Since the discovery of the aflatoxins in the 1960s, mycotoxin regulations have been established in many countries, both to protect the consumer from the harmful effects of these toxins that may contaminate foodstuffs and to ensure fair practices in food trade. This publication updates developments in worldwide mycotoxin regulation as of December 2003, based on an international enquiry carried out in 2002/2003. *Recent Developments in Pig Nutrition 3* Woodhead Publishing

 'Essential reading,' The Good Book Guide
 In this 24th edition of State of the World, long established as the most authoritative and accessible annual guide to our progress towards a sustainable future, continues to provide the studies that pay particular attention to cities. In 2007, world population will tip from mostly rural

to mostly urban. Already, some 1 billion individuals, one in every three urbanites, live in 'slums', some 90% of which are found in Africa, Asia, and Latin America. Published annually in 28 languages, State of the World is relied upon by national governments, UN agencies, development workers and law-makers for its authoritative and up-to-the-minute analysis and information. It is essential for anyone concerned with building a positive, global future. Featuring case studies of cities from Melbourne to Malmö to Timbuktu. This year's edition covers: an urbanizing world; providing clean water and sanitation; farming the cities; greening urban transportation; energizing cities; natural disaster risk in cities; charting a new course for urban public health; strengthening local economies; and, fighting poverty and environmental injustice in cities.

Shade Tree Pruning
 Cambridge University Press

Given the importance of livestock to the global economy, there is a substantial need for world-class reference material on the sustainable management

of livestock in diverse eco-regions. With uncertain climates involving unpredictable extreme events (e.g., heat, drought, infectious disease), environmental stresses are becoming the most crucial factors affecting livestock productivity. By systematically and comprehensively addressing all aspects of environmental stresses and livestock productivity, this volume is a useful tool for understanding the various intricacies of stress physiology. With information and case studies collected and analyzed by professionals working in diversified ecological zones, this book explores the influence of the environment on livestock production across global biomes. The challenges the livestock industry faces in maintaining the delicate balance between animal welfare and production are also highlighted.

The Encyclopaedia Britannica John Wiley & Sons

The African Herbal Pharmacopoeia (AfrHP) provides comprehensive, up to date botanical, commercial and phytochemical information on over fifty

of the most important African medicinal plants. The technical data were made on plant samples sourced from across the continent. These monographs prepared by leading African scientists, have been reviewed by international experts. Additional data includes micro morphology of the plant material, distribution maps and TLC Chromatograms. These data are crucial for producers, collectors and traders in medicinal plants and extracts as well as researchers, manufacturers and practitioners. The scope, quality and standard of these herbal monographs are comparable to those prepared in Europe, North America and Asia. Whilst this is the very first edition, it is being proposed to proceed to a second edition, quickly, as more plant species will be covered.

Geriatric Practice

Cuvillier Verlag
Lignocellulosic Fibre and Biomass-Based Composite Materials reviews the development, characterization and applications of composite materials developed from the effective use of lignocellulosic fibre and biomass. The book gathers together a wide

spectrum of cutting-edge research on biomass fillers and reinforcements used for the fabrication and synthesis of composites. The book takes a systematic approach, investigating processing, design, characterization and applications of biocomposites, in order to establish their important relationship as a general guideline for end-user applications. Beginning with an introduction to biomass and its composites, a team of leading experts in the field cover rice husk, kenaf, oil palm, alfa and doum fibres, bamboo, cork, and many other materials, considering a range of applications, along with key issues such as performance and sustainability. The groundbreaking research presented opens the door to obtaining advanced material characteristics and significant enhancements in physical, mechanical, and thermal properties. This will become an extremely useful reference and technical guide for academic and industrial researchers in composite materials, as well as for advanced students and industrialists working in material

commercialization. -
 Gathers together a wide spectrum of research on lignocellulosic fiber and biomass fillers and reinforcements used for the fabrication and synthesis of composites -
 Presents multidisciplinary work in relation to materials engineering, polymer chemistry and physics, materials processing, organic synthesis and industrial design and applications -
 Demonstrates systematic approaches and investigations from processing, design, characterization and applications of biocomposites
Lignocellulosic Fibre and Biomass-Based Composite Materials Cambridge University Press
 Covering a variety of essential topics relating to commercial poultry nutrition and production—including feeding systems and poultry diets—this complete reference is ideal for professionals in the poultry-feed industries, veterinarians, nutritionists, and farm managers. Detailed and accessible, the guide analyzes commercial poultry production at a worldwide level and outlines the importance it holds for maintaining

essential food supplies. With ingredient evaluations and diet formulations, the study's compressive models for feeding programs target a wide range of commercially prominent poultry, including laying hens, broiler chickens, turkeys, ducks, geese, and game birds, among others.

