The Spirit Says Harvard University Press
Puberty is a time of tumultuous
transition from childhood to adulthood
activated by rapid physical changes,

hormonal development and explosive
activity of neurons. This book explores
puberty through the parent-teenager
relationship, as a "normal state of crisis",
lasting several years and with the
teenager oscillating between childlike
tendencies and their desire to become
an adult. The more parents succeed in
recognizing and experiencing these new
challenges as an integral, ineluctable
emotional transformative process, the
more they can allow their children to
become independent. In addition,
parents who can also see this crisis as a

chance for their own further development will be ultimately enriched by this painful process. They can face up to their own aging as they take leave of youth with its myriad possibilities, accepting and working through a newfound rivalry with their sexually mature children, thus experiencing a process of maturity, which in turn can set an example for their children. This book is based on rich clinical observations from international settings, unique within the field, and there is an emphasis placed by the author on the role of the body in self-awareness, identity crises and gender construction. It will be of great interest to psychoanalysts, psychotherapists, parents and carers, as well as all those interacting with adolescents in self,

family and society.

The Incredible Journey of Plants Wipf and Stock Publishers

Every knitter, whether a beginner or an expert, wants easy projects for travel, gifts or those times when following a complex pattern is impractical.

Sequence Knitting introduces a radical and simple approach for creating amazing fabrics by working a sequence of stitches over and over again.

Beginning with 1-row patterns, the book delves into the possibilities of this technique, expanding into methods for creating complex designs that can be worked back and forth, in the round, or in shapes like triangles. The book includes stitch dictionaries with over 190 fabrics, many of which are new and reversible, as well as over 40 patterns

for simple and elegant accessories. The simplicity of the knitting enables a thoughtful exploration of color and fiber, so designer Cecelia Campochiaro wraps up the book by considering color, fiber and variegated yarns. This groundbreaking book is sure to become a classic must-have for every knitter's reference library.

Crossing Borders - Impact of Reformation in Transylvania Since the 1520s Edition Michael Fischer GmbH

This book is about innovation, reflection and inclusion. Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing their experiences while appropriating common goods

content. We are talking of public spaces such as universities, academies, libraries, museums, science-centres, but also of any place in which co-creation activities may occur. The argument starts with the need for new narratives in the history of philosophy, which can be established through co-creation, the motor of cultural innovation. The result is redefining the history of philosophy in terms of a dialogical civilization by ensuring continuous translations, individual processes of reflection and collective processes of inclusion. Readers will grasp the effectiveness of the history of philosophy in societies that are inclusive, innovative and reflective. The Confusion of Worlds Penguin 'Gripping ... An exquisite conversation between two people who know each

other, like each other, and have mutual respect for one another' - Catholic Times

Since resigning from the papacy in 2013, the first Pope in over 700 years to do so, Pope Benedict has lived quietly in a convent in the Vatican gardens in Rome. He has devoted himself to a life of prayer and study and has vowed to remain silent, until now. So much controversy still surrounds Pope Benedict's time in office - in this book, written with bestselling German author Peter Seewald, he addresses the issues of his papacy and reveals how, at his late age, governing and reforming the Church was beyond him. Last Testament is also an autobiography, recalling Pope Benedict's childhood in Germany under Nazism, his early development as a priest, and eventually his appointment

as Archbishop of Munich. After becoming Pope, his account deals with the controversies that rocked the Catholic world - how he enraged Muslims with his Regensburg speech, what he did and did not do to stamp out the clerical sexual abuse of children, the 'Vatileaks' scandal and how he broke up a gay cabal within the Vatican itself. At all times, we see a man who is shy and retiring and modest being exceptionally open and frank with the outside world. In this Last Testament, a unique book insofar as no other living Pope has had the opportunity to write an account having left office, Benedict gives in his own words an unprecedented view of the difficulties, the achievements and the consequences of his time as head of the Catholic Church worldwide.

The idea of the resurrection of the physical body and the eternal continuation of life with this body in a future paradisiacal kingdom of God on earth is one of the most enigmatic of religious ideas. It fully contradicts our knowledge of the transitoriness of all things in this universe. According to the author, the origin for this idea lies in certain forms of otherworld experiences, as, for example, reported by people who had near-death experiences: encounters with the dead in brilliantly beautiful bodies and the experience of paradisiacal, seemingly earthly landscapes. He observes that cultures with a pre-modern cosmology

sometimes projected such otherworld experiences onto this world, to distant and unknown locations on earth. These experiences were the blueprint for an expectation of paradisiacal conditions on earth. The author establishes parallels between the reports of otherworld experiences and the eschatological ideas of Zoroastrianism, Judaism, and Christianity. He shows that otherworld experiences can indeed foster the expectation of paradisiacal conditions on earth by referring to the Ghost Dance movement of the Lakota people in 1890. He presumes that the confusion of worlds proved fatal not only for the Lakota people but also for Jesus of Nazareth.

