novels*, Schumm examines six narratives by Spanish authors published since 2000 that focus on a daughter's search to know more about her matriarchal heritage: Carme Riera's *La mitad del alma*, Luc'a Etxebarria's *Un milagro en*

equilibrio, Rosa Montero's *El coraz-n del tOrtaro*, Cristina Cerezales's *De oca a oca*, Mar'a de la Pau Janer's *Las mujeres que hay en m'*, and Soledad Puertolas's *Historia de un abrigo*. In each of these novels, the protagonist realizes that failure to integrate the loss of her mother into her life results in the inability to define herself. Without valorization of the maternal subject, the legacy of the daughter is at risk—she is also objectified and swallowed— and the whole society suffers. The daughters' attention to their mothers in these novels is as if Athena had finally recognized that her mother, Metis, had been ingested by Zeus. The myth of Metis and Athena becomes a metaphor of the daughter's quest toward wholeness and individuation in these works; she begins to understand that her maternal legacy is a source of wisdom that has been obscured. These novels by Spanish women strengthen the mother's voice, rescue her from anonymity, and rewrite the matriarchal archetype.

Peter of Verona is a critical bridge between the founding generation of the Dominican Order and its achievements in the schools of the late 13th century. A dynamic preacher and peacemaker, Peter was intimately involved in the anti-heretical efforts of his order and of the papacy. The *Summa contra hereticos*, here edited and translated for the first time, is a product of the initial flush of

Dominican efforts in academic work, dating between 1235-1238. The introduction to this work attempts to establish Peter's authorship as strongly as possible. The text testifies to the efforts of the Church in defense of orthodoxy in the early 1200s, as well providing insight into the nature of the friars' intellectual project at that time. Fiercely polemical, it reads as if the author certainly had firsthand knowledge of the struggles. It represents a significant window into Dominican life between the early foundation and the work of Albert and Thomas.

The heart is an iconic symbol in the medieval and early modern European world. In addition to being a physical organ, it is a key conceptual device related to emotions, cognition, the self and identity, and the body. The heart is read as a metaphor for human desire and will, and situated in opposition to or alongside reason and cognition. In medieval and early modern Europe, the “feeling heart” – the heart as the site of emotion and emotional practices – informed a broad range of art, literature, music, heraldry, medical texts, and devotional and ritual practices. This multidisciplinary collection brings together art historians, literary scholars, historians, theologians, and musicologists to highlight the range of meanings attached to the symbol of the heart, the relationship between physical and metaphorical representations of the heart, and the uses of the heart in the production of identities and communities in medieval and early modern Europe.