Violence in Nigeria

Springer Science & Business Media

This book is the first attempt to understand Boko Haram in a comprehensive and consistent way. It examines the early history of the sect and its transformation into a radical armed group. It analyses the causes of the uprising against the Nigerian state and evaluates the consequences of the on-going conflict from a religious, social and political point of view. The book gives priority to authors conducting fieldwork in Nigeria and tackles the following issues: the extent to which Boko Haram can be considered the product of deprivation and marginalisation; the relationship of the sect with almajirai, Islamic schools, Sufi brotherhoods, Izala, and

Christian churches; the role of security forces and political parties in the radicalisation of the sect; the competing discourses in international and domestic media coverage of the crisis; and the consequences of the militarisation of the conflict for the Nigerian government and the civilian population, Christian and Muslim.

About the Editor: Marc-Antoine Perouse de Montclos is a Doctor in Political Science and a Professor at the French Institute of Geopolitics in the University of Paris 8. A specialist on armed conflicts in Africa south of the Sahara, he graduated from the Institut d'etudes politiques de Paris (IEP), where he teaches, and is a researcher at the Institut de recherche pour le developpement (IRD). He lived for several years in Nigeria, South Africa and Kenya. He has published some eighty articles and books, including *Le Nigeria* (1994), *Violence et securite urbaines* (1997), *L'aide humanitaire, aide a la guerre?* (2001), *Villes et violences en Afrique subsaharienne* (2002), *Diaspora et terrorisme* (2003), *Guerres d'aujourd'hui* (2007), *Etats faibles et securite*

privee en Afrique noire (2008), *Les humanitaires dans la guerre* (2013), and *La tragedie malienne* (2013). Reviews For scholars, government officials, journalists, and civic actors, this book expands our understanding of this enigmatic jihadist movement, its genesis, evolution, and political implications. In light of the global significance of militant Islam, the book is indispensable for students of Nigeria, Africa, Muslim societies, and armed conflicts.-Richard Joseph, John Evans Professor of International History and Politics, Northwestern University This collection of essays on Boko Haram is much the best yet-well informed, coolly competent. With the insurgency still evolving, we really need this guide to its early days.-Murray Last, Emeritus Professor of Anthropology, University College of London This valuable collection assembles notable experts who analyze the messages and behavior of Boko Haram. The collection also provides nuanced treatments of actors involved in the conflict, including the Nigerian state and Nigerian Christians.-Alex Thurston,

Visiting Assistant Professor, African Studies Program, Georgetown University
Understanding Modern Nigeria Nottingham University Press
 A thorough understanding of cellular and molecular mechanisms involved in the individual expression of toxic effects provides an important tool for assessment of human health risk. New aspects, major advances, and new areas in molecular and cellular biology and toxicology demand updated sources of information to elucidate the functional mechanics of human toxicology.
Mechanistic Toxicology: The Molecular Basis of How Chemicals Disrupt Biological Targets, Second Edition retains the accessible format of the original to present the general principles that link xenobiotic-induced toxicity with the molecular pathways that underlie these toxic effects. Extensively illustrated, this book forms a conceptual bridge between multiple events at the molecular level and the determinants of toxicity at the physiological and cellular level. Specific examples of drugs, environmental pollutants, and other

chemicals are carefully chosen to illustrate and highlight the fundamental mechanisms of toxicity at different toxicokinetic and toxicodynamic levels. The book includes references and review articles at the end of each chapter, as well as boxed text for relevant review information on biological, biochemical, molecular, and toxicological background. Linking molecular pathways to more general biomedical contexts, the author ensures that the reader is not lost in the details and instead receives a broad understanding of the processes underlying xenobiotic toxicity. New in the Second Edition
 Updated chapters Types of toxic responses
 Disruption of signal transduction by xenobiotics
 Disruption of mitochondrial function
 Novel mechanisms derived from systems toxicology
Mechanistic Toxicology
 Food & Agriculture Org
 The first volume of the graphic adaptation of Yuval Noah Harari's global phenomenon and smash SUNDAY TIMES #1 BESTSELLER. Featuring 256 pages of gorgeous full-colour illustrations and wrapped in a beautiful package. One hundred

thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one-homo sapiens. What happened to the others? And what may happen to us? In this first volume of the adaptation of his ground-breaking book, renowned historian Yuval Harari tells the story of humankind's creation and evolution, exploring the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human". From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens challenges us to reconsider accepted beliefs, connect past developments with contemporary concerns, and view specific events within the context of larger ideas. Featuring easy-to-understand text covering the first part of the original edition, this adaptation of the mind-expanding book furthers the ongoing conversation as it introduces Harari's ideas to a wider new readership. '[A] wonderful graphic novel... Smart, funny and dipped deep in the reality of what we as a species are...' Big Issue