Named a Best Book of the Year for the Know-It-All by The Globe and Mail In this

richly illustrated volume, a leading neurobiologist presents fascinating stories of plant migration that reveal unexpected connections between nature and culture. When we talk about migrations, we should study plants to understand that these phenomena are unstoppable. In the many different ways plants move, we can see the incessant action and drive to spread life that has led plants to colonize every possible environment on earth. The history of this relentless expansion is unknown to most people, but we can begin our exploration with these surprising tales, engagingly told by Stefano Mancuso. Generation after generation, using spores, seeds, or any other means available, plants move in the world to conquer new spaces. They release huge quantities of spores

that can be transported thousands of miles. The number and variety of tools through which seeds spread is astonishing: we have seeds dispersed by wind, by rolling on the ground, by animals, by water, or by a simple fall from the plant, which can happen thanks to propulsive mechanisms, the swaying of the mother plant, the drying of the fruit, and much more. In this accessible, absorbing overview, Mancuso considers how plants convince animals to transport them around the world, and how some plants need particular animals to spread; how they have been able to grow in places so inaccessible and inhospitable as to remain isolated; how they resisted the atomic bomb and the Chernobyl disaster; how they are able to bring life to sterile islands; how they can travel

through the ages, as they sail around the world.

Could it be that some biblical verses are both an obstacle for and an invitation to genuine dialogue? Laura Tack shows how the often problematic truth claim of John 14:6 can still inspire a dialogical process of revelation.

Leibniz was probably the last universal scholar in modern times who made original and innovative achievements in all the essential fields of knowledge of his time: as a reform-oriented lawyer, a multilateral thinking diplomat, as a mathematician of infinitesimal calculus, as the inventor of a calculating machine and in the mining of horizontal wind power, as an organizer of science and as

one of the first historians who strived for source-critical methodical objectivity.

However, this baroque diversity can only be understood from the center of a monadological philosophy, which wants to establish the unity of scientific worldview and metaphysical concept of the world. It is distorted in the classical reception because only Leibniz the Theodicy was known. The topicality of Leibniz today consists in re-exposing the original basic idea of unity in diversity and asking how it can be made fruitful for philosophical and political thought in the 21st century. This book is a translation of the original German 1st edition *Leibniz und die Folgen* by Jörg Zimmer, published by J.B. Metzler, imprint of Springer-Verlag GmbH, part of Springer Nature in 2018. The translation

was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Disruptive Power examines a surprising revival of faith in Catholic miracles in Germany from the 1920s to the 1960s. The book follows the dramatic stigmata of Therese Neumann of Konnersreuth and her powerful circle of followers that included theologians, Cardinals, politicians, journalists, monarchists, anti-fascists, and everyday pilgrims. Disruptive Power explores how this and other similar groups negotiated the precariousness of the Weimar Republic, the repression of the Third Reich, and the dynamic early years of the Federal Republic. Analyzing a network of rebellious traditionalists, O'Sullivan illustrates the divisions that

characterized the German Catholic minority as they endured the tumultuous era of the world wars. Analyzing material from archives in Germany and the United States, Michael E. O'Sullivan investigates the unsanctioned but very popular visions in several rural towns after World War II, providing micro-histories that illuminate the impact of mystical faith on religiosity, politics, and gender norms.

A new movement is on the scene: effective altruism-the combination of love and efficiency, making the world a better place not just with a bleeding heart and empathy but with a radical focus on reason and evidence and never losing sight of the goal of maximal

impact. Its adherents typically stem from strongly secular environments such as elite philosophy departments or Silicon Valley. So far, a religious perspective on this movement has been lacking. What can people of faith learn from effective altruism, how can they contribute, and what must they criticise? This volume offers a first examination of these questions, providing both a Buddhist and an Orthodox Jewish perspective on them, in addition to various Christian contributions.

Disruptive Power Turtleback Books
This volume of essays by Christopher Rowland concerns the nature of apocalypticism and its reception history. While the eschatological character predominates in modern biblical scholarship, the author argues for a

focus rather on the revelatory form of apocalyptic texts. A consistent thread throughout the volume is the pervasiveness of apocalyptic and mystical elements in the New Testament and the reception of these ideas, culminating in the apocalyptic texts and images of William Blake.

Ezekiel 16 conveys a well-known portrayal of Israel's checkered history. Its borrowed metaphors, textual reuse, and developing content defy a transparent explanation of its origins. In this monograph, Tracy J. McKenzie explores the methods and motivations for textual expansions. After surveying how secondary literature has addressed the interpretive nature of additions,

traditions, redactions, and Fortschreibungen in prophetic texts, he provides a new translation and text-critical judgment of Ezekiel 16. He then analyzes how linguistic elements diachronically achieve a composite unity in the passage. This composite unity sets up the analysis that explores the ways in which the expansions have built on pre-existing texts, rewritten them, and developed their content. The author's conclusion focuses on how the interpretive moves in the expansions disclose possible motives and social settings in Yehud.

The Feasts of the Calendar in the Book of Numbers Mohr Siebeck

In this monograph, Hryhoriy Lozinsky studies five feasts contained in Num

28:16-30:1. Each of them is first treated in the light of biblical calendars and other related texts. The calendar in Numbers is later than an earlier version of Leviticus 23; yet the final form of Lev 23:1-44 is also a result of some later additions that took place after Num 28:1-30:1 had been composed. The author also focuses on the history of interpretation: he examines several pseudepigrapha, the Dead Sea Scrolls, and ancient Jewish writers from 200 BCE

to 100 CE. He shows how these ancient sources reworked the biblical texts by expansions, clarifications, and omissions. In sum, the calendar in Numbers employs several previous traditions that dealt with the feasts, sacrifices, and calendars in order to compose the detailed list of the offerings for the appointed times. Moreover, it is a text that has been used by many ancient sources, especially in the matter of the sacrifices.
