ZACHARY COLLINS

Rethinking the Human HarperCollins

This timely collection brings together original explorations of the COVID-19 pandemic and its wide-ranging, global effects on human rights. The contributors argue that a human rights perspective is necessary to understand the pervasive consequences of the crisis, while focusing attention on those being left behind and providing a necessary framework for the effort to "build back better." Expert contributors to this volume address interconnections between the COVID-19 crisis and human rights to equality and non-discrimination, including historical responses to pandemics, populism and authoritarianism, and the rights to health, information, water

access, and the environment. Highlighting the dangerous potential for derogations from human rights, authors further scrutinise the human rights compliance of new legislation and policies in relation to issues such as privacy, protection of persons with disabilities, freedom of expression and access to medicines. Acknowledging the pandemic as a defining moment for human rights, the volume proposes a post-crisis human rights agenda to engage civil society and government at all levels in concrete measures to roll back increasing inequality. With rich examples, new thinking, and provocative analyses of human rights, COVID-19, pandemics, crises, and inequality, this book will be of key interest to scholars, students and practitioners in all areas of human rights, global governance, public health, as well as others who are ready to embark on an exploration of these complex challenges.

This book examines five countries in South East Asia that are instructive case studies of how the region has had to negotiate pathways of development beyond crises and traps. At two ends of just one decade, 1997–2007, Indonesia, Malaysia, the Philippines, Thailand and Vietnam all had to weather the shocks of an East Asian financial crisis and a global financial crisis. Some economies might have buckled completely under those shocks and been condemned to long-term stagnation. Yet these five economies, part of the larger Asian region, emerged with continued if slower economic growth. An important theme of this book is that their resilience has been partly derived from the pursuit of growth and competitiveness along less known or recommended pathways. The chapters of this book take a novel approach to South East Asia's search for growth and improvement. They do not begin by evaluating how far macro-level performances would take a particular country towards high-

income status. Instead they provide original insights into actual cases of intermediate ways of achieving growth, upgrading and income improvement in non-privileged sectors. Such cases may hold more relevant lessons for the majority of developing countries than the experiences of highly developed economies.

Paul, a religious teen living in a small conservative town, finds his world turned upside down when he meets Manuel—a young man who says he's both Christian and gay, two things that Paul didn't think could coexist in one person. Doesn't the Bible forbid homosexuality? As Paul struggles with Manuel's interpretation of the Bible, thoughts that Paul has long tried to bury begin to surface, and he finds himself re-examining his whole life. This is an unforgettable book on an extremely timely topic that strives to open minds on both ends of the spectrum.

This is the first book to combine classical vehicle dynamics with electronic control. The equation-based presentation of the theory behind vehicle dynamics enables readers to develop a thorough understanding of the key attribute to both a vehicle's driveability and its active safety. Supported by MATLAB tools, the key areas that affect vehicle dynamics are explored including tire mechanics, the steering system, vehicle roll, traction and braking, 4WS and vehicle dynamics, vehicle dynamics by vehicle and human control, and controllability. As a professional reference volume, this book is an essential addition to the resources available to anyone working in vehicle design and development. Written by a leading authority in the field (who himself has considerable practical experience), the book has a unique blend of theory and practice that will be of immense value in this applications based field. Get a thorough understand of why vehicles respond they way they do with a complete treatment of vehicle dynamics from theory to application Full of case studies and worked examples using MATLAB/Simulink Covers all variables of vehicle dynamics including tire and vehicle motion, control

aspects, human control and external disturbances

Clinical psychologist and author of *The Defining Decade*, Meg Jay takes us into the world of the supernatural: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only "How do they do it?" but also "How does it feel?" These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

This volume brings together a number of papers from two workshops with the theme, 'Rain, Rivers, Reservoirs', which considered the dynamic changes to river systems as part of natural processes, particularly changing climatic conditions. Bringing researchers from two different locations to Brazil and the UK allowed scientists to contribute to and promote, 'debate on current research...on how the planet works and how we can live sustainably on it'. This volume features a series of papers on the geoscience of modern and ancient rivers from across the world (Brazil, United States, Spain, Argentina, Canada, India and the UK), their evolution through time, their management, their deposits and their engineering, with both subsurface aquifers/hydrocarbon reservoirs (of Carboniferous, Triassic and Cretaceous age) and surface reservoirs considered.

The Yacoubian Building holds all that Egypt was and has become over the 75 years since its namesake was built on one of downtown Cairo's main boulevards. From the pious son of the building's doorkeeper and the raucous, impoverished squatters on its roof, via the tattered aristocrat and the gay intellectual in

its apartments, to the ruthless businessman whose stores occupy its ground floor, each sharply etched character embodies a facet of modern Egypt -- where political corruption, ill-gotten wealth, and religious hypocrisy are natural allies, where the arrogance and defensiveness of the powerful find expression in the exploitation of the weak, where youthful idealism can turn quickly to extremism, and where an older, less violent vision of society may yet prevail. Alaa Al Aswany's novel caused an unprecedented stir when it was first published in 2002 and has remained the world's best selling novel in the Arabic language since.

"The incidents in this collection range from childhood experiences

and family events through glimpses of steet life in Thatcher's Britain to deaths and premonitions of death, individual and universal, under the shadow of the nuclear threat. There is a group of fictional narratives, and a handful of the erotic, or, more properly, anti-erotic poems for which ... Adcock is well-known. There are also celebrations of places, reflections on art and language, and affectionate tributes to friends."--Back cover.