Animal Production in theTropics John Wiley & Sons

Changes in the pig industry mean that it is becoming even more important to keep abreast of developments in science and technology. Major changes in legislation concerned with animal welfare and food safety have greatly affected pig production systems, particularly in Europe. The development of modern genotypes has necessitated a reevaluation of the ways in which pigs respond to nutrients under different environmental conditions. The chapters of this book have all been previously published in *Recent Advances in Animal Nutrition*, which is the annual proceedings of the University of Nottingham Feed Manufacturers Conference. This book provides a convenient reference source on pig nutrition that will be valuable to students, teachers, research workers, advisory staff, farmers and many others.

The New "public" Elsevier

This book serves as a comprehensive reference for the basic principles of caring for older adults, directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections, each with chapters that target the skills and knowledge necessary for achieving competency. Each of the 45 chapters follow a consistent format for ease of use, beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also includes brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to physicians of the future. Written by expert educators and clinicians in geriatric medicine, *Geriatric Practice* is key resource for students in geriatric medicine, family and internal medicine, specialties, hospice and nursing home training, and all clinicians studying to work with aging patients.

State of the World 2007

World Health Organization
In this book you will learn about the amazing health

benefits of coconut oil, meat, milk, and water. You will find out why coconut oil is considered the healthiest oil on earth and how it can protect you against heart disease, diabetes, and infectious illnesses such as influenza, herpes, candida, and even HIV. You will learn why coconut water is used as an IV solution and how coconut meat can protect you from colon cancer, regulate blood sugar, and expel intestinal parasites. Contains dozens of fascinating case studies and remarkable success stories. You will read about one woman's incredible battle with breast cancer and how she cured herself with coconut. You will read how a medical doctor cured himself of Crohn's disease in seven days. This book includes an extensive A to Z reference with complete details on how to use coconut to prevent and treat dozens of common health problems. The foreword is written by Dr Conrado Dayrit, the first person to publish studies showing the benefit of coconut oil in treating HIV.

Feeding Standards for Australian Livestock
Routledge

This textbook focuses on

the nascent field of Immunoepidemiology that addresses how differences in immune responses among individuals affect the epidemiology of infectious diseases, cancer, hypersensitivity, and autoimmunity. The idea for the book originated from a course entitled "Immunology for Epidemiologists" at the Yale School of Public Health. While many fine textbooks are available that address the immunological responses of individuals to pathogens, these provided very little information regarding how immunological variation among populations affects the epidemiology of disease. And yet, it has long been recognized that there is great immunologic diversity among people, which can have a profound effect on the epidemiology of disease. Careful review of the immunologic and epidemiologic literature revealed that there have been relatively few publications concerning immunoepidemiology and that no textbook is available on the subject. This textbook therefore aims to fill this void by providing a much-needed tool to comprehensively and efficiently teach

immunoepidemiology. The book includes a section on the basic principles of immunology, and then applies them to particular examples of disease in human populations. The target audience for this text book are Masters of Public Health students. Others who should also find it of interest include PhD students in epidemiology, immunology, medical students, generalists, and specialists in immunology, infectious diseases, cancer, and rheumatology.

Moyers on Democracy

Springer Nature

Human rights and peace issues and concerns have come about at a critical time. The world has recently witnessed a plethora of turning points that speak of the hopes and vulnerabilities which are inherent in being human and demonstrate that change in the service of human rights and peace is possible. At the same time, however, other events indicate that wherever there is life, there is vulnerability in a world characterized by instability and endemic human suffering. On top of all this, the collapse of the global financial system and the serious, rapid destruction of the

environment have brought the world to a precarious state of vulnerability. Activating human rights and peace is, therefore, a project that is always in progress, and is never finally achieved. This enlightening collection of well thought through cases is aimed at academics and students of human rights, political science, law and justice, peace and conflict studies and sociology.

WHO Monographs on Selected Medicinal Plants
Springer

An eye-opening discussion of the future of marketing, from four of the leading minds in the field In *Entrepreneurial Marketing: Beyond Professional Marketing*, a renowned team of marketing leaders, including the "Father of Modern Marketing," Professor Philip Kotler, delivers a groundbreaking and incisive redefinition of entrepreneurial marketing. In the book, some of the marketing sector's brightest minds explore the increasingly essential initiative to build new capabilities beyond the mainstream marketing approach that also consider the effect of digital connectivity on consumers and

companies everywhere. This book also discusses what marketers need to do to break the stagnation of normative marketing approaches that are often no longer effective in dealing with dynamic business environments. The authors introduce a fresh entrepreneurial marketing approach, converging dichotomies into a coherent form. The book also includes: A post-entrepreneurial-marketing view of the commercial landscape which puts the operational aspect at the center of the action, converging marketing and finance, and adopting technology for humanity Discussions of the strategies and techniques that will drive the actions of the marketing departments to create value with values that will lead the company to success through the year 2030 Explorations of the paradox between the development of core competencies and collaboration with various parties, including competitors The latest publication from some of the foremost minds in marketing—and in business, generally—*Entrepreneurial Marketing: Beyond Professional Marketing* is

a must-read combination of unique insight, concrete advice, and implementable strategies that introduce a new mindset for every professional marketer, entrepreneur, and business leaders worldwide.

Human Polyomaviruses

ASM Press

Despite extensive efforts to control it, malaria is still one of the most devastating infectious diseases worldwide. This book, now in its second edition, provides a broad and up-to-date overview of the rapidly expanding field of malaria immunology and its importance in the control of this disease. The first section deals with the malaria parasite and its interactions with both the vertebrate host and the mosquitoes which transmit the disease. In the second part, the mechanisms of immunity and their regulation by environmental and genetic factors are discussed. Finally, this volume contains several chapters on malaria vaccine development, describing the application of the most recent vaccine technologies as well as ongoing and planned vaccine trials. Authored by well-

recognized experts, this volume not only demonstrates the rapid progress being made in the search for vaccines against malaria, but also broadens our understanding of immunity to infection in general. It is therefore highly recommended reading for all scientists and professionals in the fields of immunology, infection and vaccine development.

The Biochemistry of

Silage Tsehail Publishers

A rich and accessible account of Yoruba history, society and culture from the pre-colonial period to the present.

Environmental Stress and Amelioration in Livestock Production

Karger Medical and Scientific Publishers

Most of the academic literature on violence in Nigeria is qualitative. It rarely relies on quantitative data because police crime statistics are not reliable, or not available, or not even published. Moreover, the training of Nigerian social scientists often focuses on qualitative, cultural, and political issues. There is thus a need to bridge the qualitative and quantitative approaches of conflict studies. This book represents an innovation and fills a gap

in this regard. It is the first to introduce a discussion on such issues in a coherent manner, relying on a database that fills the lacunae in data from the security forces. The authors underline the necessity of a trend analysis to decipher the patterns and the complexity of violence in very different fields: from oil production to cattle breeding, radical Islam to motor accidents, land conflicts to witchcraft, and so on. In addition, they argue for empirical investigation and a complementary approach using both qualitative and quantitative data. The book is therefore organized into two parts, with a focus first on statistical studies, then on fieldwork.

Contemporary Perspectives on Religions

in Africa and the African Diaspora John Wiley & Sons
 Human Polyomaviruses Molecular and Clinical perspectives Edited by Kamel Khalili and Gerald L. Stoner Our understanding of human polyomaviruses has evolved profoundly in the last fifteen years, creating an urgent need for an updated resource. Drs. Khalili and Stoner have collected the contributions of renowned researchers and clinicians in this cutting-edge volume. Human Polyomaviruses: Molecular and Clinical Perspectives presents in-depth analyses, comprehensive reviews, and timely assessments of recent discoveries and ongoing controversies focused on these important viral pathogens. Beginning with an historical

perspective, this book covers up-to-date investigations into the molecular biology and pathogenesis of human polyomaviruses. All aspects of these persistent infections are subsequently covered, including clinical issues, from diagnosis to information on treatment and drug trials. Central topics are: BK virus JC virus Simian virus 40 (SV40) and its potential as a human pathogen Progressive multifocal leukoencephalopathy (PML) This reference is a superb indoctrination for graduate students, medical students, high-level undergraduates, and anyone engaged in the study of DNA viruses and their molecular biology, evolution, transmission, and pathological potential.
